Re: Fernan Estates Corporation
License # 95-09323

Gentlemen:

This responds to your letter to Fernan Estates Corporation dated May 1, 2015.

As to item 1 in your letter, the meter (the "totalizing measuring device") installed at each well site (Pump #4 & Pump #6) measures the quantity of water diverted in gallons only. It does not measure "rate of flow" or "discharge pressure" as set forth in Section III of annual report form. Your form indicates that for meters without rate of flow indicators we should refer to page 4. I could not find a page 4 on the form.

We understand that, in addition to the annual report form referenced above, we will be filing a report on January 15 showing the annual gallons used by each home owner. Each home owner has installed a meter which, again, only measures the gallons used. What form are we to use for this report or is my spread sheet sufficient for this report?

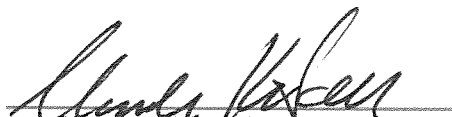

If you could help us be specifying what report form you wish us to use for each of the above reports, it would be appreciated.

Thank you.

Very truly yours,

Fernan Estates Corporation
