

MAY 15 2015DEPT OF WATER RESOURCES
SOUTHERN REGIONSTATE OF IDAHO
DEPARTMENT OF WATER RESOURCESTransfer No. 80245**MINIMUM REQUIREMENTS CHECKLIST**
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at www.idwr.idaho.gov.

Name of Applicant(s) Andy and Sharon Keeter et. al., see Attachment A.

Check whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.

Yes N/A * Means the item is always required and must be included with the application.

- ☒ * Completed Application for Transfer of Water Right form, Part 1.
- ☒ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
- ☒ * Application for Transfer Part 2A. Attach a Part 2A report describing each water right in the transfer as currently recorded.
- ☐ ☒ Complete and attach an Application for Transfer Part 2B for each water right for which only a portion is proposed to be changed through this transfer application.
- ☒ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
- ☒ * Correct fee submitted with transfer application form. (Fee schedule is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-10.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☒ #2a Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. **
- ☐ ☒ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s). **
** Additional fee(s) required for water right ownership changes; see fee schedule.
- ☐ ☒ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☒ ☐ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/resources.htm.
- ☐ ☐ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☐ ☒ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. If some or all of any right is leased to the Water Supply Bank, you must also show the the specific location and/or acres to be idled at the new, proposed place of use to satisfy lease requirements.
- ☒ ☐ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see fee schedule.
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☒ #9 Water Supply Bank information for all rights proposed for transfer and currently leased to the Bank. (Attachment WSB)
- ☐ ☒ #10 Other. Please describe: _____

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1 Continued

B. DESCRIPTION OF RIGHTS AFTER THE REQUESTED CHANGES. IF THE RIGHTS ARE BEING SPLIT, DESCRIBE PORTIONS TO BE CHANGED AS THEY WOULD APPEAR AFTER THE REQUESTED CHANGES.

1.	Right Number	Amount (cfs/ac-ft)	Nature of Use	Period of Use	Source & Tributary
All or Part ☒ ☐	37-1201A	0.07 cfs	Recharge	4/15 to 10/31	Seamans Creek/Sinks
☒ ☐	37-1201B	~~0.2 AFA~~ <u>0.2 cfs</u>	Recharge	4/15 to 10/31	Seamans Creek/Sinks
☒ ☐	37-11850	0.06 cfs	Recharge	4/15 to 10/31	Seamans Creek/Sinks
☒ ☐	37-22830	0.03 cfs	Recharge	4/15 to 10/31	Seamans Creek/Sinks
☐ ☐				to	
☐ ☐				to	
☐ ☐				to	
☐ ☐				to	
☐ ☐				to	

Total authorized under rights 0.16 cfs and/or 24.0 acre-feet

2. Total amount of water proposed to be transferred or changed 0.16 cfs cubic feet per second and/or 24.0 acre-feet per year.

3. Point(s) of Diversion:

- ☐ No changes to point(s) of diversion are proposed - the following chart is therefore not completed. (Proceed to #4.)
- ☐ Attach Eastern Snake Plain Aquifer analysis if this transfer proposes to change a point of diversion affecting the ESPA. Label it Attachment #5.

New ?	Lot	¼	¼	¼	Sec	Twp	Rge	County	Source	Local name or tag #
XX		NW	SW	NE	32	2N	19E	BLAINE	SEAMANS CREEK	EXISTING POND

4. Place of use: (If irrigation, identify with number of acres irrigated per ¼ ¼ tract.)

- ☐ No changes to place of use are proposed - the following chart is therefore not completed. (Proceed to #5.)

Twp	Rge	Sec	NE ¼				NW ¼				SW ¼				SE ¼				Acre Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
2N	19E	32		E	E		E			E									
Total Acres (for irrigation use)																			

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

Seamans Creek flows into the recharge pond, which will have a flow measuring device (flume) at the inlet.

There are no diversions from the pond. The outlet from the pond is a controlled slide gate which will include a flow measuring device. A staff gauge will be installed in the pond.

- b. Who owns the property at the point(s) of diversion? Alvin V. and Sally P. Shoemaker

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:
See attached agreement between Alvin V. and Sally P. Shoemaker and applicants.

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?

If yes, ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it Attachment #6. List the name of the entity and type of lien: CD# 37-22930 lists D.L. Bank as a security interest

Application will enhance the reliability of the water supply.

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank?

If yes, ☐ complete Attachment WSB.

- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:
N/A.

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:
N/A.

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- ☒ ☐ undergone a period of five or more consecutive years of non-use,
☐ ☒ currently leased to the Water Supply Bank.
☐ ☒ currently used in a mitigation plan limiting the use of water under the right, or
☐ ☒ currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe:

Water delivery to the four applicants has not been possible since 2010 because seepage losses in Seamans Creek have been excessive and the water master has been unable to deliver water from Seamans Creek to applicant's properties.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT PART 3

A. PLAT MAP (See Part 3A of Instructions for application for transfer for complete requirements.)

- ☐ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a.**
- ☐ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b.**

If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

If any part of the irrigation water right is leased to the Water Supply Bank, you must also specify the location and number of acres that will remain idled for the duration of the lease contract at the new, proposed place of use.

B. CHANGES IN NATURE OF USE (Water Balance)

- ☒ If you propose to change the nature of use or period of use of all or part of the right(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

- ☐ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**.

Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above:

RE: Gloria Camille McCray 1965 Trust

Dear Mr. Williams:

As of March 6, 2012, Whittier Trust Company of Nevada, Inc. is the Successor Trustee of the Gloria Camille McCray 1965 Trust. Your correspondence in the Matter of Seaman's Creek – Water Right 37-1201B was forwarded to us by Tim Thomas of Thomas & Johnston Chtd. At your earliest convenience, would you please update your records to correct the mailing address for the subject trust to the following:

The Gloria Camille McCray 1965 Trust
Whittier Trust Company
520 Pike Street, Suite 1415
Seattle, WA 98101-4040

I enclose copies of the relevant pages of your most recent correspondence, the Removal of Current Trustee and Designation and Acceptance of Successor Trustee, and my card for your records.

Please contact me if you should have any questions.

Sincerely,

Paul A. Cantor, J.D.
Executive Vice President
Northwest Regional Manager

RE: Seamans Creek - The Gloria Camille McCray 1965 Trust

Dear Paul:

I am sending this letter to you as attorney for The Gloria Camille McCray 1965 Trust. I am asking that you contact the Trust and obtain the necessary signatures to the individual Application for Permit in the name of the Trust, and the signature page on the Application for Transfer for the Seamans Creek water right holders near your client's residence.

The first application is an *Application for Permit*. The Permit will allow the pumping of an amount of groundwater from your client's existing domestic well equivalent to its Seamans Creek water right. The second application, which will be signed by all of the signors of the February 24th, 2015 Agreement, other than the Shoemakers, is an Application for Transfer of Water Right. When approved this Application will allow your client's existing Seamans Creek water right to be used for storage at the Shoemaker Pond site to provide seepage and therefore mitigation for the pumping of groundwater under your client's individual permit.

Please review each enclosed Application and contact me or Zach Latham at Brockway Engineering with any questions. If you find the Applications to be in order, kindly obtain the signature of your client on the signature lines marked on the enclosed Applications. Please make a photocopy of the signed Application page for your records, and return only the original, signed Application pages to me. When I have received all signature pages for each of the four (4) Applications for Permits, and the signature pages for the single Application for Transfer they will be filed with the Idaho Department of Water Resources. I will be back in touch with you to confirm the filings of the Applications.

Thank you for your continued cooperation. I look forward to hearing from you in response to this letter as soon as possible.

Very truly yours,

WILLIAMS, MESERVY & LOTHSPEICH, LLP

**REMOVAL OF CURRENT TRUSTEE AND
DESIGNATION AND ACCEPTANCE OF SUCCESSOR TRUSTEE**

1. Removal of Current Trustee

Gloria Camille McCray, the current sole Beneficiary (the "Beneficiary") under the Gloria Camille McCray 1965 Trust under Agreement dated January 8, 1965, and modified by King County Superior Court Judicial Proceeding No. 08-4-06443-1SEA by court order dated December 1, 2008 (the "Trust"), pursuant to Article III(B) of the Trust, hereby removes the current Trustee, HERITAGE BANK TRUST SERVICES of Seattle, Washington, immediately effective upon the acceptance by the newly appointed Trustee as evidenced below.

2. Designation of Successor Trustee

The Beneficiary of the Trust hereby designates WHITTIER TRUST COMPANY OF NEVADA to serve as Successor Trustee of the Trust to be immediately effective upon the acceptance of appointment by Whittier Trust Company of Nevada as evidenced below.

Dated: Dec 2, 2011.

Gloria Camille McCray

ACCEPTANCE OF APPOINTMENT

The undersigned hereby accepts appointment as Successor Trustee to the Trust, with all of the duties, rights, title, and powers of the original named Trustee effective as of the date of the Trustee's signature below.

Dated: Dec 2, 2011?

WHITTIER TRUST COMPANY OF NEVADA

Narrative in Support of a Water Right Transfer for a Recharge and Extraction Plan

Seamans Creek Recharge and Extraction Plan

Water Rights 37-1201A, 37-1201B, 37-11850 and 37-22830

Seamans Creek is an ephemeral stream emanating from the mountains east of the City of Bellevue in Blaine County, Idaho. Except for a senior water right owned by the City of Bellevue in Seamans Creek which is not subject to the current application, Seamans Creek was historically used for irrigation of ranches dating back to 1880. Currently (2015) the stream enters a reservoir at the east end of the E da How Ranch and is distributed to some 216.5 acres of irrigated land. The original water rights for the ranches were subsequently divided in the Snake River Basin Adjudication to include four (4) small water rights belonging to lot owners in the Muldoon Ranch Subdivision #2 at the lower, western end of the E da How Ranch. The details on the four decreed rights and E da How Ranch (owned by Alvin V. and Sally P. Shoemaker) irrigation water right are shown in Table 1

Table 1: Seamans Creek Water Rights

Water Right	Owner	Use	Priority Date	Discharge and or Volume
37-1201A (Parent)	Andy and Sharon Keeter	Irrigation	7/21/1880	0.07 cfs
37-1201B	Gloria Camille McCray 1965 Trust	Wildlife Storage Aesthetic Storage	7/21/1880	0.3 AFA 0.3 AFA
37-11850	Carlita F Severe-Mclver	Irrigation Stockwater	7/21/1880	0.06 cfs 0.02 cfs
37-22582	Alvin V. and Sally P. Shoemaker	Irrigation	7/21/1880	4.33 cfs
37-22830	Kyle and Anna Bennett	Irrigation	7/21/1880	0.03 cfs

Seamans Creek flows through the E da How ranch and adjacent to the four lots in the Muldoon Ranch Subdivision #2 and the authorized points of diversion for the 4 lot owners are located on their individual lots. All of the 4 lot owners' water rights and water right 37-22582 belonging to E da How ranch have priority dates of July 21st 1880 and all of these water right holders should be provided water from Seamans Creek with the same priority.

Recognizing this requirement, the Watermaster District 37, Kevin Lakey attempted to deliver water through the existing creek channel in August of 2012 and April of 2014 but was unable to deliver the water in both instances because of excess seepage in the channel. This attempt was performed with no diversions from Seamans Creek to the E da How Ranch. He therefore indicated that it would likely be a futile call to attempt to deliver the lot owners' water at their points of diversion from Seamans Creek. (see attached memorandum from Kevin Lakey dated May 1st 2014.)

Brockway Engineering PLLC performed a feasibility analysis to determine if construction of a pipeline from the lower pond (see attached aerial photo) to the subdivision lot owners was feasible. It was determined that the cost of the pipeline and appurtenant structures would be prohibitive. Also, a study

of the feasibility of installation of a common well to deliver the water rights for the four (4) lot owners would be possible. This analysis showed that the cost and complexity would render this alternative not feasible.

Since the Seamans Creek valley aquifer is readily defined hydrologically, and the fact that the lot owners' domestic wells can be used to deliver the decreed discharge from each owner, the possibility of a managed recharge and extraction project was selected. The lower pond of the E da How ranch which has been in use for recreation, wildlife, and aesthetic purposes since the 1960's, is located on Seamans Creek approximately 4000 feet up-gradient from the lot owners. Seamans Creek flows into the pond and any inflow in excess of the pond seepage flows out through a control slide gate into the natural channel of Seamans Creek. Preliminary analysis of the seepage from the lower pond indicates that the seepage rate exceeds the sum of the lot owners' water rights from Seamans Creek (0.16 cfs. or 72 gpm). An analysis of available well driller's logs indicates that the aquifer underlying the subdivision and the lower end of E da How Ranch is alluvial consisting primarily of gravel and sand typical of the mountain valley. None of the driller's logs in the alluvium reached the bedrock so the aquifer is at least 160-170 feet deep. Driller's logs indicate the well yields are 35 to 80 gpm with drawdown between 0 and 50 feet. There are no geological anomalies that would render a recharge/extraction project unfeasible. Recharge at the E da How Ranch lower pond will therefore be hydraulically and economically feasible and appears to be the only feasible alternative to providing the decreed water to the lot owners.

MEMORANDUM

RE: Seaman's Creek water call

May 1, 2014

I am writing this memorandum to update all involved concerning the outcome of the call for water on Seaman's Creek by Kyle Bennett and others on lower Seaman's Creek.

The head gate on the lowest pond on the EE DA HO ranch was opened on the morning of April 16, 2014. At that time I measured 2.80 cfs running into the pond. I measured and adjusted the outlet flow to match the inflow. Later that evening, Rob Marcroft called and said the pond level was dropping drastically and wanted to turn down the outlet to avoid washing silt or fish out of the pond. I agreed with him and told him to adjust the head gate down. I am not sure why the outflow was greater than the inflow, but there was a large amount of trash at the head gate when I first opened it. There was also a large chunk of ice that washed out of the pipe when we opened it. Some of those obstructions may have washed out and allowed the outflow to surpass the inflow.

On April 18 I went back to the EE DA HO ranch and measured 2.80 cfs inflow. I measured 2.85 cfs outflow from the pond. There was no head pressure on the outlet head gate of the pond, so what was entering the pond was leaving the pond. The .05 cfs excess in outflow I believe can be attributed to measurement error. I believe the 1.78 % error would fall within allowable measurement error standards.

Also, on April 18 I walked the entire length of the streambed of Seaman's Creek. The outflow of the EE DA HO pond reached approximately 250 yards downstream from the pond which I would estimate was one-fourth the distance it would take to reach the lower points of diversion. I also found no points along the stream where water reappeared on the surface.

From April 18 to April 26 the total flow of Seaman's Creek was allowed to flow through the EE DA HO system. The EE DA HO ranch commenced irrigated on April 26, 2014.

On April 30 I measured the outflow of the EE DA HO pond at .98 cfs. Inflow was measured at 1.15 cfs. The EE DA HO ranch was diverting at the time, but I don't know the amount they were diverting because no measuring devices are in place at this time.

With decreased flows, the outlet stream had receded back up the streambed and was only reaching approximately 150 yards downstream from the EE DA HO pond.

No pond depths were taken, but it is estimated that the pond level dropped 1.5 feet in depth. The head gate level on the pond will allow no more withdrawals from the pond. The only storage currently taking place in the lower pond at this time is the water below the outlet head gate. As was alluded to earlier, all inflows into the pond are passed through the pond minus any evaporation or seepage.

No effort was taken to release water from upper ponds, but as it was mentioned earlier all water from Seaman's Creek was allowed to pass through the EE DA HO system because EE DA HO was not diverting for the first 8 days of the trial.

If the IDWR is in need of other measurements or requests other methods, I am open to suggestions.

Otherwise, Chuck Brockway Senior is attempting to organize a meeting of interested individuals to show how the EE DA HO system operates. Water will be allowed to run until that meeting takes place. Hopefully, the meeting will occur sometime early in the week of May 5th, 2014. If the meeting cannot be organized, I see no reason to allow release of water to continue after May 7th, 2014. Barring any unforeseen circumstances or guidance from IDWR, I am determining any further release of water as futile.

If anyone has questions or concerns, you can call me on my cell phone at 316-1048 or the office at 886-2451.

Respectfully,

Kevin Lakey
Water district 37

RE: Seamans Creek

Ladies and Gentlemen:

Enclosed please find a copy of the fully executed *Agreement*. Thank you to all concerned for their provision of the necessary signature pages. Brockway Engineering is underway with the filing of the necessary applications per the *Agreement*. They may be in touch with you individually to gather necessary information or discuss the particular aspects of each application with you.

Either Brockway Engineering or myself will endeavor to keep you fully advised of the progress of the preparation, filing and processing of the applications. Please contact me directly, or Chuck Brockway, Sr. at Brockway Engineering, PLLC, if you have any questions.

Very truly yours,

WILLIAMS MESERVY & LOTHSPEICH, LLP

\\SERVER\\share\\REW\\data\\Q-T\\Shoemaker Properties (Alvin)\\Correspondence\\McCray Arrington Severe Bennett Keeter 2015.03.03.doc

AGREEMENT

This Agreement is made and entered into this 24th day of February, 2015, by and among **ALVIN V. SHOEMAKER and SALLY P. SHOEMAKER**, husband and wife, (hereinafter "Shoemaker"); **THE GLORIA CAMILLE MCCRAY 1965 TRUST** (hereinafter "McCray"); **CARLITA F. SEVERE-MCIVER** (hereinafter "Severe-McIver"); **KYLE BENNETT and ANNA BENNETT** (hereinafter "Bennett"), and **ANDY KEETER and SHARON KEETER**, husband and wife (hereinafter "Keeter") (McCray, Severe-McIver, Bennett and Keeter are sometimes collectively referred to hereinafter as the "Other Parties").

RECITALS

- A. Each of the parties presently owns water rights in Blaine County, Idaho, that have surface water from Seamans Creek as their sources. These water rights are as follows:

NAME	WATER RIGHT NO.	DIVERSION RATE (CFS)	VOLUME (AFY)	PRIORITY DATE
SHOEMAKER				
	37-22797		337.2	07/21/1880
	37-12375	.02		12/31/1891
	37-14278	3.0		07/01/1966
	37-22582	4.33		07/21/1880
	37-8739		12	03/04/1991
MCCRAY				
	37-1201B		.3	07/21/1880
SEVERE-MCIVER				
	37-11850	.06		07/21/1880
BENNETT				
	37-22830	.03		07/21/1880
KEETER				
	37-1201A	.07		07/21/1880

(collectively the "Water Rights")

- B. The Water Rights all have irrigation or aesthetic/wildlife storage as their primary nature of use.
- C. For the years 2014 and recent prior years McCray, Severe-McIver, Bennett and Keeter, or their predecessors in interest, have not been delivered adequate water for the beneficial uses under their respective water rights.

- D. The real property owned by Shoemaker to which the water rights owned by them are appurtenant is upstream on Seamans Creek from the real property of the Other Parties. Some of Shoemaker's water rights allow them to impound water from Seamans Creek and store it for irrigation and other purposes.
- E. In the years 2013 and 2014 water calls were made to Water District 37 of which Seamans Creek is a part by some of the Other Parties. Despite attempts to deliver water to the Other Parties, no water has been able to be delivered.
- F. Even when water from Seamans Creek is not being stored by Shoemaker water has not been able to be delivered to the Other Parties.
- G. Bennett, McCray, Carl and Diane Legg, (as predecessors in interest to Keeter) executed a term sheet ("Term Sheet") in connection with this Agreement. A copy of the executed Term Sheet is attached hereto as EXHIBIT A.
- H. The parties wish to agree upon terms and conditions whereby the definitive agreement anticipated by the Term Sheet will be executed containing terms that include, but are not limited to, provisions that a new application for appropriation of groundwater will be made by each of the Other Parties, requesting (a) an individual groundwater water right for each of the Other Parties with the point of diversion being the current point of diversion for each of the domestic wells of the Other Parties as now located, or some other location identified by a party on the real property to which their water right is appurtenant; (b) the diversion rates and volumes in the same amounts as the Other Parties' water rights as described in Recital A; and (c) that Shoemaker provide mitigation for the new applications by allowing water to seep from their existing ponds in order to satisfy the mitigation requirements in connection with the new applications.

IT IS THEREFORE AGREED in consideration of these recitals and the promises and covenants hereafter contained as follows:

1. **APPLICATIONS FOR NEW WATER RIGHTS.** The Other Parties shall file with the Idaho Department of Water Resources ("IDWR") a joint application (or separate applications) for new water permits through Brockway Engineering, PLLC, Twin Falls, Idaho.. The points of diversion for the application(s) shall be the Other Parties' existing points of diversion for their respective domestic wells. All other elements of the new water rights to be sought by the application(s) shall be as now partially decreed for each of the Other Parties existing water rights as described in Recital A above. Mitigation for the new water right permits shall be as described in Paragraph 2 below.
2. **APPLICATION FOR TRANSFER FOR MITIGATION PURPOSES.** The Other Parties shall file a joint application (or separate applications) for transfer with the IDWR for the change of the nature of the use of the Other Parties' existing water rights as described in Recital A above, to groundwater recharge. Groundwater recharge shall be used for mitigation purposes for the Other Parties' new water rights sought in the application(s) described in paragraph 1 above.

Shoemaker will file such an application and pay all the costs for its preparation and processing, including filing fees.

3. INFRASTRUCTURE, MEASUREMENT AND RECORDING. In connection with the applications to be filed under paragraphs 1 and 2, certain improvements will be required to be constructed. Shoemaker agrees to pay for the entire cost of the following components of the required infrastructure, along with their installation, except as otherwise specifically provided elsewhere in this Agreement:

- (a) water measuring flume at the inlet to the lower pond on the Shoemaker property;
- (b) ten inch (10") meter to measure water flow on the main irrigation line from the upper pond;
- (c) four inch (4") meter on two (2) existing irrigation lines from Seamans Creek near the residence on the Shoemaker property;
- (d) staff gauge installation on the lower pond on the Shoemaker property;
- (e) Shoemaker agrees to pay the first five hundred dollars (\$500.00) of costs incurred by each of the Other Parties for the purchase and installation of magnetic flow meters at each of the points of diversion of the Other Parties on the real property to which their water rights are presently appurtenant. All other costs in connection with the purchase and installation of magnetic flow meters on the individual wells of the Other Parties will be borne by the Other Parties. If modifications to any of the Other Parties' existing wells, pumps or motors are required, each of the Other Parties will bear such costs associated with their individual wells.

Shoemaker shall also pay the entire cost of the measurement of the water provided for groundwater mitigation under the application(s) described in paragraph 2, as well as the reporting of such measurements to the IDWR.

4. TIMING AND CONSTRUCTION OF INFRASTRUCTURE. The parties will incur responsibility for the costs described in paragraph 3 above only when final, non-appealable orders have been entered by the Idaho Department of Water Resources approving each of the applications to be filed by or on behalf of the Other Parties as described in paragraphs 1 and 2. If it is determined that any of the applications described in those paragraphs cannot be made subject to a final order from the IDWR reasonably acceptable to all parties, this Agreement shall be null and void as to any of the Other Parties for which an acceptable final order cannot be obtained as to their application.

5. SEAMANS' CREEK OUTSIDE OF AUTHORIZED SEASON OF USE. Shoemaker shall allow the water in Seamans Creek in excess of the amounts necessary for aesthetic and wildlife storage as now established by Shoemaker's rights described in Recital A and for the diversion rates required for water rights in Seamans Creek owned by the City of Bellevue, Idaho which are prior

in interest to the rights of the Other Parties, to flow through Seamans Creek without being impounded outside of the lawful season of use for the Shoemaker irrigation rights.

6. **COOPERATION.** The Other Parties agree to cooperate fully with Shoemaker and Brockway Engineering, PLLC, by: (a) providing information necessary for the filing and processing of the applications described in paragraphs 1 and 2 above; (b) providing affidavits and/or testimony at any required hearing; and (c) not opposing, in whole or in part, any of the applications filed under paragraphs 1 or 2.

7. **SPECIFICATIONS.** Shoemaker agrees to provide specifications and any related plans for the work that will be performed by Shoemaker under this Agreement as soon as they are reasonably available. Brockway Engineering, PLLC, shall recommend to the Other Parties pipes and brands of magnetic flow meters which would be appropriate for each of the Other Parties to install. Each of the Other Parties acknowledges that they will be individually responsible for the selection and payment of an appropriate magnetic flow meter, and the selection and payment of a contractor to perform all other work necessary to modify their existing well, pump and motors to accommodate the increased water usage that will result from the applications for transfer. Shoemaker agrees to partially reimburse each Other Party in the amount of five hundred dollars (\$500.00) per owner for such expenses.

8. **TIMING OF FILING OF APPLICATIONS.** Subject to the full cooperation of the Other Parties, Shoemaker agrees to cause all the applications described in paragraphs 1 and 2 above to be filed within four (4) weeks of the date upon which the last of the signatures are affixed to this Agreement necessary to carry it into effect.

9. **EFFECTIVENESS.** This Agreement shall be fully effective between Shoemaker and the Other Parties who have executed it on or prior to March 1, 2015. Any of the Other Parties who have not executed this Agreement by March 1, 2015, shall not be a party to this Agreement, and shall not be entitled to any of the benefits of it.

10. **PREPARATION OF AGREEMENT.** This Agreement has been prepared by Robert E. Williams, of Williams, Meservy & Lothspeich, LLP, as attorney for Shoemaker. Each of the Other Parties has been advised to seek independent counsel of their own choosing with respect to this Agreement and any matter related to it.

11. **FURTHER AND ADDITIONAL DOCUMENTS.** The parties agree to execute such other, further and additional documents as may be required to carry into effect the terms and conditions of this agreement.

12. **TIME IS OF THE ESSENCE.** The parties hereto acknowledge and agree that time is, and shall be, the essence of each and every term and condition contained herein.

13. **GOVERNING LAW.** This agreement shall be subject to and governed by the laws of the State of Idaho.

14. **INTEGRATION.** The parties hereto acknowledge that the terms, conditions and covenants of this agreement shall supersede any prior negotiations and agreements of the parties, that there are no other agreements not contained in this agreement, and that this agreement shall be the final expression of the agreement of the parties and shall control. No modifications of this agreement shall be valid unless in writing and executed by all the parties hereto.

15. **ATTORNEY'S FEES ON DEFAULT.** If default be made by any party hereto in keeping or performing any of the covenants, conditions or agreements herein agreed to be kept by them, and the other party is required to employ an attorney to enforce any of the covenants, conditions or agreements herein contained, then and in such event, the party in default agrees to pay to the non-defaulting party, in addition to all other sums herein agreed to be paid by them, a reasonable attorney's fee, together with any costs and disbursements that may be incurred in enforcing this agreement.

16. **BINDING EFFECT.** This agreement shall inure to the benefit of, and be binding upon, the parties hereto and their respective heirs, executors, administrators and assigns.

17. **COUNTERPARTS.** This Agreement may be executed in original counterparts. Original signature pages shall be sent to Robert E. Williams, attorney for Shoemaker who shall then compile and send to each of the Other Parties a copy of the fully executed document.

IN WITNESS WHEREOF, the parties hereto have hereunto subscribed their names, the day and year in this agreement first above written.

RE: Seaman's Creek

Ladies and Gentlemen:

This letter will follow up my previous letter of May 22, 2014. It reflects my clients' modified position on the Term Sheet after considering comments made by Carl Legg. Each of you should understand that the Term Sheet is not the definitive agreement.

Brockway Engineering's original estimate of costs for each of the proposed activities is again set forth below. A revised proposed allocation of the costs is also provided. Please consider that, if your water could be delivered through Seaman's Creek (which has been proven on two separate recent occasions to be impossible) the water master would require each lot owner to have a separate, lockable head gate on Seaman's Creek. The water master would also require each lot owner to install a suitable measuring device. The cost of

EXHIBIT

 A

those items to each of you would have been equal to or in excess of what was proposed in the initial draft of the Term Sheet. You should also consider that if you cannot come to an agreement the water master has indicated that he would regard any future delivery call from the lot owners as futile, meaning there would be no modification of the current circumstances. In light of this, my clients believe that the initial proposed allocation of costs was generous to the lot owners. Nevertheless, in an effort to get consensus on the Term Sheet you will note below that my clients now propose to pay an additional \$500.00 per lot owner. This is my clients' final offer on cost sharing.

ACTIVITY DESCRIPTION	ESTIMATED COST	RESPONSIBILITY FOR COST	
		EE-DA-HOW RANCH	LOT OWNER
Water measuring Flume, Inlet to lower Ee-Da-How Pond and installation	\$1,000.00	x	
Water measuring devices for irrigation diversions:			
Main irrigation line from upper pond, 10" meter and installation	\$3,600.00	x	
Two (2) lines from stream near residents, 4" meter and installation	\$4,000.00	x	
Preparation of application for transfer with IDWR	\$1,000.00	x	
Transfer Fee	\$200.00	x	
Staff gauge installation on lower pond	\$200.00	x	
Preparation of application for permit for each well (\$200.00 x 4 = \$800.00)	\$800.00	x	
Permit Fee for each well (\$100.00 x 4 = \$400.00)	\$400.00	x	
Well magnetic flow meter and installation for each domestic well (\$1,400 x 4 = \$5,600.00) *Note: Any necessary well, pump or motor modifications would also be the cost of the lot owner.	\$5,600.00 Or \$1,400.00 per lot	\$500.00 per lot	\$900.00 per lot
10% contingency estimate	\$1,120.00	x	
	\$140.00 per lot		x
TOTALS		\$14,320.00	\$1,040.00 (per lot)

The definitive agreement among the parties will require that water from Seaman's Creek in excess of the aesthetic and wildlife storage rights of the Shoemakers and the flow limits of the City of Bellevue will be allowed to flow through Seaman's Creek outside of the season of use for irrigation. My clients will also agree to file the necessary applications with the Idaho Department of Water Resources within two (2) weeks of the date all signatures are affixed to the definitive agreement. My clients cannot guarantee by what date the Idaho Department of Water Resources will approve the required applications, but will commit to have its other work

completed within two (2) weeks of the date of final approval by IDWR. The date for installation of the magnetic flow meters for each well will be up to the lot owners.

You are likely correct that lot owners would save money by collaborating on a single contractor to do their work. Who does the work is entirely up to the lot owners. Recommendations of qualified firms can be provided if you would like.

If this revised term sheet meets your approval please sign at the foot of this letter and return the letter to me. Once all term sheets have been signed and returned to me I will prepare a definitive agreement incorporating the provisions of the term sheet and other reasonable terms and send it to each of you for review, comment, and eventual execution. As we discussed at our meeting on May 7th, no one will be bound to any provision of the term sheet until such time as the definitive agreement has been executed by all parties. The only obligation of the parties in the interim will be to discuss the matter, exchange information, and communicate in good faith in order to reach the desired result which is to execute a definitive agreement that will provide a legal, practical way for each of the lot owners to be able to divert what is now their Seaman's Creek water through groundwater at their individual well sites.

The numbers in the term sheet are estimates provided by Dr. Brockway. They are good faith estimates. Each party will bear the actual costs incurred with respect to the activities for which they have financial responsibility per this term sheet, whatever they may be.

You are welcome to contact me with any questions. I hope to hear back from you in the very near future.

Very truly yours,

WILLIAMS MESSERLY & LUTTSPEICH, LLP

ROBERT E. WILLIAMS

The provisions of this term sheet are agreed to this 2 day of JUNE, 2014.

You are likely correct that lot owners would save money by collaborating on a single contractor to do their work. Who does the work is entirely up to the lot owners. Recommendations of qualified firms can be provided if you would like.

If this revised term sheet meets your approval please sign at the foot of this letter and return the letter to me. Once all term sheets have been signed and returned to me I will prepare a definitive agreement incorporating the provisions of the term sheet and other reasonable terms and send it to each of you for review, comment, and eventual execution. As we discussed at our meeting on May 7th, no one will be bound to any provision of the term sheet until such time as the definitive agreement has been executed by all parties. The only obligation of the parties in the interim will be to discuss the matter, exchange information, and communicate in good faith in order to reach the desired result which is to execute a definitive agreement that will provide a legal, practical way for each of the lot owners to be able to divert what is now their Seaman's Creek water through groundwater at their individual well sites.

The numbers in the term sheet are estimates provided by Dr. Brockway. They are good faith estimates. Each party will bear the actual costs incurred with respect to the activities for which they have financial responsibility per this term sheet, whatever they may be.

You are welcome to contact me with any questions. I hope to hear back from you in the very near future.

Very truly yours,

WILLIAMS MESERVY & LOTHSTEICH, LLP

ROBERT E. WILLIAMS

The provisions of this term sheet are agreed to this _____ day of _____, 2014.

RE: Transfer No. 80245
Water Right No(s). 37-11850, 37-1201A, 37-1201B, 37-22830

Dear Applicant(s):

The Department of Water Resources has received your water right transfer application. Please refer to the transfer number referenced above in all future correspondence regarding this transfer.

A legal notice of the application has been prepared and is scheduled for publication in the **IDAHO MOUNTAIN EXPRESS** on **8/5/2015** and **8/12/2015**. Protests to this application may be submitted for a period ending ten (10) days after the second publication (**August 24, 2015**).

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the approval document.

Please contact this office if you have any questions regarding the application.

Sincerely,

Denise Maline
Administrative Assistant

NOTICE OF PROPOSED CHANGE OF WATER RIGHT**TRANSFER NO. 80114**

THOMAS M O GARA FAMILY TRUST, C/O BRIAN BARSOTTI, PO BOX 370, KETCHUM, ID 83340; has filed Application No. 80114 for changes to the following water rights within BLAINE County(s): Right No(s). 37-115F, 37-11830, 37-20635, 37-20637, 37-20639, 37-20641, 37-20643, 37-20645, 37-20647, 37-20649, 37-20651, 37-2502, 37-2568, 37-2581, 37-2599, 37-2604, 37-2616, 37-501B, 37-501C, 37-577K, 37-590B, 37-597B, 37-7758, 37-804. The purpose of the transfer is to change a portion of the above rights as follows: Application for transfer proposes adding two water rights, 37-804 and 37-11830, and their current 91.2 acre place of use (POU) to an existing 3,345.0 acre permissible place of use (PPU) that is served by 12 Big Wood River rights and 10 groundwater rights that currently allow for the irrigation of 2028.7 acres. The transfer will also add two existing points of diversion (PODs) currently used as part of the PPU ground water system to ground water right 37-804. PODs and POU are located 6.7 to 10.1 miles south and 1.0 to 3.7 miles east of the center of Bellevue. After the transfer, up to 55.70 cfs will be utilized from the 24 rights to irrigate 2119.9 acres within a proposed 3,437.0 acre PPU.

NOTICE OF PROPOSED CHANGE OF WATER RIGHT**TRANSFER NO. 80226**

THE VALLEY CLUB INC, PO BOX 252, SUN VALLEY, ID 83353; has filed Application No. 80226 for changes to the following water rights within BLAINE County(s): Right No(s). 37-2623. The purpose of the transfer is to change a portion of the above rights as follows: Application for transfer seeks to add a proposed well as an authorized point of diversion to a 2.84 cfs irrigation (2.6 cfs) and recreation (0.24 cfs) ground water right. The location of the proposed well will be approximately 3.3 miles north and 0.5 miles west of the intersection of Bullion St. and Hwy 75 in Hailey.

NOTICE OF PROPOSED CHANGE OF WATER RIGHT**TRANSFER NO. 80245**

CARLITA F SEVERE MC IVER, 330 BAYHORSE RD, BELLEVUE, ID 83313; ALVIN V SHOEMAKER and SALLY P SHOEMAKER, PO BOX 550, BELLEVUE, ID 83313; GLORIA CAMILLE MC CRAY 1965 TRUST, C/O WHITTIER TRUST CO, 520 PIKE ST STE 1415, SEATTLE, WA 98101-4040; KYLE BENNETT and ANNA BENNETT, 110 RIDGEVIEW DR, BELLEVUE, ID 83313; ANDREW N KEETER and SHARON D KEETER, 334 BUCKINGHAM DR, TWIN FALLS, ID 83301; has filed Application No. 80245 for changes to the following water rights within BLAINE County(s): Right No(s). 37-11850, 37-1201A, 37-1201B, 37-22830. The purpose of the transfer is to change a portion of the above rights as follows: Application proposes changing four Seamans Creek water rights that currently allow for irrigation and water storage on four parcels within the Muldoon Ranch Subdivision # 2 along the east edge of Bellevue. The application will change the authorized points of diversion, places of use and nature of use to allow for the rights to be diverted and used for groundwater recharge use at a location approximately 2.2 miles east of the center of Bellevue. The application proposes allowing 0.18 cfs of Seamans Creek water to be diverted and used for groundwater recharge purposes as part of a mitigation plan to offset groundwater diversion proposed by companion applications for permit 37-22964, 37-22965, 37-22967, and 37-22968.

Permits will be subject to all prior water rights. For additional information concerning the property locations, contact Southern Region office at (208) 736-3033; or for a full description of the rights &/or proposed transfer, please see www.idwr.idaho.gov/apps/wr/QueryNewTransfers/QueryNewTransfers.aspx . For additional information on new permits, please see www.idwr.idaho.gov/WaterManagement/WaterRights/#New_Listings. Protests may be submitted based on the criteria of Sec 42-222 and 42-203A, Idaho Code. Any protest against the approval of this application(s) must be filed with the Director, Dept. of Water Resources, Southern Region, 650 Addison Ave W, Ste 500, Twin Falls, ID 83301 together with a protest fee of \$25.00 for each application on or before August 24, 2015. The protestant must also send a copy of the protest to the applicant.

Kevin,

Attached is a cover letter, recommendation forms and copies of several applications, for your review. Please note that several of these applications have lengthy attachments in the file, which can be viewed via our website in the next few days. Also, the explanatory attachment is the same for the following apps: 37-22964, 37-22965, 37-22967, 37-22968 & transfer 80245.

Please contact our office if you have any questions, and any of the water right agents can help you.

Thank you in advance,

Denise @ IDWR

Dear Kevin:

A copy of the above referenced application is enclosed. Please review the application, then complete the enclosed recommendation form as necessary, and return it to this office within 21 days of the date of this letter.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR's regional offices can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Sincerely,

Denise Maline
Administrative Assistant

Enclosure(s)

MEMORANDUM

Date: July 28, 2015
To: Transfer 80245 File
From: Corey Skinner
Re: Evaluation of Sufficiency of Information Submitted

Application proposes changing four Seamans Creek water rights that currently allow for irrigation (37-1201A, 37-11850, and 37-22830) and water storage (37-1201B) on four parcels within the Muldoon Ranch Subdivision # 2 along the east edge of Bellevue. The application will change the authorized points of diversion, places of use and nature of use to allow for the rights to be diverted and used for groundwater recharge use at a location approximately 2.2 miles east of the center of Bellevue (Shoemaker property). The application proposes allowing 0.18 cfs of Seamans Creek water to be diverted and used for groundwater recharge purposes as part of a mitigation plan to offset groundwater diversion proposed by companion applications for permit 37-22964, 37-22965, 37-22967, and 37-22968. The rights involved with the transfer are diverted within water district 37 so water master comments will be solicited.

- **Authority to File:**
The application is filed in the name of the current recorded owners of the rights involved with the transfer and the land owners (Shoemakers) at the proposed place of use. The application also includes a copy of an agreement signed by the parties detailing the implementation of the proposal described by the application(s).
- **Water Right Validity:**
The rights involved with the transfer were decreed in the SRBA in 2012.
- **Injury to Other Water Rights:**
None anticipated.
- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No issues anticipated. The application will be subject to public notice and protest.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.
- **Effect on Economy of the Local Area:**
None anticipated.
- **Effect of the Agricultural Base of the Local Area:**
None anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

Subject: Refund Request

Sascha,

Could you issue a \$300.00 refund to Williams, Meservy & Lothspeich for an overpayment of a transfer filing fee. The fee was originally receipted as described on receipt # S034777. The transfer filing fee should have been \$450.00 instead of the \$750.00 that was paid. You can mail the refund to...

Williams, Meservy & Lothspeich
PO Box 168
Jerome, ID 83338

Thanks,

Corey

MEMORANDUM

TO: Transfer # 80245 File

FROM: Corey Skinner

DATE: July 28, 2015

SUBJECT: Filing Fee

The filing fee, \$450.00, for this transfer is based on the total amount of water being transferred, 0.18 cfs plus a \$250.00 change in nature of use fee. The transfer fee schedule for a transfer involving 0.00 – 0.20 cfs indicates that the filing fee is \$200.00. This \$200.00 plus the \$250.00 change in nature of use fee equals the total transfer filing fee of \$450.00.

Skinner, Corey

From: Skinner, Corey

Subject: Seamans Creek Applications

Chuck,

As we discussed the other day, I have had a chance to get the applications data entered into our computer system and came across several items that need to be addressed before further processing of the applications can continue. These items are outlined below...

- Part one of the transfer application identifies 24.0 acre-feet as a total volume. I am not sure where this number comes from.
- I can't seem to match up the total fee paid (\$1,150.00) with what I think the filing fee should be. It looks like the transfer filing fee may have been based on the 24 acre-feet value mentioned above?
- The transfer application appears to intend to list Alvin and Sally Shoemaker as co applicants (they signed the application). However, they are not listed on Attachment A (the list of applicants and addresses).
- We need some sort of proof that Paul Cantor can sign the transfer application and corresponding application for permit on behalf of the Gloria Camille McCray 1965 Trust (Paul Arrington & Travis Thompson are listed as attorneys on right 37-1201B, so maybe they have some sort of documentation?)
- There is a security interest (DL Evans Bank) listed on right 37-22830. At a minimum, the transfer application should reflect this (item 5c Part 1). Ideally there should be a letter of agreement from the bank. We do have a little bit of wiggle room on this according to the transfer memo (we can discuss further).
- Right 37-1201B currently lists 0.3 acre-feet of storage (no diversion rate). As we discussed the other day, it is recommended that the recharge use on Part 1 of the transfer be described as a rate rather than the 0.3 acre-feet volume so it will be consistent with the other rights involved with the transfer. We discussed using 0.01 cfs as the rate due to the relatively small 0.3 acre-foot volume.
- The map included with the transfer application needs to show the proposed point of diversion. I assume this should be the point where Seamans Creek enters the reservoir on the Shoemaker property (this will match the POD description on part 1 of the application).
- Each of the Application for Permits needs a map that shows the proposed place of use rather than the entire tax lot/parcel. (The easiest way would be to just use the current POU shapes for each owner's corresponding right involved in the transfer)
- The Application for Permit in the name of Carlita F. Sever-Mclver identifies the proposed point of diversion as an existing domestic well located in the SENW of Section 31. IDWR records indicate that there is a decreed domestic and stockwater right, 37-11848, in the name of Carlita F. Sever-Mclver for lot 33 of Muldoon Sub # 2. This decreed right lists the point of diversion as being in the SWNE of Section 31. The map with the application identifies the well as being on the line separating the SENW and the SWNE. Clarification on this matter is required.

- The Application for Permit in the name of Carlita F. Sever-Mclver needs to identify the stockwater place of use on item # 8 of the application.
- The Application for Permit in the name of the Gloria Camille McCray 1965 Trust should list a diversion to storage amount (in cfs) to reflect the water coming from the well to the pond.

Our next publishing deadline is the morning of July 29th. If we can get these items addressed in the next couple of days, hopefully we can get these applications advertised the first week of August. Let me know if you have any questions, or if you want to discuss any of these items further.

Corey
