Subject: RE: French Cattle LLC Water right Settlement Agreement

Michelle,

I've had a chance to review your proposed settlement and have the following comments;

First, it's evident both parties are agreeing to a diversion rate of 25 gpm which corresponds to 0.0557 cfs. The Department doesn't carry the diversion rate out to 4 decimal places, we would round it off to 0.06 cfs which is equivalent to 26.93 gpm.

$0.06 \text{ cfs} \times 448.83 \text{ gal/min/cfs} \times 60 \text{ min/hr} \times 24 \text{ hrs/day} = 38,779 \text{ gal/day}$

Secondly, the only time one would see an annual volume would be when a license is issued. The reason being at the end of the development period, the applicant may choose to reduce or eliminate some of the proposed uses. With that said, at present face value of the application, the annual volume at the time of licensing would look like the following;

Domestic	0.6 af	1 home	195,510 gallons/year
Stockwater	0.3 af	19 head of mixed stock	97,755 gallons/year
Irrigation	3.0 af	1 acre @ 3af/ac	977,550 gallons/year
Totals	3.9 af		1,270,815 gallons/year

Your e-mail showed an annual volume of 13,140,000 gallons/year which is equivalent to 40.33 af. Your annual volume figures are much higher than what the Department would issue at licensing.

Thanks for the opportunity to comment.

Subject: French Cattle LLC Water right Settlement Agreement

Hi Keith,

Latah County has met with French Cattle LLC and came up with a compromise to settle the protest.

Please review the attached documentation to see if it will meet your requirements.

I based it off of the settlement that we had with Adam Reed.

If you have any questions or modifications, please let me know.

I will be out of the office until January 4th.

Thanks for your help,

Michelle Fuson
