Your "sign off" sheet was fine. Permit is ok; so all is good to go. cfmc

Good Morning Chuck, Here is Mr. Skogsberg's well permit and as you can see I highlighted (#8)the part concerning the flow meter. It appears to me that it is part of the permit. So, if I understand what you were telling me about it needed to be included in the permit and it is then he should be good to go.. As so did you get chance to look over my draft signoff sheet for the land owner that would forfeit the ability to get excess water if any well water was to be use on their property. If it looks good to you I will put it on our letter head and have them sign off on it.

Let me know if that

will work or make the necessary changes to make it work it we can. I told

Mike

Mr. Skogsberg that I would let him know ASAP. Thanks, Roy
