They were, but then decided to drill new. The existing wells are fire protection only, so no water right exists or is needed, so I assume they can stay as is?

Chuck,

Same answer. As long as it is in the same 40.

I thought they were going to be using existing wells. Are the existing wells going to be abandoned?

Allen,

Flying Heart is developing this permit. For Well #2 (the middle well), they are considering moving eastward about 500 feet as shown on the attached map. They want to know if the Department would allow this location rather than as indicated on the permit map. Since it is in the same 40, I understand this would generally be allowed without a transfer, but thought I would ask to make sure. Earlier I talked to Corey about the north well being slightly shifted (about 100 to 200 feet east). He said no problem if in same 40.

Chuck
