10. Remarks:

Application is for an existing well located in section 22 according to Moon and Associates recent survey.

This is the same well that serves as a point of diversion for 43-2531. We believe water from the well flows at a temperature of approximately 86 degrees. Application filed to record domestic, heating and

stockwater uses that have occurred since the late 1970s. Recreation use is for a proposed swimming

pool. (no more than 20 ft. X 20 ft.) After use, the water runs in an open channel where it sinks back into

the aquifer. If needed we can inject the used water back into an existing domestic well on the property.

Well develops artesian flow when not being pumped for irrigation use. This artesian flow is what we are

filing on for this application. Two pipes from the well serve this development. One pipe leads to the home and garage and the other pipe leads to the barn. The domestic use and the stockwater use occurs after the heating of the home and the barn. Stockwater use is the water that leaves the barn. The total flow of 0.09 cfs reflects a recent measurement of flow from the well.

11. Map of proposed point of diversion and place of use attached? ☐

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.
