MEMORANDUM

Date: December 1, 2015
To: Transfer 80537 File
From: Corey Skinner
Re: Evaluation of Sufficiency of Information Submitted

Application proposes converting a 1.0 acre (0.04 cfs) portion of an East Fork Wood River irrigation right, 37-387D, to aesthetic storage use associated with two existing ponds on property located approximately 8.0 miles north and 2.3 miles east of the center of Hailey. The total estimated storage volume for the two ponds is 0.75 acre-feet with an additional 0.41 acre-feet estimated to evaporate from the ponds. The application proposes converting 1.0 acre of irrigation to storage use. Based on pasture grass in the Hailey area, this 1.0 acre would provide 2.1 acre-feet for potential storage use. The water right involved with the application is diverted within Water District 37, so water master comments will be solicited.

- **Authority to File:**
The transfer applicants are listed as the current owners of the right involved with the transfer according to IDWR records. Both parties signed the application.
- **Water Right Validity:**
The right involved with the transfer was decreed in the SRBA in September of 2011. Possible forfeiture of the right does not appear to be an issue.
- **Injury to Other Water Rights:**
None anticipated.
- **Enlargement of Use:**
None anticipated. Using precipitation deficit value in the change in nature of use conversion potentially results in less overall diversion volume after the transfer.
- **Local Public Interest:**
No issues anticipated. The application will be subject to public notice and protest.
- **Beneficial Use/Conservation of Water Resources:**
Proposed uses are recognized as beneficial uses of water.
- **Effect on Economy of the Local Area:**
None anticipated.
- **Effect of the Agricultural Base of the Local Area:**
None anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

MEMORANDUM

TO: Transfer # 80537 File

FROM: Corey Skinner

DATE: November 30, 2015

SUBJECT: Filing Fee

The filing fee, \$450.00, for this transfer is based on the total amount of water being transferred, 0.04 cfs plus the change in nature of use fee. The transfer fee schedule for a transfer involving 0.00 – 0.20 cfs indicates that the filing fee is \$200.00. When the \$250.00 change in nature of use fee is added, the total filing fee is \$450.00. Note that Brockway Engineering actually paid \$500.00 for this transfer (see receipt S035126). On this day, IDWR fiscal section was notified so that a refund of \$50.00 could be issued.

Re: Karen and Ray Barshick Water Right 37-387D

Dear Mr. Merritt:

The Barshick's are proposing transfer 1.0 acres of irrigation from water right 37-387D to mitigation for evaporation, irrigation storage and aesthetic storage for two existing ponds. The ponds have historically been used for irrigation storage and aesthetics.

The current irrigation system pumps irrigation water directly out of the ponds to the system. Attached to this letter are several photographs documenting the existing irrigation system.

The point of diversion and ownership of this water right will not be changing with this transfer.

The ponds require 0.55 acres of irrigation ground to be dried up to offset the volume require for the ponds. However, IDWR requires a minimum of 1.0 acres for a transfer.

Please contact me if you have any questions.

Sincerely,

Greg Sullivan, M.S., Engineer
