Scott,

Per our conversation this transfer is good to go forward despite the fact that these rights are leased into the Bank. Just a few things the customer should keep in mind...as you are aware:

- The lease is good thru 2018
- The water right is currently being rented by a third party thru 2015
- If the customer wants to use the water in 2016, he can but he will need to submit a release request ASAP
  - If someone else rents these water rights in the meantime for 2016, the customer will be out of luck
- He can submit another lease application to the bank if he wants to put the un-transferred portion of those rights back into the bank. (filing fee \$500)

That's all I have. Thanks for the opportunity to comment.

Cherie

Hi Cherie,

The following transfers are moving two water rights that are currently leased to the water supply bank.

Transfers:

80079  
80087  
80097  
80105

They are all by the same applicant and all 4 transfers are transferring a portion of two water rights (31-10964A and 31-7267A)

The total acres proposed between the 4 transfers is 34.6 acres. Remaining portion will be 18.4 acres.

It's kind of a complicated transfer so if you have any questions feel free to contact me.

Thanks,
