APPLICATION FOR TRANSFER OF WATER RIGHT PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

The diversion system is in place and will maintain current measuring devices. The systems are hydraulically connected and wastewater from the adjacent dairy will be applied to remaining acres with water rights.

- b. Who owns the property at the point(s) of diversion? Applicant

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?

If yes, ☒ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: Rabo Agrifinance

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank?

If yes, ☐ complete Attachment WSB.

- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:

The land will continue to be irrigated as before. The combined Place of Use more accurately describes the irrigation practices as the farms are hydraulically connected, and reduces the complexity of managing the water rights. The transfer as proposed shows the final POU after the companion stockwater transfer is complete.

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:

The diversion system for the stock facilities is connected with the irrigation system. See accompanying change of use stockwater/commercial transfer.

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- ☐ ☒ undergone a period of five or more consecutive years of non-use,
☐ ☒ currently leased to the Water Supply Bank,
☐ ☒ currently used in a mitigation plan limiting the use of water under the right, or
☐ ☒ currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe:

The rights are currently irrigating ground on three separate farms and this transfer will consolidate the rights into a single PPU in the same general area. One group of 38 rights irrigates 4631.0 acres with a 70.01 cfs flow rate, another group of 13 rights irrigates 2210.0 acres with a 39.03 cfs flow rate, and the final group of 5 rights irrigates 522.0 acres with a flow rate of 5.7 cfs.

After the transfer, 7363.0 acres will be irrigated within the proposed 9204.0 acre PPU. Currently, the rights in the three separate farms have distinct Points of Diversion (POD) for each farm. This transfer will add the ground water PODs from each farm to the other two farms so that each ground water right will have 32 PODs.

FEE MEMORANDUM

Date: February 18, 2016
To: East Valley Cattle LLC Irrigation PPU #80638 and Dairy #80639 transfer file
From: Jim Bitzenburg
Re: Receipting/disposition of fees paid

These two transfers were filed in the Southern Region office on January 14, 2016 along with a check for \$6000.00 (receipt S035205, Brockway Engineering, check #13122). Upon receipt, the fee was split between the two transfers as follows: \$5,500.00 was credited to the Irrigation transfer (80638) and \$500.00 was credited to the Dairy transfer (80639). Transfer 80638 involves the addition of all of the PODs on three separate farms to all of the rights involved, as well as creating a PPU of the combination of the three farms. The cfs of all of the rights is 113.86, so from the transfer fee schedule, 100 cfs is \$5220.00 and the additional 13.86 cfs would cost \$280.00 more for a total of \$5500.00.

The Dairy transfer is changing the nature of use for 1.77 cfs from irrigation to stockwater/commercial, so that fee would be \$580.00 for the cfs, and \$250.00 for the change in nature of use for a total of \$830.00. This fee paid was deficient \$330.00. The representative was contacted and a check for the extra \$330.00 was received (receipt S035218, Brockway Engineering, check #13141).

Upon further review of the irrigation PPU application 80638, it was necessary to amend the application flow rate from 113.86 cfs to 114.74 cfs which increases the fee by \$20.00 (1 cfs x \$20.00). The representative was contacted by email on 2/11/16. On 2/18/16, a check for \$20.00 was received to cover the additional cfs (receipt S035282, Brockway Engineering, check #13192).

Dear Jim,

Please incorporate the corrections into the transfer. Part 1 was corrected to the full volume of irrigation before the stockwater and commercial transfer. The water right list was corrected because 43-13452 had the post stockwater and commercial volume on it. I think I was putting the chicken ahead of the egg here. Thank you for your help on this accounting.

Hattie-

I was wanting to get the East Valley Cattle Irrigation transfer to advertising today (the deadline is today) and I was wondering if you had gotten a chance to check the cfs on page 3, item B., 1., Total Authorized Under rights? I come up with a total of 114.74. If you agree, could you change the application and email a changed page to me? If you want to stick with 113.86 cfs, let me know and I'll run with that. Thanks.

MEMORANDUM

Date: February 9, 2016
To: East Valley Cattle, LLC Irrigation Transfer 80638 File
From: Jim Bitzenburg
Re: Evaluation of Sufficiency of Information Submitted

Application for transfer proposes the creation of a 9204.0 acre irrigation Permissible Place of Use (PPU) for fifty-four ground water rights and two surface water rights (Raft River) which currently irrigate 7363.0 acres on ground located approximately 7.0 to 14.3 miles north and 2.5 to 8.4 miles east of Malta. The rights are currently irrigating ground on three separate farms and this transfer will consolidate the rights into a single PPU in the same general area. One group of 38 rights irrigates 4631.0 acres with a 70.01 cfs flow rate, another group of 13 rights irrigates 2210.0 acres with a 39.03 cfs flow rate, and the final group of 5 rights irrigates 522.0 acres with a flow rate of 5.7 cfs. After the transfer, 7363.0 acres will be irrigated within the proposed 9204.0 acre PPU.

Currently, the rights in the three separate farms have distinct Points of Diversion (POD) for each farm. This transfer will add the ground water PODs from each farm to the other two farms so that each ground water right will have 32 PODs.

Only minor adjustments to the overall POU are anticipated with this transfer; the transfer should be advertised, however, because the transfer changes PODs in the Raft River Critical Ground Water Area.

- **Authority to File:**
The Department's database indicates that the water rights involved are owned by the applicant, East Valley Cattle, LLC. The application was signed by Bill Millenkamp, the manager of East Valley Cattle, LLC. See attachment from the Idaho Secretary of State office, '*Annual Report Form*', for East Valley Cattle, LLC.
- **Water Right Validity:**
Based on aerial imagery, forfeiture does not appear to be an issue.
- **Injury to Other Water Rights:**
None anticipated or foreseen.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No issues anticipated. The application will be advertised.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.
- **Effect on the Economy of the Local Area:**
None Anticipated
- **Effect of the Agricultural Base of the Area:**
None Anticipated

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

Dear Jim,

The attached files reflect your recommended corrections to the Permissible Place of Use. We adjusted the acreage in the NWNW QQ of Section 1 in 12S 27E. I also fixed the Lot labels for the SWNW and NWSW QQ in Section 31 of 11S 27E. I am still waiting for a response from Mr. Millenkamp on the question about the well in Section 26 of 11S 27E and whether or not it is connected to the irrigation system.

Thank you,

Hattie Zobott, P.E.

Dear Jim,

Amy Runser—our information mapping specialist—is checking out your first point on 12S 27E Sect 1. Your second question on the lot labels for the NENW and NWNW of 11S 28E Section 31—you are correct. I will send you a revised POU PPU list after Amy's review. Finally, Amy will be sending you the shape file for the irrigation as per your request.

Thank you

Hattie-

I came across a couple more small items as I was doing the POU data entry. In T12S, R27E, Section 1, in the NWNW, Lot 4, there is an acre covered by the PPU that is actually owned by the Raft River Rural Electric Cooperative, not East Valley Cattle. We probably want to drop the acreage in that QQ down to 39 on the Irrigation PPU land list, and also alter the map. The other issue was in T11S, R28E, Section 31. It looks like the NWNW should be Lot 1 and the SWNW should be Lot 2. On your list, Lot 1 was on NENW and Lot 2 was NWNW.

Take a look at those and let me know what you think.

When you get a minute, could you send me the shape file for the 7363 acre irrigation POU?

And when you find out if that third stock/commercial POD is connected or will be connected, let me know.

Thanks for all of your assistance.

Dear Mr. Bendixen:

Thank you for bringing the fee correction to my attention. The enclosed check addresses the fee deficiency for the transfer of 1.75 cfs to stockwater and commercial use, an adjustment of \$80.00. In addition, the previously excluded change of use fee of \$250.00.

Re: East Valley Cattle LLC Irrigation POU/PPU and Stockwater and
Commercial Transfer

Dear Mr. Merritt:

East Valley Cattle LLC is a farming and cattle operation located in Raft River, near Malta, Idaho. Two transfers for the applicant are included. The first transfer proposes to combine the three separate Places of Use into a Place of Use within a Permissible Place of Use. The irrigation transfer will also update the irrigation shape file for the current farming operations. The second transfer proposes to change the nature of use of a portion of an irrigation water right to stockwater and commercial use for a dairy conversion.

The irrigation transfer will create a permissible place of use of 9,205 acres. The initial Place of Use for irrigation will total 7,363 acres. All of the farms included in the transfer will be hydraulically connected. The final Place of Use will dry up 212.4 acres that will be transferred to stockwater and commercial use resulting in a final Place of Use for the irrigation on the farm of 7,150.6 acres.

The stockwater and commercial transfer will ensure that there is sufficient water for conversion of the current stock operation to a Jersey Cow dairy over the next eight years. The existing stockwater and commercial water rights total 1,145.6 acre-feet annually. The required volume for the dairy conversion was modeled to be 1,782.9 acre-feet annually. Therefore, the total volume of water recommended for the transfer is the difference of 637.3 acre-feet.

The timeline for the conversion of the existing facilities to the dairy is expected to be eight years. The applicant requests eight years for the completion of the transfer enabling the stockwater and commercial transfer to be in step with the dairy conversion timeline. The Place of Use for the Irrigation will be updated yearly to reflect acreage idled for the stock and commercial transfer. The extended timeline is requested due to the complexity and scope of the two transfers.
