

7-29-2015

Dear IDWR

Please delay the commencement processing of our application for permit # 43-13745 - We would like to measure the temperature of and flow from the well to help in processing of our application - We believe that the artesian pressure will build up approximately 30 days after the well is shut off after the irrigation season - If possible we will get this information to you by the end of December - We may amend our application based on these results or proceed as filed -

Thank you,
~~Jan Fester~~
