Carry out one way analysis. If reach depletions go up, it is a debit, if they go down, it is a credit. Sum all debits, only where mitigation is required (dark yellow), and all credits (light yellow). Mitigation is required for the full amount of the summed values if greater than zero.

Transient state analysis represents mitigation requirements for the worst or maximum time step in the model run.

Evaluation of transient state mitigation requirement is not comprehensive across all time steps. Instead this evaluation finds the maximum stream depletion following the start of the transfer and looks at depletion amounts from that time step. In many instances this depletion is greater than the depletion associated with the steady state condition or final time step. This evaluation is merely an indicator of whether transient depletions must be considered, not an indicator of all transient impacts.

Subject: Transfer Applications involving Wickel property northeast of Declo

Mr. Parsons,

If you recall, earlier this year, during a conversation with Allen Merritt and myself (I believe during a conference for an application in the name of the State of Idaho Parks & Recreation in the Almo area), Allen mentioned that we had a couple of transfers that proposed moving additional water to the Wickel property northeast of Declo. Allen indicated that we would let you know when we would advertise these applications. It looks like they will hit the Times News next week (first publication on 8/20, and second publication on 8/27) with a protest deadline of September 8th. The two applications basically propose the following...

Transfer # 80041

Application proposes transferring a 5.4 acre (0.11 cfs) portion of two ground water irrigation rights (36-2594 and 36-2117) currently used on a farm located approximately 5.0 miles south of Hazelton to a farm located approximately 0.3 – 2.0 miles north and 2.5 – 4.0 miles east of Declo. The transferred rights (0.11 cfs) will be diverted from five existing wells and used to irrigate 5.4 acres within a proposed 1081 acre permissible place of use on the farm northeast of Declo.

Transfer # 80043

Application proposes transferring a 7.0 acre (0.08 cfs) ground water irrigation right (45-2329B) currently used on a farm located approximately 4.0 miles north and 2.5 miles east of Declo to a farm located approximately 0.3 – 2.0 miles north and 2.5 – 4.0 miles east of Declo. The transferred right (0.08 cfs) will be diverted from five existing wells and used to irrigate 7.0 acres within a proposed 1081 acre permissible place of use on the farm northeast of Declo.

A groundwater model analysis was performed and included with the transfers. This analysis modeled the change proposed by transfer, # 80041, along with the changes proposed by companion transfer # 80043. According to the model analysis, by combining these two transfers the results in depletions to hydraulically connected reaches of the Snake River are small enough to not require mitigation

Re: Evaluation of Sufficiency of Information Submitted

Application proposes transferring a 7.0 acre (0.08 cfs) ground water irrigation right, 45-2329B, currently used on a farm located approximately 4.0 miles north and 2.5 miles east of Declo to a farm located approximately 0.3 – 2.0 miles north and 2.5 – 4.0 miles east of Declo. The transferred right (0.08 cfs) will be diverted from five existing wells and used to irrigate 7.0 acres within a proposed 1081 acre permissible place of use on the farm northeast of Declo. The current and proposed points of diversion are located within the ESPA. A groundwater model analysis was performed and included with the transfer. This analysis modeled the change proposed by this transfer, # 80043, along with the changes proposed by companion transfer # 80041. According to the model analysis, by combining these two transfers the results in depletions to hydraulically connected reaches of the Snake River are small enough to not require mitigation. The transfer moves the water right within Water District 140 so water master comments will be solicited.

- **Authority to File:**
The application is filed in the name of Wickel Land Company. The right being transferred is in the name of Ardel and Judy Wickel. The application includes a copy of a quitclaim deed conveying the water right to Wickel Land Company.
- **Water Right Validity:**
The right involved with the transfer was decreed in the SRBA in 2005 and examination of recent aerial photography indicates that the current place of use appears irrigated.
- **Injury to Other Water Rights:**
None anticipated.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No issues anticipated. The application will be subject to public notice and protest.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.
- **Effect on Economy of the Local Area:**
None anticipated.
- **Effect of the Agricultural Base of the Local Area:**
None anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

SUBJECT: Filing Fee

The filing fee, \$225.00, for this transfer is based on the total amount of water being transferred plus a proposed ownership change. The transfer proposes modifying a 0.08 cfs water right which equates to a \$200.00 fee according to the transfer fee schedule. The transfer also proposes updating the ownership of the water right being transferred adding an additional \$25.00 fee, for a total of \$225.00.

Re: Wickel Land Company LLC and Idaho Water Company

Dear Mr. Merritt:

Wickel Land Company LLC has purchased water right 45-2329B. It is proposed to transfer 45-2329B to the farm owned by Wickel Land Company LLC near Declo, Idaho.

Idaho Water Company has purchased 5.4 acres of irrigation water from 36-2594 and 36-2117 and has agreed to transfer the 5.4 acres to the farm owned by Wickel Land Company LLC.

There is an existing permissible place of use on the Wickel Land Company LLC farm with five existing water rights. The permissible place of use contains 1080.1 acres. These transfers will not stack 45-2329B, 36-2594 and 36-2117 with any of the existing water rights currently within the PPU. The beneficial use and period of use will not be changing. The ownership, place of use and authorized points of diversions of 45-2329B, 36-2594 and 36-2117 will be changing with this transfer.

ESPA Model analysis was performed for this transfer. No mitigation is required as a result of this transfer.

Please contact me if you have any questions.

Sincerely,

Greg Sullivan, M.S., Engineer
