APPLICATION FOR TRANSFER OF WATER RIGHT – POINT(S) OF DIVERSION

This form may be used to apply to change and/or add points of diversion for existing water rights and to report an ownership change for a water right(s) in connection with the proposed point of diversion change(s). Do not use this form to apply for changes to other elements of a water right. See the Application for Transfer Instructions for help completing this form and for mailing addresses of Department offices where your application can be submitted.

Check all that apply:

- ☒ Change diversion point(s) ☐ Add diversion point(s) ☐ Ownership change ☐ Ownership split

1. APPLICANT(S) Kathryn S Savage Phone 928 606 8395

2. MAILING ADDRESS PO Box 115 City Clayton

State ID Zip 83227 Email kathy.savage@nau.edu

- ☐ If the applicant is not an individual and not registered to do business in the State of Idaho, attach documentation identifying officers authorized to sign for the applicant.
- ☐ If the applicant is not the current water right(s) owner, attach documentation of authority to file the application.
- ☐ If the application includes a change in ownership of water right(s), attach a copy of the conveyance document, such as a warranty deed, court decree, contract of sale, etc. The conveyance document must include a legal description of the property conveyed or description of the water right if no land is conveyed. Additional fee(s) are required for water right ownership changes; see Item 9 for the fee schedule.

If the ownership change resulted in the water right(s) being split, how did the division occur? Mark one:

- ☐ The water rights or claims were divided as specifically identified in a deed, contract, or other conveyance document.
- ☐ The water rights or claims were divided proportionately based on the portion of their place(s) of use acquired by the new owner.

- ☐ If the application is not signed by the applicant, attach a Power of Attorney or other documentation providing authority to sign for the applicant.

3. LIST WATER RIGHT NUMBER(S) 72-16855

- ☒ Attach a copy of the water right(s) as recorded, available at www.idwr.idaho.gov, *Water Right Transfers, Step 1*, or by contacting any Department office.

4. TOTAL AMOUNT OF WATER transferred is .13 cubic feet per second and/or _____ acre-feet per annum.

RE: Transfer No. 80160
Water Right No(s). 72-16826

Dear Mr. Cutler:

A copy of the above referenced application is enclosed. Please review the application, then complete the enclosed recommendation form as necessary, and return it to this office within 21 days of the date of this letter.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR's regional offices can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Sincerely,

Denise Maline

MEMORANDUM

Date: August 12, 2015
To: Transfer 80128, 80160 Files
From: Clinton Barnes
Re: Evaluation of Sufficiency of Information Submitted

Applications propose changing the authorized point of diversion for water rights 72-16855 and 72-16826 to a new point of diversion along the Salmon River on the applicant's property. Each water right allows diversion of up to 0.13 cfs of surface water for the irrigation of a property located approximately 3.0 miles west and 0.9 miles south of the city center of Clayton, ID. Note that each right allows for the irrigation of an adjacent parcel.

Water right **72-16855**, when combined with water rights 72-16856 (Squaw Creek), and 72-16857 (Squaw Creek) is limited to a combined diversion rate of 0.27 cfs and a combined acre limit total of 2.2 acres of irrigation in a single irrigation season.

Water right **72-16826**, when combined with water rights 72-16829 (Squaw Creek), and 72-16832 (Squaw Creek) is limited to a combined acre limit of 2.2 acres of irrigation in a single irrigation season.

The rights involved with the transfer allow for the diversion of water from within Water District 72D, so water master comments will be solicited.

- **Authority to File:**
IDWR records indicate the applicant currently owns the water rights involved in the transfers and all lands involved in the transfers.
- **Water Right Validity:**
Both water rights are decreed and active with a priority date of 6/1/1963. The rights were decreed in the SRBA in December 2000. Recent aerial photography indicates that the property associated with this transfer may not have been entirely irrigated. Further examination of satellite imagery (2010 Landsat) indicates that the properties appear irrigated in 2010.
- **Injury to Other Water Rights:**
None anticipated. Application proposes moving water out of a shared ditch. Currently the rights in the ditch total 4.48 cfs. The applicant's two rights total 0.26 cfs, only 5.8% of the water in the ditch.
- **Enlargement of Use:**
None anticipated.

Page 2

Transfer # 80128 and 80160 Memo

August 12, 2015

- **Local Public Interest:**

No issues anticipated. Application will be subject to public notice and protest.

- **Beneficial Use/Conservation of Water Resources:**

Proposed use is recognized as a beneficial use of water. The rights involved in the transfers were decreed at about 0.059 cfs per acre. However, examination of the SRBA claim file for the original parent right, 72-4157, indicates that the Salmon River right (72-4157) and the Squaw Creek parent rights (72-134A and 72-16497A) were limited when combined based on soil properties. Since the place of use is not changing it seems reasonable to continue to recognize the decreed rate for this same property.

- **Effect on the Economy of the Local Area:**

None anticipated.

- **Effect on Agricultural Base of the Local Economy:**

None anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing

MEMORANDUM

TO: Transfer # 80128, 80160 Files

FROM: Clinton Barnes

DATE: August 12, 2015

SUBJECT: Filing Fee

The filing fee, \$200, for each individual transfer is based on the total amount of water being transferred per transfer, 0.13 cfs each. The transfer fee schedule for a transfer involving 0.13 cfs indicates that the filing fee is \$200. The applicant paid a total amount of \$400.
