ACTION OF THE DEPARTMENT OF WATER RESOURCES

I, GARY SPACKMAN, of the Department of Water Resources hereby approve the above Application for Amendment for Permit No. 15-07195 with the following:

CONDITIONS OF APPROVAL

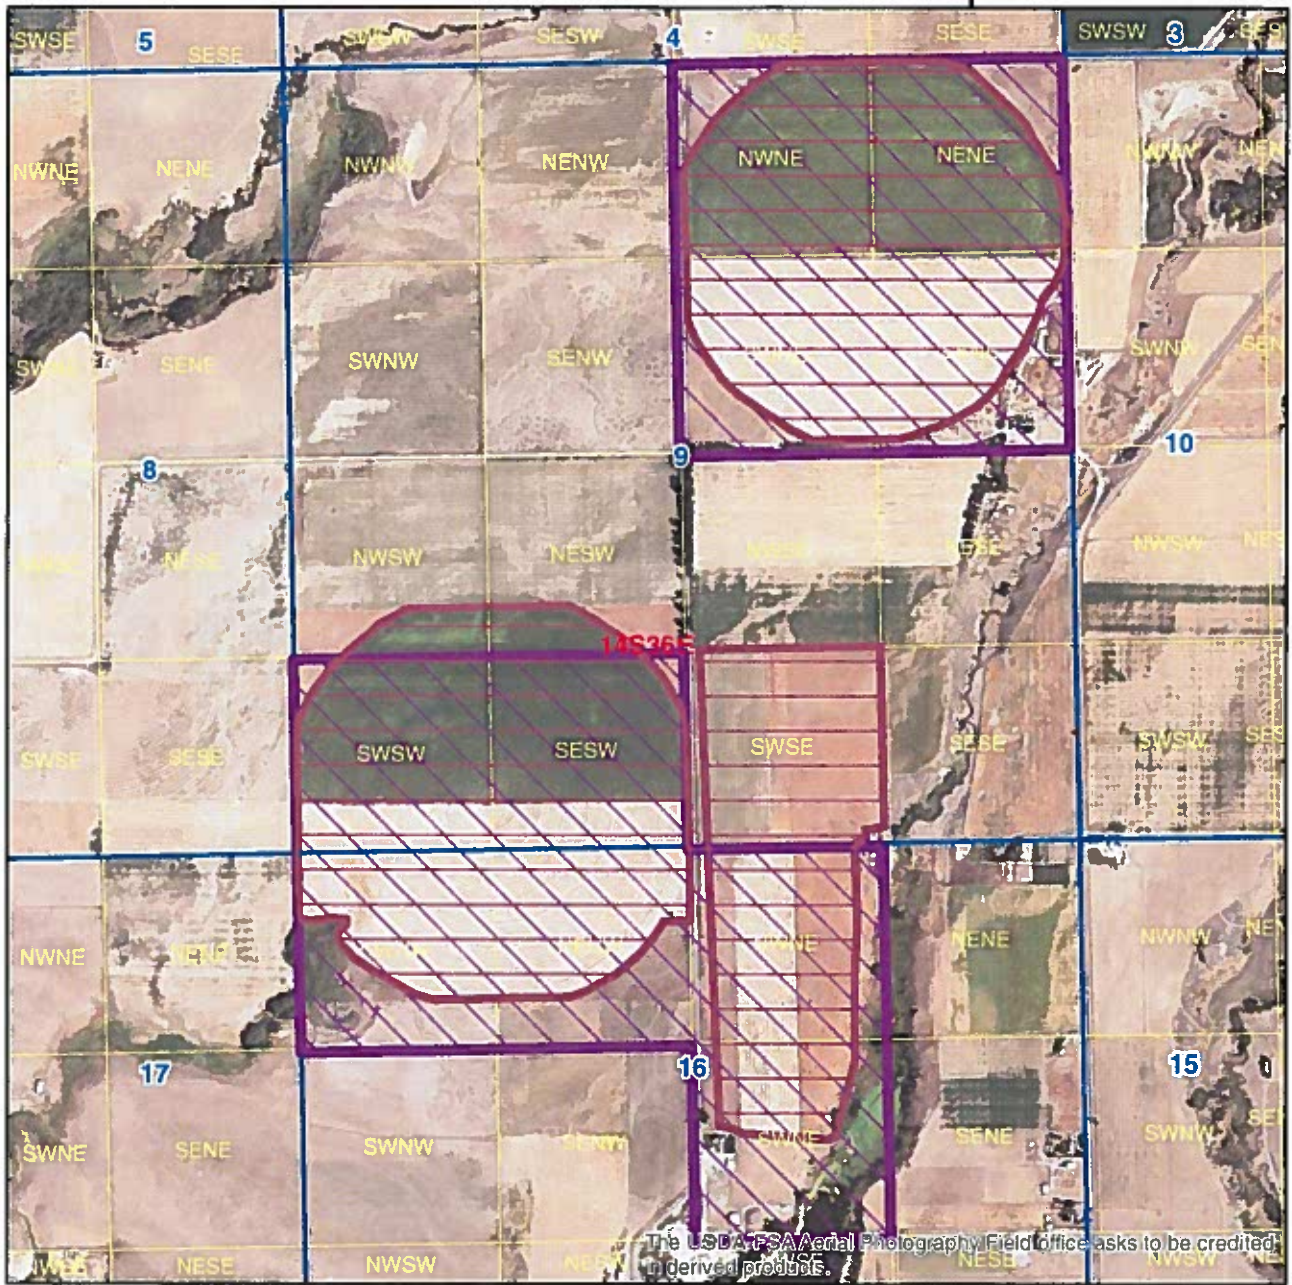

1. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
2. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
3. The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
4. If the surface water right(s) appurtenant to the place of use is unavailable for any reason other than drought or curtailment by priority (for example abandoned, forfeited, sold, transferred, leased, used on another place of use, or disallowed by court decree), this right to divert ground water shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.

Witness my hand this 1st day of October, 2015.

RE: Water Right Permit No. 15-07195

Dear Mr. Corbridge,

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit.

In reviewing your water use I found that certain elements of the permit have been developed differently than originally described. Specifically, acres are being irrigated in the NWSW, NESW, and NWSE of Section 9, Township 14S, Range 36E. These acres were not included in the permit.

Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Please review the enclosed Application for Amendment form carefully as it depicts the right exactly as it will appear on the license. It might be helpful to compare it with the enclosed map. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days.

Note that the stockwater use has been split from the irrigation component of permit 15-7195 and will be its own right, numbered 15-7397. 15-7397 does not require an amendment and will be licensed concurrently with 15-7195.

If you have any questions, please call me at (208) 534-1479.

Sincerely,

Cooper Fritz
Water Resources Agent
