Re: Evaluation of Sufficiency of Information Submitted

Transfer proposes to change the point of diversion for this stock water right (47-17634) from an irrigation well to a separate small stock water well and to eliminate 2 troughs from the system leaving 5 other troughs. The well is located about 4 miles north of Rogerson and will divert 0.12 cfs and up to 6.7 acre feet of water.

The property and point of diversions involved with the application are not located within any water district or the ESPA so a model analysis is not necessary. Watermaster comments will be NOT be necessary.

- **Authority to File:**
The applicant is listed as the current owner of involved water rights according to IDWR records and is the son of the family that owns the involved property.
- **Water Right Validity:**
The water right has been decreed in the SRBA. Review of aerial photos indicates that the lands involved with the transfer have visible evidence of stock watering troughs as described.
- **Injury to Other Water Rights:**
The new well and an existing well are located within a couple of hundred feet of each other and the new well is further away from neighboring domestic wells owned by others.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No hydrological impact anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
