RE: Amendment Required for Application for Permit 63-34062

Dear Mr. & Mrs. Reynolds

On March 20, 2015, you filed an application for permit to appropriate water for irrigation use in the NE¼ SE¼ of Section 26, Township 3 North, Range 1 East of Ada County. The amended application was received May 8, 2015. After review of the application, errors were found in the legal descriptions for Place of Use and Point of Diversion. For your convenience, I have printed an application for permit with the accurate legal description of the proposed domestic and irrigation use on your property. Carefully review the information I have provided. If you concur with these changes simply sign the application on the second page and return the application to my office.

Additionally, Coonse Well Drilling purchased a domestic well tag for your well under receipt #W042698 for \$75. This is the correct fee for domestic wells. Any use other than monitoring or domestic purposes requires a drilling permit fee of \$200. Because you have applied for irrigation from the well, the Department requires you to pay the drilling permit upgrade fee of \$125.

Please sign and return the application with a check or money order of \$125 for the application to be processed. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. The application will be voided without a timely written reply within the next thirty (30) days. Refunds are not issued for voided applications.

IDWR forms and other information are available on the Internet at www.idwr.idaho.gov.

Please contact me at 208-334-2190 if you need more information. Thank you for your attention to these matters.

Respectfully,

Patrick Kelly

Re: Water Right Application Incomplete - Returned

Dear Applicant:

This office received your application on March 20, 2015. The application cannot be accepted into the records of the Idaho Department of Water Resources (IDWR) until the following items are addressed:

- Quantity was not provided correctly- you must provide a rate of diversion for each of your described uses. This number should be included in section 4 next to "amount" for each of the uses. The combined rate should also be included in section 5 for total quantity to be appropriated.
 - For 1.1 acres of irrigation, you would be allowed to apply for .03 cfs per acre for a total irrigation diversion rate of .03 cfs.
 - If you are planning on irrigating half an acre of your lawn with the domestic part of your request, then the standard diversion rate for the domestic use is .04 cfs. If your lawn will be watered under the irrigation portion of your request and you are only using the domestic part for internal uses, the standard diversion rate for the domestic use is .02 cfs.
- Description of Diverting works was incomplete- complete section 6a to describe the system you will use to divert water from this source. An example of this is using a pump in a well to connect to your sprinkler or drip irrigation system.
- Nature of Proposed Use was not provided correctly- complete section 7d and describe the number of households that will use the water.

The original incomplete application is enclosed. Please make the necessary amendments to the original form and re-submit within the next thirty (30) days. If IDWR does not receive your written response within thirty (30) days, a refund will be issued for this filing. IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please consult the IDWR website or contact this office at 208-334-2190 and ask for the "office day person" if you have any questions about the necessary information or fee.

Sincerely,

Western Region Water Rights Staff
