Mitchel Tain came into the Western Regional office on November 3, 2015, to discuss the submittal of his Statement of Completion for Submitting Beneficial Use for Permit No. 63-12153.

Mr. Tain submitted beneficial use on September 16, 2015, for .1338 cfs with a \$50 filing fee. Mr. Tain then received notification from the Department that he must submit an additional \$50 filing fee because he was permitted to use .4 cfs.

Mr. Tain explained that he has at least attempted to irrigate all 20 acres as permitted and that his well only produces a rate of .1338 cfs and will not produce a rate of .4 cfs. I informed him that his beneficial use statement along with the filing fee of \$50 was acceptable, however, if at licensing the rate is found to be greater than .20 cfs he would have to pay an additional filing fee.

Angie,

Will you send me a short email summarizing your visit with Mr. Tain regarding the examination fee paid for Permit 63-12153? I am most interested in documenting that the fee was intentional because only 1/3 of the permitted irrigation has been developed.

Thanks.

Shelley
