STOCKWATER Same as IRRIGATION

Conditions of Approval:

1. 26A Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which the permit holder had no control.
2. 046 Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
3. 01M After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.
4. Water bearing zone to be appropriated is 300 to 500 feet.

5. 004 This right does not grant any right-of-way or easement across the land of another.
6. X02 Stockwater use is for 14 range cattle.
7. R65 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
8. 121 The Director retains jurisdiction to require the right holder to provide purchased or leased natural flow or stored water to offset depletion of Lower Snake River flows if needed for salmon migration purposes. The amount of water required to be released into the Snake River or a tributary, if needed for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this permit.

2. dblock 5/15/2013 Extension of Time
Extension of time filed and granted based on due diligence. Proof due date extended to May 1, 2018. No more extensions allowed for due diligence. End of ten year development period.
3. dmerriman 7/28/2015 SPLIT
WR 63-12007 WAS SPLIT INTO ADDITIONAL RIGHTS 63-34120 AND 63-34121.
4. dmerriman 7/28/2015 SPLIT QUANTITY
It appears there was an error in the total quantity allotted for this right prior to the split. The original application and permit listed 3.2 cfs for irrigation and .02 for stockwater with a total diversion rate of 3.4 cfs. Based on the listed uses, the total diversion rate should have been 3.22 cfs. Splitting the right provides the opportunity to correct this error. 0.4 cfs has been split from the original right, taking away from the corrected total of 3.22 cfs leaves 2.82 cfs total diversion rate for the right.
5. Ownership Change 7/28/2015 Split Right
Split into 63-34120 and 63-34121.
