Dear Kevin:

A copy of the above referenced application is enclosed. Please review the application, then complete the enclosed recommendation form as necessary, and return it to this office within 21 days of the date of this letter.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

MEMORANDUM

Date: October 13, 2015
To: Transfer 80401 File
From: Jana Reeder
Re: Evaluation of Sufficiency of Information Submitted

Transfer proposes drilling a new well to serve as the point of diversion for a ground water right that currently authorizes the diversion of 0.11 cfs for the irrigation of 6.3 acres of land approximately located 0.75 miles due east of the center of Bellevue in Lot 3 of the Broadford Polo Subdivision. The water right was decreed in 2010 and authorizes the irrigation of 6.3 acres but the applicant only owns 5.3 acres of property. After discussion with Travis Thompson/representative it was decided to shrink the authorized place of use to the currently owned 5.3 acres to resolve this issue. (see attached email 10/13/2015)

The properties and point of diversion are located within Water District 37 but outside the ESPA. Water master comments will be requested.

- **Authority to File:**
The Department's database indicates that the applicant is listed as current owner on water right 37-20397.
- **Water Right Validity:**
Water right 37-20397 was decreed on September 24, 2015. The acres appear to be irrigated based on aerial photography.
- **Injury to Other Water Rights:**
None anticipated or foreseen. Applicant has an existing irrigation system that should not impact other water rights.
- **Enlargement of Use:**
Water right 37-20397 is actually shrinking by 1 acre from the decreed amount.
- **Local Public Interest:**
No negative impact anticipated. Application is for existing irrigation system and will be subject to public notice.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.
- **Effect on the Economy of the Local Area:**
None Anticipated
- **Effect of the Agricultural Base of the Area:**
None Anticipated

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

Corey,

I talked to Robert and he is fine with the 5.3 acres for the transfer. I assume the volume will still be 3.5 afa, reducing it down to 18.55 or 18.6 af?

Thanks,

Hi Travis,

I have started preliminary processing of transfer 80401 in the name of Signore and Lucchesi. You indicated by email to Allen that the new POD is located within the yellow place of use on the map submitted with the application. The application indicates that the new well will be drilled in the SWSENE of section 35 which is south of the yellow POU. Two options would be to either drop the SW ten-acre tract or submit a new map with the new POD clearly marked in the SWSENE of section 35. I have attached a map for your reference.

Let me know your thoughts..

Thanks,
Jana
