PROOF DEFICIENCY LETTER

RE: Permit No. 37-22545 for Heating & Cooling

Dear Permit Holder(s):

The Department received your Statement of Completion for submitting proof of beneficial use ("proof"), filed for the above referenced water right permit. **You have not complied fully with condition no. 9 of the permit.** The proof form you submitted is considered incomplete or deficient unless you have complied with this condition of the permit.

Condition no. 9 of this permit:

Prior to diversion under this right the right holder shall submit to the Department for review and approval a ground water level and water use monitoring plan which includes the following:

- *A plan for gathering baseline water level measurements near the diversion and injection sites.*
- *A plan and schedule for recording and reporting water use and water levels once diversion and use has commenced.*

Monitoring and recording shall occur for a sufficient period of time to demonstrate that the reinjection of ground water diverted under this right prevents injury to existing water rights.

On approval of the monitoring plan by the Department, the right holder shall install all necessary measuring and monitoring equipment specified by the approved plan.

The Department retains jurisdiction to adjust the monitoring plan (including but not limited to increasing or decreasing the period of monitoring). The Department also retains jurisdiction to require the right holder to reduce using water, ceasing using water, or provide mitigation to avoid injury to existing water rights.

The right holder assumes all risk of injury to existing water rights or property as a result of this use including injection of water back into the aquifer.

The proposed monitoring plan submitted by Christian R. Petrich of SPF Water Engineering with the previous Extension of Time ("extension") request for this permit to address this condition has been reviewed by Ashley Newbry, Associate Engineer for the Department. Her review memo has been enclosed for your reference. While the majority of the reporting proposal is acceptable the information submitted for a short monitoring time with the proof is insufficient.

The recommendation supports consideration of another extension request to allow specific monitoring and collection of data for an additional five years to sufficiently meet the permit condition requirements and allow this right to be licensed in the future.

Please substitute a completed extension request for the proof submitted. Forms can be found on our public website at <http://idwr.idaho.gov/forms/water-rights.html#beneficial-use> . The proof form and a refund of \$275.00 will be returned when the extension is received.

This is a time sensitive process and I recommend you take immediate action to resolve and maintain the status of your permit. I will hold this permit from processing for 10 days to allow you to submit the necessary extension request. Please contact me at (208) 287-4951, if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads "Pamela Skaggs".

Pamela Skaggs
Water Rights Supervisor
