2. Source of water supply Existing Well Groundwater which is a tributary of _____
3. Location of point(s) of diversion:

TWP	RGE	SEC	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
27N	01E	10	~~8~~		NE	SE	Idaho	Well	Lindsey Landing

4. Water will be used for the following purposes:
- Amount 18 gpm acfs for domestic purposes from 1/1 to 12/31 (both dates inclusive)
(cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)

5. Total quantity to be appropriated is (a) 18 gpm 1.02 cfs cubic feet per second (cfs) and/or (b) _____ acre feet per year (af).

6. Proposed diverting works:
- a. Describe type and size of devices used to divert water from the source. 1 hp pump 6 inch casing 60 feet deep 1 1/4 line from well to property
- b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11. For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☒ No
- c. Proposed well diameter is 6 inches; proposed depth of well is 60 feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No
- e. If well is already drilled, when? 1999 5/11/15; drilling firm Uhlenkott Cottonwood ID; well was drilled for (well owner) No Walter E. Lindsey; Drilling Permit No. _____

7. Description of proposed uses (if irrigation only, go to item 8):
- a. Hydropower; show total feet of head and proposed capacity in kW. _____
- b. Stockwatering; list number and kind of livestock. _____
- c. Municipal; complete and attach the [Municipal Water Right Application Checklist](#).
- d. Domestic; show number of households 1
- e. Other; describe fully. _____

8. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS

Application for Permit No. 79-14262

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the IDAHO COUNTY FREE PRESS on 1/6/2016 and 1/13/2016. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

A handwritten signature in black ink, appearing to be 'Rachel Neely', written over a horizontal line.

This application proposes the diversion and use of water tributary to a federally designated Wild & Scenic River. The decreed minimum stream flow rights for the federal Wild & Scenic Rivers are subordinate to certain categories of water use and to specific amounts of water use established after the minimum stream flow. The water use proposed in this application will benefit from the subordination provision because it is for domestic use.

RE: Application for Permit 79-14262 in Salmon and Clearwater River Basins

Dear Applicant(s),

This letter is in regards to your Application for Permit 79-14262 which requests ground water near the Salmon River. Additional information is needed to further process your request.

You are applying for water that is within the Salmon River and Clearwater River drainages. Because the waters of these river drainages are habitat for fish species listed as endangered or threatened under the federal Endangered Species Act, caution is necessary to ensure that new appropriations of water do not undermine efforts to protect and restore the ESA listed fish species and other public values for rivers and streams. IDWR is, therefore, requiring applicants to submit additional information required by Rules 40.05.g, local public interest.

Rule 40.05 g requests information relative to conflict with the local public interest, section 42-203A(5)(e), Idaho Code, and shall be submitted as follows:

The applicant shall seek comment and shall submit all letters of comment on the effects of the construction and operation of the proposed project from the Idaho Department of Fish and Game and the Idaho Department of Environmental Quality.

The following state agency representatives will help you respond to the local public interest requirement of Rule 40.05.g. IDWR must receive written comments from both of those agencies.

Idaho Department of Fish & Game contact list for water right applications:

Panhandle Region:	Mary Terra-Berns at 208-769-1414
Clearwater Region:	Ray Hennekey at 208-799-5010
McCall Subregion:	Dale Allen at 208-634-8137
Salmon Region:	Tom Curet at 208-756-2271
Southwest Region:	Rick Ward at 208-465-8465

Idaho Department of Environmental Quality contact list for water right applications:

Lewiston:	Cindy Barrett at 208-799-4370 (Clearwater or lower Salmon River basins)
Boise:	Josh Schultz at 208-373-0550 (South Fork Salmon River basin)
Idaho Falls:	Troy Saffle at 528-2650 (Upper Salmon, Lemhi, Pahsimeroi basins)

In addition to the written comments from IDFG and DEQ, the Department requires clarification on a number of sections of your application form.

1. Source of water supply was supplied incorrectly. Please change section two of your application to read "ground water" instead of "existing well."
2. The location of the point of diversion is unclear. Section three (3) of your application shows the POD in the SESE corner in government lot eight (8). Based on the well driller log associated with the information provided on your application, the existing well is in NESE corner. Please review the attached aerial map and either confirm or amend your point of diversion description in section three of the application. Also, do any others use this well for irrigation?
3. The quantity was not provided correctly.
 - a. Based on your narrative and the described place of use, it appears that you would like this water permit to include three (3) acres of irrigation from ground water. The Department's standard diversion rate for irrigation for places of use totaling less than five (5) acres is 0.03 cfs per acre. This means you are allowed to apply for 0.09 cfs for irrigation. Please add this amount for "irrigation" to part four of your application. The standard irrigation season for your area is 3/15 to 10/31.
 - b. The described quantity of water for domestic use is incorrect. The amount of water to be diverted should be described in cubic feet per second. The standard amount of water allocated for domestic use is 0.04 cfs for internal domestic uses along with half an acre of lawn and garden. The standard amount of water allocated for solely internal use (not including the lawn and garden) is 0.02 cfs. You are applying for three (3) acres of irrigation, so I would suggest amending your domestic diversion rate to the lesser 0.02 cfs, because the lawn and garden portion will be covered by the irrigation rate.
 - c. Please amend section five (5) of your application to read the new total quantity of water to be appropriated. 0.09 cfs of irrigation water and 0.02 cfs of domestic water would equal a total of 0.11 cfs water diverted. If you are not planning on irrigating your acreage with ground water, please change section five (5) to read 0.04 cfs and remove the 3.0 acres from your description of place of use in section 8.
4. The included map is unclear. Please review the attached map and confirm the location of the existing well. If it is incorrect, please mark on the map where the well is actually located. Also, please confirm the place of use. The shape on the map is based on the tax lot data from 4/21/15. Outline where you will use the domestic water and where you plan on irrigating if you choose to do so.

Please submit the comment letters and requested information for the application to be processed. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. The application will be voided without a timely written reply within the next sixty (60) days. Refunds are not issued for voided applications. IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please contact me at 208-334-2190 if you need more information or have any questions. Thank you for your attention to these matters.

Sincerely,

Danie Merriman

Subject: Well log for well drilled in 1989
Attachments: 3vgf01_.pdf

This is the well log I found while talking with you on the telephone this morning. I will put a copy in your application file so you do not need to send it back with your application. Thanks for your attention to this matter.
Sincerely,

KAY WALKER
Sr. Water Resource Agent
334-2190

Mr. Lindsey has made
changes to his app.
and will re-submit.

Re: Water Right Application Incomplete - Returned

Dear Applicant:

This office received your application on March 24, 2015. The application cannot be accepted into the records of the Idaho Department of Water Resources (IDWR) until the following items are addressed:

- Point of Diversion(s) was not provided correctly- please include the 40 acre-tract description of where your well is located. Based on your included map, this may be the SE quarter of the SE quarter.
- Period of Time to complete the project works was not provided correctly- if your project is already complete you should change section 12 to read 1 year, the minimum amount of time required to be listed.

The original incomplete application is enclosed. Please make the necessary amendments to the original form and re-submit within the next thirty (30) days. If IDWR does not receive your written response within thirty (30) days, a refund will be issued for this filing. IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please consult the IDWR website or contact this office at 208-334-2190 and ask for the "office day person" if you have any questions about the necessary information or fee.

Sincerely,

Western Region Water Rights Staff
