Shelley,

Here's the Trust Water Condition memo. As we discussed, the memo doesn't address domestic rights. For now, I'd include the condition addressing Objectives 1 and 2 (identifying use of trust water with a term limit) on all de minimis rights and refrain from using the conditions addressing Objective 3 (to satisfy minimum stream flows) on de minimis rights.

For our existing contested cases, we should let the parties know that we've received their conditional withdrawals and we've developed standard conditions that will be utilized in place of their stipulated conditions. We should let them know that we plan to continue processing with those standard conditions unless they notify us within a designated time period (I'd give them 14 days).

Jeff
