RE: Additional Information Required for Application for Permit 63-34062

Dear Mr. & Mrs. Reynolds,

On July 17, 2015, you filed an amended application for permit to appropriate water for irrigation and domestic use in the NE¼ SE¼ of Section 26, Township 3 North, Range 1 East of Ada County. A part of the advertising process is publicly announcing the water bearing zone which you plan to appropriate ground water from. This information was not included on the application, and attempts to reach you by phone have been unsuccessful. After reviewing the Well Drillers Report (attached) of your well, it appears the well is sealed to 44 ft, with water bearing formations from 113 to 193 ft. While there are clay layers between these zones, the act of drilling the hole creates an annular space within which water may travel down the side of the casing and into the bottom of the well. I would suggest a conservative water bearing zone of 113 to 193 ft for your well.

Please review the information I have provided. Once your proposed water bearing zone is received, the application will be processed. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. The application will be voided without a timely written reply within the next thirty (30) days. Refunds are not issued for voided applications.

IDWR forms and other information are available on the Internet at www.idwr.idaho.gov.

Please contact me at 208-334-2190 if you need more information. Thank you for your attention to these matters.

Respectfully,

Patrick Kelly
Water Resource Agent
