*Dave,
I just received a copy of the "Application for Permit" for Albert Coulter, Number 65-23620-. Upon reviewing the permit I read the description where it identifies the type of construction the well is proposed to be drilled. Unfortunately, construction of this type is for monitoring wells and is not permitted for water supply wells. The well mentioned will have to be minum 4 inches, cased with HDR-21 plastic pipe or steel casing with a well seal depth of at least 18 feet for a well less than 50 feet in depth. If plastic is used there will have to be a protective steel casing set over top the plastic casing at the surface. Additionally, a licenced driller in the state of idaho will have to drill this well.*

If you have any question please contact me.

Good Morning, or maybe I should say "Hafa Adail", the greeting here in Chamorro. Kind of like "Aloha" in Hawaii.

Thank you for the update on Buzz's water right. My copy probably arrived at my office in Boise but hasn't been forwarded to me yet.

We will proceed to install the well in accordance with the conditions of the permit in the near future.

Thanks again for all your help. We appreciate being able to return Mr. Coulter's many favors over the years.

All the best,

Dave

Dave,

Good afternoon! Mr. Coulter's permit 65-23620 was approved 11/18 and mailed out to Mr. Coulter with a copy to you on 11/19. If you do not receive your copy in the mail, let me know and I can email you a copy.

Regards,

Angie

Hi Angie,

I dropped off a water right application for Buzz Coulter in Horseshoe Bend before I left for my present assignment in Guam. I will probably return to Boise in April of 2016. I am a consultant to the Horseshoe Bend Hydroelectric Company and Buzz has been particularly helpful to us over the years, so we are pursuing the water right as a return favor for him.

Last I heard was the announcement of the application in the newspaper, but have not heard anything else since then. Can you please give me an update on the status of that application? If anything further needs to be done, I can arrange for the operators at the hydro project to take care of it.

The best way to reach me is at this email address until I return to Boise.

Thank you for all your help with this application.

All the best,

Dave O'Day
