Re: Water Right Permit Application No. 63-34103 Additional Information Required

Dear Applicant:

Your recent application for permit regarding development of an existing ground water well for irrigation is being processed. The application cannot be accepted into the records of the Idaho Department of Water Resources (IDWR) until the following items are addressed:

- Part 4 - Amount of Water.

Department policy allows applicants to apply for up to 0.03 cfs per acre for small (less than 5 acres) irrigation purposes. Typically, the Department recommends permit applicants file for the maximum allowable rate, you may amend your application to the maximum amount of 0.12 cfs. However, this will advance your priority date to the date of amendment. If you do not believe you will need a greater quantity than 0.08 cfs you do not need to amend your application.

Additionally, you indicated the well is currently being used for domestic purposes. Domestic uses under 13,000 gallons per day and under 0.5 acres of irrigation of a residential lot do not require a permit. However, you may wish to add your domestic use to the application to establish a water right for domestic use. If this is the case please amend Part 4 to include up to 0.04 cfs for domestic purposes from 1/1 to 12/31 and adjust the total quantity (part 5) appropriately.

- Part 4 - Season of Use was not provided correctly.

The standard irrigation season in your location is 3/1 – 11/15. Please amend your application accordingly.

- Part 5- Total Quantity was not provided correctly.

Please amend the total quantity to be appropriated to include only measurements in cubic feet per second. Measurements of volume (acre feet per year) are used only if you are proposing to use the water for storage.

- Additional Information Needed.

All applications within basin 63 require the water bearing zone to be included with the application when advertised. Based on similar wells in that area the water bearing zone is around 300 – 400 ft, if you agree with this estimate please include a comment in the remarks section indicating “water bearing zone is 300-400 ft.” Additional information on well construction can be found using the well construction search on our website.

A copy of the original incomplete application for permit is enclosed, please make the necessary amendments to the form, initial and date each amendment, and return to IDWR within 30 days. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. The application will be voided without a timely written reply within the next thirty (30) days. Refunds are not issued for voided applications. IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please consult me at 208-334-2190 if you have any questions about the necessary information.

Sincerely,

Re: Water Right Application Incomplete - Returned

Dear Applicant:

This office received your application on June 29, 2015. The application cannot be accepted into the records of the Idaho Department of Water Resources (IDWR) until the following items are addressed:

- Description of Diverting works was not provided correctly. Please complete section 6a to describe the system you will use to divert water from this source. An example of this is using a pump in a well to connect to your sprinkler or drip irrigation system. Please complete section 6d and indicate whether or not ground water with a temperature great than 85°F is being sought.

The original incomplete application is enclosed. Please make the necessary amendments to the original form and re-submit within the next thirty (30) days. If IDWR does not receive your written response within thirty (30) days, a refund will be issued for this filing. IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please consult the IDWR website or contact this office at 208-334-2190 and ask for the "office day person" if you have any questions about the necessary information or fee.

Sincerely,
