Re: City of Boise Geothermal Water Right Permit 63-9139; Updated Map of Service Area

Dear Garrick:

As follow up to the discussion at our March 18, 2015 annual meeting with you and other representatives of the Idaho Department of Water Resources (the "**Department**") and other parties under the Second Stipulated Agreement for Settlement In Part of Petition and Stay of Further Proceedings ("**Agreement**"), in the Matter of Petition for Order Authorizing Additional Use Under Existing Permits and Moratorium Order for Water Rights 63-6138 & 63-9139 in the Name of the City of Boise ("**Petition Proceeding**"), enclosed is an updated map depicting the current City geothermal water distribution and collection system and buildings and area served by the system.

Please consider the map as updated information to supplement the original map and remarks regarding the service area in the Application for Permit 63-9139 as approved and subsequently amended by the Department, so that the Permit file reflects and the Department and the Agreement/Petition Proceeding parties have accurate information regarding the current, as developed extent of the City system and area served under Permit 63-9139. The enclosed map is intended to be a minor correction, clarification and update that is consistent with the original map and remarks in the approved Application for Permit.

This letter and attached map are not intended as an application for amendment of the Permit, and we look forward to confirming the final service area place of use for water right 63-9139 as part of the proof of beneficial use and license process that we anticipate, consistent with the discussion at the March 18, 2015 meeting. In response to concerns expressed to me by the counsel for one of the Agreement/Petition Proceeding parties about expansion of the service area boundary beyond that depicted on the enclosed map, the City does not plan to submit any further map regarding the Permit 63-9139 service area that would depict such an expansion or otherwise propose such an expansion under Permits 63-9139 or 63-9138.

I will remain available to address any questions or concerns that the Department or any of the Agreement/Petition Proceeding parties may have.

Very truly yours,

Robert A. Maynard
