WATER RIGHT NO. 63-31832

As Modified by Transfer No. 79285

CONDITIONS OF APPROVAL

9. This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and preceding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and preceding to the earliest, shall be reduced to 60 percent of their decreed quantities.
10. The portion of Right 63-31832 used for conveyance losses is 5.94 cfs.

Transfer 66743 authorizes the diversion of water in the amount of 0.54 cfs and 14.5 af for uses associated with irrigation and a pond constructed in an earlier development phase of the City of Boise's Optimist Park just east of the pond for which this approval (Transfer 73768) proposes mitigation.
12. Transfer 73768 authorizes the diversion of water in the amount of 0.03 cfs and 6.0 af to be used for replacement of losses caused by evaporation from a 1.7 acre surface area pond authorized for aesthetic storage, wildlife storage, recreation storage, and municipal storage under right 63-32146.

15. This right mitigates for the depletion of water resulting from the diversion and use of water under Right 63-34031. To prevent injury to other water right holders, the right holder shall divert 0.05 cfs of this right but shall return that amount of water unused to the Boise River within the NENW, Section 17, T04N, R01E.

If the mitigation portion of this right is used for any purpose other than conveyance loss, then water shall not be diverted under Right 63-34031. If the mitigation portion of this right is not deliverable due to a shortage of water or a priority call, then the amount of water authorized for diversion under the use of Right 63-34031 that is being mitigated shall be reduced by the same proportion as the reduction to this right.

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

MEMORANDUM

Date: December 9, 2015
To: Transfer 79285
From: Nick Van Dyke
Re: Review & Evaluation of Sufficiency of Information

Transfer No. 79285 was filed to add a point of diversion to water right no. 63-9718, new diversion located in Gov Lt 5 SWSW Sec 24 Twp 04N 01E. The transfer filing was also used as a mechanism to convert a 0.32 cfs/16 acre portion of Boise Valley Irrigation Ditch Company (BVIDC) right no. 63-31832 to mitigate for continued diversion of right nos. 63-9718 and 63-9751 when those rights fall out of priority. There is no physical change to the diversion works for right no. 63-9751 - it is included as an associated right for the mitigation coverage. Only 0.33 cfs of the total 6.42 authorized under the rights is being transferred. The transferred rate is based off the pumping capacity at the new diversion point. Note after staff discussion, it was decided the new point of diversion would be considered a Boise River water source due to its proximity to the river.

Authority to File: Richard Thorpe, president of Riverside Village Home Owners Association, Inc signed the application.

Water Right Validity: All three rights were decreed in the SRBA. No evidence of forfeiture found.

Injury to Other Water Rights: None anticipated.

Enlargement of Use: No issues identified. An appropriate amount of BVIDC's right will remain undiverted as per agreement (dated 3/13/2014, in file) between applicant and BVIDC during times 63-9718 and 63-9751 fall out of priority.

Local Public interest: No issues identified.

Beneficial Use/Conservation of Water Resources:

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
