Dear Mr. Maxey,

Attached please find our application for a water usage permit, drawing water from the Pend Oreille River. Hopefully the mapping information is acceptable as presented. Using a USGS map with "2" = one mile", per the item #13 instructions, doesn't allow for adequate description due to the small size of the project, so I attempted to draw it up instead.

We would appreciate if you would assist us in inserting this application into the approval process as soon as possible. We're getting a late start as a result of the time lost in trying to determine the history and possible transfer of the old water rights which were once in use here. Our hope is to get the pump portion of the irrigation system established early winter so we are ready to do the sprinkler phase first thing next spring. With that said, I understand that things can be slowed down considerable should someone object.

If you need further clarification on anything, please do not hesitate to contact me. Thanks in advance for your assistance in this matter.

Regards,

Roy G. Mills
