<u>Measurement Equipment</u>	<u>Type</u>	<u>Make</u>	<u>Model No.</u>	<u>Serial No.</u>	<u>Size</u>	<u>Calib. Date</u>
Fuji Portaflow	Ultrasonic	Fuji	91012	00FY099T		04/2013

2. Measurements:

Well #1 July 8, 2013 highest reading	2823 gal/min	Well #2 July 8, 2013 highest reading	1934 gal/min
Sept 25, 1996 WMIS	2211 gal/min	Sept 25, 1996 WMIS	2211 gal/min
	$2823/448.83 = 6.29 \text{ cfs}$		$2211/448.83 = 4.93 \text{ cfs}$

Well #3 July 8, 2013 highest reading	263.4 gal/min	Well #4 No Reading	
Sept 25, 1996 WMIS	483.0 gal/min	Sept 25, 1996 WMIS	116 gal/min
	$483/448.83 = 1.08 \text{ cfs}$		$116/448.83 = 0.26 \text{ cfs}$

*** $6.29 \text{ cfs} + 4.93 \text{ cfs} + 1.08 \text{ cfs} + 0.26 \text{ cfs} = 12.56 \text{ cfs} - 5.97 \text{ cfs (decreed)} = 6.59 \text{ cfs}$ ***

Since priorities are identical, rate should be split proportionately between 29-7636 and 29-7637 based on acres. (total = 932 [852+80])

29-7636 = $80/932 \times 6.59 = 0.57 \text{ cfs}$ 29-7637 = $852/932 \times 6.59 = 6.02 \text{ cfs}$ **E. FLOW CALCULATIONS**

Measured Method:

____ Additional Computation Sheets Attached

F. VOLUME CALCULATIONS**1. Volume Calculations for Irrigation:**

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 80 \times 3.5 = 280 \text{ AF}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation season}) \times 1.9835 = 0.57 \times 214 \times 1.9835 = 241.95 \text{ AF} = 242.0 \text{ AF}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 242.0 \text{ AF}$$

2. Volume Calculations for Other Uses: NONE**G. NARRATIVE/REMARKS/COMMENTS**

This farm is currently operating 3 wells and co-mingling surface water to facilitate the irrigation of 1652 with pivots and wheel lines, the wells and irrigation system are all interconnected. While on site, Mont Layton stated that no surface water was used to irrigate this property, and well #4 was no longer in operation (WMIS #420035). While researching the back-file on these water rights it was found that there was a possibility of surface water inter-connection. Correspondence was exchanged with Bruce Larson (Attorney for Rigby) and Susan Rigby (Dtr of Don) verifying that surface water is co-mingled with ground water and there is no operational well located in T08S, 40E, Sec 16 NWSE quarter. However, during the 1996 measurements well #4 was operational and in an effort to give the applicant the best possible diversion rate this well was included in the flow information. An assignment of Permit was submitted to the Department on November 20, 2013 updating the ownership of this right. A transfer application will be submitted by the new owner to correct the place of use and points of diversion of two decreed water rights 29-7001 & 29-10171 to accurately show how these water rights were developed.

Have conditions of permit approval been met? ☒ Yes ☐ No
