MINIMUM REQUIREMENTS CHECKLIST
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable to the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at www.idwr.idaho.gov.

Name of Applicant(s) Sun View DairyCheck whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.

- Yes N/A * Means the item is always required and must be included with the application.
- ☒ * Completed Application for Transfer of Water Right form, Part 1.
 - ☒ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
 - ☒ * Application for Transfer Part 2A. Attach a Part 2A report describing each water right in the transfer as currently recorded.
 - ☒ ☐ Complete and attach an Application for Transfer Part 2B for each water right for which only a portion is proposed to be changed through this transfer application.
 - ☒ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
 - ☐ * Correct fee submitted with transfer application form. (Fee schedule is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-9.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☒ #2a Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. **
- ☐ ☒ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s). **
** Additional fee(s) required for water right ownership changes; see fee schedule.
- ☒ ☐ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☒ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/resources.htm.
- ☒ ☐ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☒ ☐ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use.
- ☒ ☐ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see fee schedule.
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☐ #9 Other. Please describe: _____

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:
The current diversions will not change. The wells and measuring devices are already in place and functioning. Any additional water or piping will be installed after these existing devices.

- b. Who owns the property at the point(s) of diversion? Sun View Dairy
If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:
Ed Degroot is an owner manager for Sun View Dairy

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
If yes, ☒ Attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it Attachment #6. List the name of the entity and type of lien: Rabo Bank - Mortgage

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:
The land will be dried up and corrals will be built in the place thereof. This transfer will provide additional volume to the stock and commercial rights of the dairy. There is currently sufficient flow for the dairy use in the existing right. Therefore the flow of the irrigation right is left with irrigation.
- e. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:
There are two other irrigation rights that cover a larger place of use for irrigation. The remaining place of use and points of diversion will not change for these rights.

- f. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- ☐ ☒ undergone a period of five or more consecutive years of non-use,
☐ ☒ currently leased to the Water Supply Bank,
☐ ☒ currently used in a mitigation plan limiting the use of water under the right, or
☐ ☒ currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe:

APPLICATION FOR TRANSFER OF WATER RIGHT PART 2

A. DESCRIPTION OF RIGHT(S) AS RECORDED

For each water right listed in Part 1B.1 of the application, attach a **Part 2A** report obtained from any Department office or from the Department's website @ www.idwr.idaho.gov, Water Right Transfers, Step 1.

Insert Part 2A reports into the application following Part 1.

B. IF ONLY A PORTION OF THE RIGHT IS PROPOSED TO BE CHANGED, DESCRIBE THE PORTION BEING CHANGED AS IT APPEARS BEFORE THE REQUESTED CHANGES

- ☐ Complete and attach one copy of Part 2B for each right for which only a portion is proposed to be changed. If the entire right is proposed to be changed, Part 2B is not applicable. Additional copies of the **Part 2B** form can be obtained from any Department office or from the Department's website @ www.idwr.idaho.gov, Water Right Transfers, Step 3, or Water Right Forms, Changes in Use. Insert completed Part 2B forms into the application following Part 2A of the same water right.

transfer 80026

Conditions of Approval:

1. T07 The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
2. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
3. T19
4. 046 Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
Prior to use of water under this right, the right holder shall install a measuring device to the dairy mainline to measure the amount of water diverted to the dairy and shall annually report the diversion to the department. The right holder shall obtain prior approval from the department of the type of measuring device to install.
5. 067 After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.
6. 01M
7. 082 Prior to the diversion and use of water under this approval, the right holder shall comply with applicable county zoning and use ordinances.
8. 106 Prior to the diversion and use of water under this approval, the right holder shall comply with applicable water quality standards of the Department of Environmental Quality.
The period of use for the irrigation described in this approval may be extended to a beginning date of 3/15 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/31 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.
9. X61
10. X27 This right is limited to the irrigation of 60 acres within the place of use described above in a single irrigation season.
11. X35 Rights 61-2186, 61-2220 and 61-7060 when combined shall not exceed the irrigation of 700 acres within the place of use described above in a single irrigation season.
12. X63 All water rights within Basin 61 are from connected sources of water in the Snake River Basin and shall be administered conjunctively.
13. R64 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.
14. Commercial use is for a dairy.
15. F06 The following rights are diverted through points of diversion described above: 61-2186, 61-2220, 61-7060, 61-7222.

References:

Cattle drinking requirements were calculated using published information from industry accepted sources or from table data. Typically the highest use estimate is reported with the corresponding source of information. In some cases the designer will override the source values. In those cases an overridden value may include an explanation for the override.

The following sources were evaluated for the milking and dry cow herds.

- Fresh Water Needs for Dairy Farms, Dean Faulk U of I Extension Specialist
- Water Intake and Quality for Dairy Cattle, Richard S. Adams & William E. Sharpe, Department of Dairy and Animal Science, Pennsylvania State University
- Modified Kertz Equation, A.F. Kertz, Ralston Purina Company
- Water Partitioning and Intake Prediction in Dry and Lactating Holstein Cows, J. B. Holler & W.E. Urban Jr., Journal of Dairy Science 1992

The following sources were evaluated for animals other than milking and dry cows.

- Fresh Water Needs for Dairy Farms, Dean Faulk U of I Extension Specialist
- Water Intake and Quality for Dairy Cattle, Richard S. Adams & William E. Sharpe, Department of Dairy and Animal Science, Pennsylvania State University
- Water Requirements of Livestock, Daniel Ward & Kevin McKague, Ministry of Agriculture Food & Rural Affairs, May 2007

^g Mean of the highest/lowest 15-day period average in month

^h Mean of the highest/lowest 7-day period average in month

ⁱ Mean of the highest/lowest 3-day period average in month

^j This value represents the *mean value* for the parameter for the month over the 'normal' period of record. Generally, the 'normal' period is the last thirty years with data.

^k This value represents the *standard deviation* for the parameter for the month over the 'normal' period.

^l This value represents the *value* for the parameter that has a 20% chance of being exceeded that month during any particular year. Conversely, there is an 80% chance that the parameter value will be less than the *value* shown.

^m This value represents the *value* for the parameter that has a 80% chance of being exceeded that month during any particular year. Conversely, there is an 20% chance that the parameter value will be less than the *value* shown.

ⁿ This value represents the *skewness (asymmetry) of the distribution of the parameter values* for the month (year) over the 'normal' period. A value near zero indicates that the distribution approximates a normal (Gaussian) and symmetrical distribution. A negative skew indicates that the parameter distribution has relatively few low values compared to high values. A positive skew indicates that the distribution has relatively few high values compared to the number of low values. A skew value near 1 indicates that the underlying distribution approximates a lognormal distribution.

^o This value represents the *kurtosis* of the parameter value distribution for the month (year) over the 'normal' period. Kurtosis is a measurement of the height to width ratio of the probability distribution, or the *peakedness (slenderness)*. A normal (Gaussian) distribution has a kurtosis of 3. A high kurtosis distribution has a sharper peak and longer tails, while a low kurtosis distribution has a more rounded peak and shorter tails.

This work and report were prepared by the University of Idaho Research and Extension Center at Kimberly, Idaho under contract with the Idaho Department of Water Resources. Work was supported by funding from IDWR and the Idaho Agricultural Experiment Station and Idaho Engineering Experiment Station. The authors gratefully acknowledge the long-term evapotranspiration data collection and long-standing advice provided by Dr. James L. Wright, USDA-ARS Kimberly (ret.), the more than two decades of high quality agricultural weather data collection by the U.S. Bureau of Reclamation AgriMet system, and the very long-standing, routine data collection by the hundreds of cooperative weather station volunteers across the state who, for more than one-hundred years, have faithfully observed daily air temperature and precipitation.

RE: Transfer No. 80026
Water Right No(s). 61-12270, 61-2186, 61-7222

Dear Applicant(s):

The Department of Water Resources has received your water right transfer application. Please refer to the transfer number referenced above in all future correspondence regarding this transfer.

A legal notice of the application has been prepared and is scheduled for publication in the MOUNTAIN HOME NEWS on 1/6/2016 and 1/13/2016. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the approval document.

Please contact this office if you have any questions regarding the application.

Sincerely,

Rachel Neely
Administrative Assistant

**NOTICE OF PROPOSED CHANGE OF WATER RIGHT
TRANSFER NO. 80026**

SUNVIEW DAIRY LLC, 6600 SW BLANKSMA RD, MOUNTAIN HOME, ID 83647; has filed Application No. 80026 for changes to the following water rights within ELMORE County(s): Right No(s). 61-12270, 61-2186, 61-7222; to see a full description of these rights and the proposed transfer, please see www.idwr.idaho.gov/apps/wr/QueryNewTransfers/QueryNewTransfers.aspx.

The transfer proposes to change the nature of use of 182.0 af for irrigation use authorized under 61-2186 to stockwater and commercial purposes for expansion of existing dairy. A change to the place of use will expand commercial/stockwater use under rights 61-2186, 61-7222 & 61-12270. The site is located within Elmore County, west of Hwy 51, 3.25 miles north of the Snake River.

Permits will be subject to all prior water rights. For additional information concerning the property location, contact Western Region office at 208-334-2190; or for a full description of the right(s) or proposed transfer (s) please see

www.idwr.idaho.gov/WaterManagement/WaterRights. Protests may be submitted based on the criteria of Idaho Code §§ 42-203A and 42-222. Any protest against the approval of the application(s) must be filed with the Director, Dept. of Water Resources, Western Region, 2735 Airport Way, Boise, ID 83705 together with a protest fee of \$25.00 for each application on or before 1/25/2016. The protestant must also send a copy of the protest to the applicant.

GARY SPACKMAN, Director

Published on 1/6/2016 and 1/13/2016

MEMORANDUM

TO: Transfer No. 80026
FROM: Patrick Kelly
DATE: December 29, 2015
RE: Evaluation of Application

The transfer proposes to change the nature of use of 182.0 af for irrigation use authorized under 61-2186 to stockwater and commercial purposes. A change to the place of use will expand commercial/stockwater use to the NE quarter of Township 5 South, Range 6 East, Section 7 under rights 61-2186, 61-7222 & 61-12270.

The site is located within Elmore County, west of Hwy 51, 3.25 miles north of the Snake River.

Contact person for the applicant is Representative Mathew Thompson at 1993 Tamarack Loop, Twin Falls, ID 83301, 208-731-8640.

Summary of Information Submitted

Authority to File:

Sunview Dairy (applicant) filed transfer application 80026 and is current owners to water right 61-2186, 61-7222 & 61-12270. The application was signed by a Ed DeGroot. Mr. DeGroot is listed as Member according to the ID SOS registry #W 34088.

Water Right Validity:

Recent beneficial use confirmed via 2015 aerial photography. Crop data submitted with transfer application. Right presumed to be valid.

Injury to Other Water Rights:

Water use in the area is limited to a few users in the region. The source use of water is remaining on Sunview Dairy land. No injury anticipated.

Enlargement of Use:

The 136.5 af of water proposed in transfer 80026 will be accounted for by drying up 45.5 acres of irrigation rights. 61-2186 carries a maximum consumptive use volume limit of 3.0 af/acre and 4.0 af/acre headgate limit. Department standards allow the consumptive use portion of a right to change a nature of use. The transfer application would move 136.5 af to commercial and stock leaving behind 58.0 af for irrigation use. This will maintain the irrigation consumptive limits of 3.0 af/acre on 14.5 acres. The total volume of water the water right will actually be reduced, since the maximum allowable headgate volume is being reduced to 14.5 acres. For ground water rights, a change to an increased period of use is presumed not to be an enlargement as long as there is no increase in rate or volume.

Local Public Interest:

Review staff has no information to suggest this application is inconsistent with the local public interest.

Beneficial Use/Conservation of Water Resources:

The application proposes beneficial use consistent with conservation of water resources in Idaho.

The application is consistent with criteria of I. C. § 42-222 and should be processed.

Additional Information/Analysis

Additional information was requested to complete Part 1 of the transfer application. A rate must be included in the transfer since original transfer application would increase the right owners' diversion rate per acre above the Department standard limit. A recommendation was also made to dry up 45.5 acres so that the volume per acre limit would remain intact. This information was requested on November 27, 2015 and received December 1, 2015.

A second request was made to change the irrigation POU and to include stockwater/commercial water right 61-7222 and 61-12270. Amended application page 3 was received December 29, 2015.

Discussion

The transfer proposes to convert 182.0 af of water from irrigation to commercial use from water right 61-2186 and to change to the place of use which will expand commercial/stockwater use to the NE quarter of Township 5 South, Range 6 East, Section 7 under rights 61-2186, 61-7222 & 61-12270. The face value of 61-2186 carries a limit of 240.0 af of water for irrigation purposes. This limit reflects the 4.0 af/acre headgate requirement for 60.0 acres. Nature of use changes require the *consumptive use* portion of the right available to move. In the case of 61-2186, the consumptive use value is 60.0 acres * 3.0 af/acre = 180.0 af.

Analysis completed by the representative shows that dairy operations require 476.4 afa. Active water rights 61-2186, 61-7222 & 61-12270 currently total a commercial/stockwater volume of 340.0 afa.

Mr. Thompson expressed a desire to combine the commercial and stockwater uses since the dairy has one measuring device that measures both of the uses combined. The stockwater and commercial uses were licensed independently from each other. For purposes of this dairy, the stockwater and commercial uses will both have 0.91 cfs and 136.5 af added to them from the irrigation use under 61-2186.

61-2186 has a pre transfer total diversion volume of 510.5 af. Because this transfer involves a nature of use from irrigation to commercial/stock, the headgate volume is being reduced by 45.5 af. Consequently, 61-2186 post transfer will have a total diversion volume of 465.0 af. However, the total diversion rate will remain the same with a total volume of 465.0 af to prevent any enlargement.

61-2220 & 61-7060 are overlapping irrigation rights owned by Sunview Dairy. The combined use limit of 700.0 acres is additive, but were brought into the transfer data entry to reflect changes to combined use limits of 61-2186. The new combined use limit will then be 654.5 acres within an 920.0 acre PPU.

SRBA status shows the right was decreed 10/26/2000. The rights were migrated from adjudication to water rights prior to the processing of transfer 80026. No further action is required.

The right is not involved with a lease/rental from the Water Supply Bank.

Condition 046 N/A since a new well is not proposed. A condition will be added to 61-2186 to describe the combined limit of stockwater and commercial use.

Summary

Assuming protests are not filed and/or other information does not contradict the above analysis, the application can be approved as reflected by the draft approval.

December 1, 2015

Water Resource Agent
Patrick Kelly
1341 Fillmore Street, Suite 200
Twin Falls, ID 83301

Dear: Agent,

Attached is modifications for water transfer 80026 for Sun View Dairy to transfer irrigation water to stock and commercial use for an expanding dairy farm. The property is T5S R6E SE1/4NE1/4 section 7. There is one water right being affected as part of this transfer. The water right is 61-2186.

I wasn't aware of the 3 acft/ac limit for consumptive use allowable for a water transfer application. This was the first time I had to deal with this limit. So attached is modified part 1 and part 2 of the application which shows the before and after conditions of the proposed water transfer application. I have also included a modified Attachment 8A which includes the calculations for the change.

The application proposes to dry up 45.5 acres of irrigation right #61-2186 to prevent enlargement. This would provide 0.91 cfs and 136.5 acft for the dairy operation. The flow is a proportionate rate due to the irrigation ground currently having the maximum allowable rate.

The acres required were determined using the Precipitation Deficit ET chart for Mt. Home for alfalfa. FSA report and tract map for the location in question are included in this packet. These items and the calculations for the dairy water requirements and transfer calculations are included in Attachment #8a. The precipitation deficit for alfalfa in Mt. Home is 936 mm or 3.07 acft/acre. Since this volume is above the maximum allowable diversion rate of 3.0 acft/acre the maximum allowable will be used or 3 acft/acre for the calculations.

These actions would result in the following rights:

61-2186	0.91 cfs	136.5 acft	stock and commercial water
61-2186	0.29 cfs	58 acft	Irrigation

There are no new points of diversion for this application. The existing points of diversion and connection and metering device will remain unchanged. This additional water will simply be added to that system for future use. The final water right may look like the following.

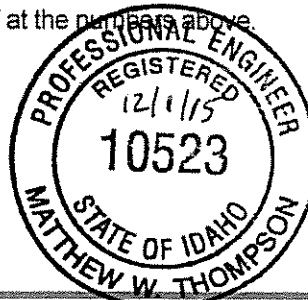

61-2186	2.87 cfs - 1285.7 gpm	407 acft	stock and commercial water
61-2186	0.29 cfs - 129.9 gpm	58 acft	Irrigation

Any questions or comments can be directed to myself at the numbers above.

Sincerely,

A handwritten signature in black ink, appearing to read 'Matthew W. Thompson'.

RE: Additional Information Request for Transfer 80024

Dear Applicant:

On April 17, 2015, you filed a transfer application to move irrigation water authorized under water right 61-2186 to stock and commercial use. The transfer application proposes to move 136.4 af from water right 61-2186 and does not propose to include a diversion rate. The diversion rate of 1.2 cfs allows the maximum inch per acre standard on 60.0 acres. By not moving the appropriate diversion rate with the dried up acres, you would be increasing the rate per acre to an unacceptable level. The transfer application must propose to move 0.02 cfs for every irrigation acre you intend to give up.

If possible, another recommendation is to dry up 45.5 acres instead of the 45.0 acres in the original transfer application. By giving up 45.0 acres, you would leave behind a consumptive use limit of 2.9 af/acre and headgate limit of 3.9 af/acre associated with the irrigation component of the right. By giving up an additional 0.5 acres, you maintain a maximum volume per acre limit consistent with this right and other irrigation rights 61-2220 and 61-7060.

Review, Part 1 of the transfer application. Please amend the application to include a diversion rate consistent with the amount of acres being kept. The irrigation component of the right should also be identified to reflect *after* the requested changes are made (both on #1 & #4).

Please submit the amended transfer for the application to be processed. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. The application will be voided without a timely written reply within the next thirty (30) days. Refunds are not issued for voided applications.

IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please contact me at 208-334-2190 if you need more information. Thank you for your attention to these matters.

DEPT. OF WATER RESOURCES
SOUTHERN REGION

Dear: Agent,

Attached is a water transfer for Sun View Dairy to transfer irrigation water to stock and commercial use for an expanding dairy farm. The property is T5S R6E SE1/4NE1/4 section 7. There is one water right being affected as part of this transfer. The water right is 61-2186. Water Right 61-2186 has irrigation, stock and commercial rights as part of this right. This transfer will convert a portion of the existing irrigation right to stock and commercial use.

The application proposes to dry up 45 acres of irrigation right #61-2186 to prevent enlargement. This would provide 0 cfs and 136.4 acft for the dairy operation. The flow is a disproportionate rate due to the dairy operating for 12 months of the year. The existing flow allotment for the dairy operation is more than adequate for the stock and commercial needs of the dairy operation. This transfer is intended to provide additional volume to the stock and commercial rights. The flow will remain with the irrigation right to best serve the needs of the irrigation system. Attachment #7b shows the location of the acres that will be dried to accommodate the transfer.

The acres required were determined using the Precipitation Deficit ET chart for Mt. Home for alfalfa. FSA report and tract map for the location in question are included in this packet. These items and the calculations for the dairy water requirements and transfer calculations are included in Attachment #8a. The precipitation deficit for alfalfa in Mt. Home is 936 mm or 3.07 acft/acre.

These actions would result in the following rights:

61-2186	0 cfs	136.4 acft	stock and commercial water
61-2186	1.2 cfs	60 acft	Irrigation

There are no new points of diversion for this application. The existing points of diversion and connection and metering device will remain unchanged. This additional water will simply be added to that system for future use. The final water right may look like the following.

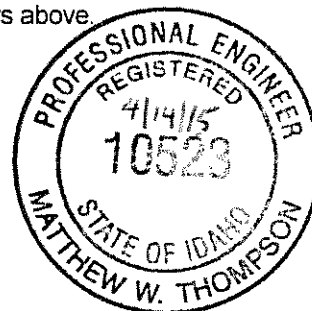

61-2186	1.96 cfs	406.9 acft	stock and commercial water
61-2186	1.2 cfs	60 acft	Irrigation

Any questions or comments can be directed to myself at the numbers above.

Sincerely,

Matthew W Thompson, PE
Owner, AgTec
