Please go forward with these changes. They look correct to me.

Richard,

I've received the application for transfer of water right that was filled out by Lex Firth. There are two corrections that need to be made.

- The Point of Diversion legal description has the Range as "66E". It should be "36E".
- The map needs to have some way of showing where the point of diversion is, ie. GPS coordinates or a Legal description layer on the map.

I've created a new map that you can use and I can update the Range description. Please review the attached map and let me know if you want me to go forth with these changes.

Thanks,
