B. OVERLAP REVIEW

1. Other water rights with the same place of use: Overlap? ☐ Yes ☒ No

Water Right No.	Source	Purpose of Use	Basis

Comments: No direct overlaps with the Place of Use. Other water rights in the two QQ's that the property is located on are described in the attached overlap analysis.

2. Other water rights with the same point of diversion: Overlap? ☒ Yes ☐ No

Water Right No.	Source	Purpose of Use	Basis
95-4715	Spring	Domestic	Statutory Claim

Comments: Water right 95-4715 is from a Statutory Claim stating that three homes along with one adjacent home share this POD. Water right 95-14435 is the adjacent home mentioned in the claim. There are no other water rights with a spring on the two QQs however there is one permit (95-15105) that lists a spring as a source but that spring is to the north of this permit.

E. FLOW CALCULATIONS

☐ Additional Computation Sheets Attached

-Alice Faye Woodbury, who is now deceased, was the owner of the land when this application for permit was submitted. Alice Woodbury protested the application as she stated the spring serves three other homes and only produces 0.04 cfs. The protest was eventually withdrawn. Using this flow information, it can be assumed that if the three other users of the spring are not using the water, the spring should be able to deliver 0.04 cfs to the permit holder.

Standard = 0.04 cfs

Permit allowed = 0.04 cfs

License recommended for 0.04 cfs.

F. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = \text{N/A}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation season}) \times 1.9835 = \text{N/A}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = \underline{\hspace{2cm}}$$

Volume Calculations for Other Uses: N/A

This is a domestic use. According to processing memo #22, Domestic use for in-house and yard irrigation can have up to 1.2 Acre feet of annual water use. I am recommending 1.2 AF for this permit

H. NARRATIVE/REMARKS/COMMENTS

Permit 95-14435 is an authorized diversion of 0.04 cfs from a spring for domestic use. Based on the small quantity of water permitted, this permit qualifies for an in-office field exam.

This permit shares a spring with a collection box and has 1300' of pipeline that crosses under Hwy 5. The applicant has an submitted permission from the State Highway department for the buried pipe under the road. The applicant has also submitted a General Easement Agreement between Bessie Cordle (personal representative for the estate of Alice Faye Woodbury) for access to the spring and associated water diversion equipment.

During the application process for this permit, Alice Woodbury protested the permit stating that the spring only produced 0.04 cfs and the spring served as a water source for three other homes. This statement was used in determining the flow of this permit. It should also be noted that NIA claim of water right 95-4715 was originally for four homes from this spring. Adjudication staff members Eric Davis and Craig Saxton discussed the claim and only recommended three homes as the fourth home originally claimed is the house associated with this property.

Conditions

All three conditions of the permit (004, X01, and 187) should be carried over to the license.

Condition F06 was added as the point of diversion is shared with three other users under water right 95-4715 as stated by Alice Faye Woodbury, the owner of the property the spring is on.
