Jim,

If they are going to use three wells in the SWSE they will need to amend the permit.

The application originally contemplated using three existing fire protection wells but also there is reference to modifying or drilling new wells in the application. The permit was issued on the basis of three shallow wells being used. Two in the SWSE S32 and one in the NWNE S05. If they end up just using three wells as described on the permit I do not think there is an issue.... otherwise they may need to amend if they are adding more wells in different locations.

Allen,

I don't believe so. Does that make a difference?

Jim,
On further review it appears the well in the NWSWSE already exists as a fire protection well. Is it the intent to use this well in addition to a new well in the NESWSE?

Allen,

If the HOA decides to move one of the new wells authorized under this permit in the SWSE S.35 from the NWSWSE to the NESWSE are they required to amend the permit? I know a

similar move for a licensed right requires a transfer - just not sure about a permit. Please get back to me as soon as you can. Thanks.

Jim
