**NOTICE OF PROPOSED CHANGE OF WATER RIGHT
TRANSFER NO. 80026**

SUNVIEW DAIRY LLC, 6600 SW BLANKSMA RD, MOUNTAIN HOME, ID 83647; has filed Application No. 80026 for changes to the following water rights within ELMORE County(s): Right No(s). 61-12270, 61-2186, 61-7222; to see a full description of these rights and the proposed transfer, please see www.idwr.idaho.gov/apps/wr/QueryNewTransfers/QueryNewTransfers.aspx.

The transfer proposes to change the nature of use of 182.0 af for irrigation use authorized under 61-2186 to stockwater and commercial purposes for expansion of existing dairy. A change to the place of use will expand commercial/stockwater use under rights 61-2186, 61-7222 & 61-12270. The site is located within Elmore County, west of Hwy 51, 3.25 miles north of the Snake River.

Permits will be subject to all prior water rights. For additional information concerning the property location, contact Western Region office at 208-334-2190; or for a full description of the right(s) or proposed transfer (s) please see

www.idwr.idaho.gov/WaterManagement/WaterRights. Protests may be submitted based on the criteria of Idaho Code §§ 42-203A and 42-222. Any protest against the approval of the application(s) must be filed with the Director, Dept. of Water Resources, Western Region, 2735 Airport Way, Boise, ID 83705 together with a protest fee of \$25.00 for each application on or before 1/25/2016. The protestant must also send a copy of the protest to the applicant.

RE: Application for Permit No. 61-12303

Dear Applicants:

The Idaho Department of Water Resources (IDWR) received the above referenced application for permit requesting a new ground water right in Elmore County. The purpose of this letter is to request application amendments and additional information.

1. The proposed use is within a ground water management area (GWMA). The Department will issue a water right permit for non-consumptive uses which do not exceed the rate and volume limitations of the "domestic purposes" definitions described in section 42-111, Idaho Code. Consumptive uses such as irrigation will not be approved.

Irrigation is listed as a proposed use on the referenced application and must be amended before for processing can continue. Please amend item #'s 4, 5, 6.a, 8, 9 and 11 to remove the proposal of irrigation. The correct quantity for the domestic use should total .88 cfs, allotting .35 cfs for internal use and .53 for external use. Each home will be limited to ½ an acre for irrigation purposes within a domestic water right permit approval as described in section 42-111, Idaho Code. Please note, increasing the total quantity to be appropriated will advance the priority date once the amended application is received by the Department.

2. Please amend #7.d to describe irrigation use under the domestic right will not exceed ½ an acre for each of the 53 homes.
3. You may consider requesting 5 years to complete the system instead of the proposed 2 years listed on #12.
4. Enclosed you will find a map created to identify the proposed points of diversion (POD). Please submit the map along with an amended application if you agree with the POD locations.

To promote the processing of your water right application, please address and submit all documentation requested above within thirty (60) days. If you have questions regarding this matter, please contact me at 208-334-2190.

Sincerely,

Rachel Sommer
Water Resource Agent

Re: Water Right Application Incomplete - Returned

Dear Applicant:

This office received your application on July 13, 2015. The application cannot be accepted into the records of the Idaho Department of Water Resources (IDWR) until the following items are addressed:

- Point of Diversion(s) was not provided correctly. Please include the 40 acre-tract description of where your well is located. Based on your included map, this may be the NW quarter of the NE quarter.
- Description of Diverting works was not complete. Please complete section 6a to describe the system you will use to divert water from this source. An example of this is using a pump in a well to connect to multiple homes in a subdivision.
- Nature of Proposed Use was not provided correctly. Please amend section 7e to describe how the water will be used for fire protection. Will this be in the form of a storage tank? Or a fire hydrant? Is this for each individual home?
- Place of Use or acres irrigated was not provided correctly. The number of acres to be irrigated in each 40-acre tract must be shown (each square must include a number for irrigation, not to exceed 40.) See the attached guidance document for an example.

The original incomplete application is enclosed. Please make the necessary amendments to the original form and re-submit within the next thirty (30) days. This letter is an attempt to ensure that your application is complete in order to establish a priority date. You may receive future correspondence regarding more specific details of your application. IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please consult the IDWR website or contact this office at 208-334-2190 and ask for the "office day person" if you have any questions about the necessary information or fee.

Sincerely,

Western Region Water Rights Staff
