Dear Jeff:

As can be noted from the "Beneficial Use" section of the IDWR Water Permit Report for Water Right 95-13374, the Total Diversion of 0.04 CFS is comprised of Irrigation, Irrigation Storage, Aesthetics, and Aesthetic Storage. At this time the System has been completed but an extension is being requested to allow time to verify the Pumping Capacity required on initial startup of the water feature. This System is currently winterized and not active to allow evaluation. While the system on an annual basis will not exceed any of the amounts applied for under the Diversion Rate, the instantaneous demand of the pumping system could exceed the 0.04 CFS. A professional Engineer has been retained to assist in finalizing the process of Proof of Beneficial Use. Mr. Robert "Bob" Haynes, P.E. with Idaho Water Engineering will be contacting your department with any applications for changes if required.

At this time we are requesting an additional two (2) year extension to Water Right Permit 95-13374 to allow time for the Engineer to finalize these issues.

Sincerely,

Todd Stam
