## D. FLOW MEASUREMENTS

A measurement is not required for domestic use if diversion rate does not exceed 0.24 cfs according to new Beneficial Use Examination Rules dated 3/28/2012

## E. FLOW CALCULATIONS

_____Additional Computation Sheets Attached

Measured Method: N/A

## F. VOLUME CALCULATIONS

A volume calculation is not required for 42-111 type domestic uses per new Beneficial Use Examination Rules implemented 3/29/2012. Idaho code 42-111 allows for 13,000 gpd for domestic use. The permit was issued for domestic use for 3 homes. The domestic use authorizes under this right shall not exceed 13,000 gallons per day per home in accordance with section 42-111, Idaho Code.

## G. NARRATIVE/REMARKS/COMMENTS

Application for permit 72-7526 was filed on June 13, 1994 by Charlie Campbell, Randy Somerville, and Dan Nutsh, co-partnership. Permit 72-7526 was issued October 5, 1994 for the diversion of 0.08 cfs for domestic use for 3 homes authorizing 13,000 gpd per dwelling. Proof of Beneficial us was due on or before October 1, 1996. The applicants submitted a Request for Extension of Time to submit Proof of Beneficial Use on November 6, 1996. An extension of time was approved. The time within which to submit Proof of Beneficial Use was extended to October 1, 1999. Since the extension was received after the proof due date of October 1, 1996, it was necessary for the department to reinstate the permit and advance the date of priority to July 23, 1994. The applicants filed Proof of Beneficial Use on September 13, 1999 for 4 homes.

On July 28, 2014 Jim Bitzenburg and I visited the property to conduct a field exam. We were met by a construction contractor, who was doing some remodeling on a garage/storage unit who verified the ownership of the property. During our visit I took pictures of the 3 homes built on the property, the various hydrants and water uses. It was evident that water is plumbed to all 4 lots. At this time we were unable to locate the point of diversion. On February 12, 2015 I met with Dan Nutsch and Dave Burgess concerning permit 72-7526. They had concerns about ownership since Dave Burgess has purchased one of the lots from Charlie Campbell. I told them that after licensing Mr. Burgess could file an ownership change form to be added to the license. They also informed me that 2 wells had been drilled on the property and that both wells are hooked together and can be used on all of the lots. They also identified the location of the wells. They informed me that water was plumbed to Randy Somerville's lot and he has a hydrant but that his home was not hooked up. We discussed the need to amend the permit to add the second well. On February 23, 2015 I returned to verify and GPS the well locations. Permit 72-7526 has been amended to show both points of diversion and the place of use to include all 4 lots.
