This work and report were prepared by the University of Idaho Research and Extension Center at Kimberly, Idaho under contract with the Idaho Department of Water Resources. Work was supported by funding from IDWR and the Idaho Agricultural Experiment Station

and Idaho Engineering Experiment Station. The authors gratefully acknowledge the long-term evapotranspiration data collection and long-standing advice provided by Dr. James L. Wright, USDA-ARS Kimberly (ret.), the more than two decades of high quality agricultural weather data collection by the U.S. Bureau of Reclamation AgriMet system, and the very long-standing, routine data collection by the hundreds of cooperative weather station volunteers across the state who, for more than one-hundred years, have faithfully observed daily air temperature and precipitation.

MEMORANDUM

Date: February 22, 2016
To: Transfer 80416 File
From: Benny Walker
Re: Evaluation of Sufficiency of Information Submitted

Application proposes to add two existing ground water points of diversion to five water rights used at a dairy located approximately 7.5-8.0 miles south and 1.6-2.0 miles east of the city of Hansen. The five water rights will allow for the diversion of 0.66 cfs and 127.6 af from a total of four existing wells at the dairy. In addition the application proposes to change the nature of use for domestic and irrigation of one acre, 0.04 cfs, to stockwater and commercial uses. The application also proposes to update the ownership and points of diversion of domestic water right 47-12300 and to provide the full amount of water 14.6 af allowed under this right. Water right 47-2496B authorizes 1.8 af for in house domestic use for 3 homes, and 4.0 af for the irrigation of 1 acre associated with these homes. The 3 homes and the 1 acre of irrigation have been removed and are no longer in use. The 1.8 af for domestic use will be changed to stockwater and commercial uses. The 4.0 af for 1 acre of irrigation provided a consumptive use of 3.0 af that will be converted to stockwater and commercial uses. This is based on a precipitation deficit value of 3.0 af for turf grass in the SE Twin Falls area according to the U. of I. Evapotranspiration and Consumptive Irrigation Water Requirements for Idaho. Note that WMIS records indicate that this facility has diverted more than 127.6 AF per year. The existing wells involved in the transfer are within the Artesian City CGWA.

- **Authority to File:**
The applicant is listed as the current owner of water rights 47-2496B, 47-17286, 47-17288, and 47-17290 according to department records. Ownership of water right 47-12300 will be changed into the applicants' name. Current tax lot information and department records from previous ownership changes for the water rights involved in this transfer included warranty deeds showing that the applicant is the owner of the lands pertaining to this transfer.
- **Water Right Validity:**
Rights 47-2496B, 47-17286, 47-17288, and 47-17290 were decreed in the SRBA in 2010. Water right 47-12300 was decreed in 1999. Current WMIS records show water use in recent years. Aerial photography also indicates current use. Therefore forfeiture of the right involved with the transfer does not appear to be an issue.
- **Injury to Other Water Rights:**
None anticipated.
- **Enlargement of Use:**
None anticipated. There is no change to the place of use
- **Local Public Interest:**
No negative impact anticipated. Application will be subject to public notice and protest
- **Beneficial Use/Conservation of Water Resources:**
Proposed uses are recognized as beneficial uses of water.
- **Effect on Economy of the Local Area:**
None anticipated.
- **Effect of the Agricultural Base of the Local Area:**
None anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

RE: Idaho Dairy Holdings Transfer Amended

Mr. Funderburg:

The Department of Water Resources (Department) has a transfer on file that you submitted on behalf of Idaho Dairy Holdings LLC to add two existing points of diversion to a dairy located in Twin Falls County. A recent review of the transfer prior to advertisement revealed a correction that needed to be made before the application could be advertised.

The Department determined that the current application as filed needed to be amended before being processed to change the points of diversion of all five water rights. Water right 47-2496B currently list a domestic use of 1.8 AF and an irrigation use of 4.0 AF for 3 homes and the irrigation of lawn, garden and landscaping associated with the homes. It is the Departments understanding that these 3 homes and irrigation are no longer in existence. Therefore to better serve the needs of the dairy it is proposed to change the nature or purpose of use from domestic and irrigation to stockwater and commercial uses. For this reason I've drafted an amended transfer application to change the domestic 1.8 AF and 3.0 AF of irrigation uses to stockwater and commercial uses for the dairy. The irrigation allowance of 4.0 AF will be reduced to 3.0 AF for the consumptive use value of one acre of irrigation. The application also proposes to change the place of use for water right 47-12300 to include the current dairy location.

Enclosed is the new transfer application for the applicant's review and signature. In addition, because of the change in nature or purpose of use, there will be an additional filing fee of \$250.00 in order to process the change from domestic and irrigation to stockwater and commercial uses.

Please return the original amended application and the additional fee of \$250.00 in order to continue processing. If you have any questions, or if I can be of any further assistance, feel free to contact me at your convenience.

Sincerely,

Benny Walker
