MEMORANDUM

Date: July 28, 2015
To: Transfer 80269 File
From: Clinton Barnes
Re: Evaluation of Sufficiency of Information Submitted

Application proposes changing an authorized point of diversion location to a new well to be drilled for 10 groundwater rights (45-2377C, 45-2392, 45-2411, 45-2412, 45-2504, 45-2594A, 45-2605, 45-4041, 45-7439A, and 45-10365) used to irrigate a farm located approximately 11.0 miles south and 6.25 miles west of the center of Burley. Seven existing wells and the new well to be drilled (all located on the farm) will be utilized to divert up to 20.1 cfs for the irrigation of 1484.8 acres on the farm. The application proposed limiting the diversion from the new well to no more than 10.0 cfs. The rights involved with the transfer allow for the diversion of water from within Water District 140, so water master comments will be solicited. The proposed well is located in the same groundwater model cell as the existing well so a groundwater model analysis is not required.

- **Authority to File:**
The application is filed in the name of Lambert Produce Inc., the owners of the right being transferred. Information from the IDSOS website indicates that the individual that signed the application is not allowed to sign on behalf of the entity. For this reason a Power of Attorney has been included with the application giving the signatory this permission and title of Attorney in Fact for Lambert Produce Inc. An ownership change will not occur as a result of the transfer with the currently recorded owners of the right retaining ownership of the right.
- **Water Right Validity:**
Water right 45-4041 was partially decreed in the SRBA in January of 2012. The remaining water rights were partially decreed in January 2006. An examination of recent aerial photography indicates that the current place of use appears irrigated for all rights.
- **Injury to Other Water Rights:**
None anticipated. Proposed new point of diversion is located within the same groundwater model cell as the currently authorized point of diversion.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No issues anticipated. The application will be subject to public notice and protest.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.
- **Effect on Economy of the Local Area:**
None anticipated.
- **Effect of the Agricultural Base of the Local Area:**
None anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

SUBJECT: Filing Fee

The filing fee, \$1,220, for this transfer is based on the total amount of water being transferred, 10.0 cfs (note that new well is proposed to be limited to 10.0 cfs). The transfer fee schedule for a transfer involving 10.0 cfs indicates that the filing fee is \$1,220.
