

JUN 15 2015

DEPT OF WATER RESOURCES
SOUTHERN REGIONSTATE OF IDAHO
DEPARTMENT OF WATER RESOURCESTransfer No. 80170**MINIMUM REQUIREMENTS CHECKLIST**
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at www.idwr.idaho.gov.

Name of Applicant(s) Lynn CampionCheck whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.Yes N/A * Means the item is always required and must be included with the application.

- ☒ * Completed Application for Transfer of Water Right form, Part 1.
- ☒ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
- ☒ * Application for Transfer Part 2A. Attach a Part 2A report describing each water right in the transfer as currently recorded.
- ☐ ☒ Complete and attach an Application for Transfer Part 2B for each water right for which only a portion is proposed to be changed through this transfer application.
- ☒ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
- ☒ * Correct fee submitted with transfer application form. (Fee schedule is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-9.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☒ #2a Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. **
- ☐ ☒ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s).**
** Additional fee(s) required for water right ownership changes; see fee schedule.
- ☐ ☒ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☒ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/resources.htm.
- ☐ ☒ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☒ ☐ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use.
- ☐ ☒ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see fee schedule.
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☒ ☐ #9 Other. Please describe: Email correspondence between Jim Speck (applicant's attorney) and John Homan (IDWR's attorney)

4. Place of use: (If irrigation, identify with number of acres irrigated per ¼ ¼ tract.)

- ☒ No changes to place of use are proposed - the following chart is therefore not completed. (Proceed to #5.)

Twp	Rge	Sec	NE ¼				NW ¼				SW ¼				SE ¼				Acre Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
3N	18E	29									2.6								2.6
Total Acres (for irrigation use)																			2.6

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:
Existing surface water and ground water systems with the addition of 2 proposed shallow wells. Measuring devices and lockable controlling works will be installed to IDWR standards upon Department's request.

- b. Who owns the property at the point(s) of diversion? Applicant
If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? If yes, ☐ Attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it Attachment #6. List the name of the entity and type of lien:

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:
The 2.6 acres have never had access to irrigation water authorized under the water rights.

- e. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:
The current and proposed PODs are authorized under water rights 37-22888, 37-22889, and 37-22914 per approved transfer 79235.

- f. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- | | | |
|--------------------------|-------------------------------------|---|
| ☐ | ☒ | undergone a period of five or more consecutive years of non-use, |
| ☐ | ☒ | currently leased to the Water Supply Bank, |
| ☐ | ☒ | currently used in a mitigation plan limiting the use of water under the right, or |
| ☐ | ☒ | currently enrolled in a Federal set-aside program limiting the use of water under the rights? |

If yes, describe:

Jim,

Assuming the applications are otherwise complete and ready to be advertised, IDWR agrees that it will review and advertise these application with the intent of processing after the protest period expires. I expect IDWR will provide notice to Ms. Wilson and the transfer proceeding will progress in the ordinary manner.

John

Subject: RE: Water Supply Bank Applications & Recordation of Water Rights 37-577CA, 37-659A & 37-7017

John,

My client has prepared and is about to file a transfer application to move the 2.6A POU of these three water rights off of the Wilson property and on to a portion of her property. However, before doing so, I want confirmation from IDWR that it will review and advertise these applications and, assuming there is no protest from Ms. Wilson (or anyone else) complete the processing after the protest period expires. Please get back to me as soon as you can. Thanks.

Jim

RE: Transfer No. 80170
Water Right No(s). 37-577CA, 37-659A, 37-7017

Dear Applicant(s):

The Department of Water Resources has received your water right transfer application. Please refer to the transfer number referenced above in all future correspondence regarding this transfer.

A legal notice of the application has been prepared and is scheduled for publication in the **IDAHO MOUNTAIN EXPRESS** on **7/15/2015 and 7/22/2015**. Protests to this application may be submitted for a period ending ten (10) days after the second publication (**August 3, 2015**).

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the approval document.

Please contact this office if you have any questions regarding the application.

Sincerely,

Denise Maline
Administrative Assistant

RE: Application for Permit No.: 37-22963

RE: Transfer No. 80170
Water Right No(s): 37-577CA, 37-659A, 37-7017

Dear Kevin:

A copy of the above referenced application is enclosed. Please review the application, then complete the enclosed recommendation form as necessary, and return it to this office within 21 days of the date of this letter.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR's regional offices can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Sincerely,

Denise Maline
Administrative Assistant

Total Diversion: 0.04 CFS

Date Filed: 6/24/2015

Place Of Use: FIRE PROTECTION STORAGE

T04N R17E S12 NWNE

Application filed to appropriate 0.04 cfs of groundwater from an existing well to fill a 0.83 acre-foot (270,000 gallon) fire storage cistern within the Beaver Springs Subdivision located along the west side of Highway 75 approximately 1.4 miles north and 0.4 miles west of the center of Ketchum.

NOTICE OF PROPOSED CHANGE OF WATER RIGHT

TRANSFER NO. 80170

LYNN H CAMPION, PO BOX 3710, HAILEY, ID 83333; has filed Application No. 80170 for changes to the following water rights within BLAINE County(s): Right No(s). 37-577CA, 37-659A, 37-7017. The purpose of the transfer is to change a portion of the above rights as follows: Application proposes adding two wells as points of diversion and moving the 2.6 acre place of use to an adjacent lot for Big Wood River irrigation rights 37-577CA (0.017 cfs); 37-659A (0.035 cfs) and ground water irrigation right 37-7017 (0.052 cfs; 9.1 af). Hydrologic analysis indicating the connection between the wells and the Big Wood River was provided in approved transfer #79235. Place of use, existing and proposed PODs are located approximately 2.5 to 2.9 miles north and 1.0 to 1.3 miles west of the intersection of Bullion St and Hwy 75 in Hailey.

Permits will be subject to all prior water rights. For additional information concerning the property locations, contact Southern Region office at (208) 736-3033; or for a full description of the rights &/or proposed transfer, please see www.idwr.idaho.gov/apps/wr/QueryNewTransfers/QueryNewTransfers.aspx . For additional information on new permits, please see www.idwr.idaho.gov/WaterManagement/WaterRights/#NewListings. Protests may be submitted based on the criteria of Sec 42-222 and 42-203A, Idaho Code. Any protest against the approval of this application(s) must be filed with the Director, Dept. of Water Resources, Southern Region, 650 Addison Ave W, Ste 500, Twin Falls, ID 83301 together with a protest fee of \$25.00 for each application on or before August 3, 2015. The protestant must also send a copy of the protest to the applicant.

PO Box 10195
Palo Alto, CA 94303

RE: Transfer Application #80170 for Water Rights 37-577CA, 37-659A and 37-7017

To All Whom It May Concern:

An application for transfer was recently submitted to the Idaho Department of Water Resources seeking to move water rights 37-577CA, 37-659A and 37-7017 from a place of use currently identified as owned by the Jennifer Wilson Living Trust located at 106 Deer Creek LN in Hailey, ID.

The rights are currently listed as owned by the applicant, Lynn Campion, and were decreed in the applicants name in the Snake River Basin Adjudication in 2010. The rights are as follows:

37-577CA for 0.017 cfs for irrigation from the Big Wood River
37-659A for 0.035 cfs for irrigation from the Big Wood River
37-7017 for 0.052 cfs for irrigation from ground water

The application for transfer will be advertised in the Idaho Mountain Express on July 15th and 22nd and the public protest period will end on Aug. 3rd. If you have an interest in these rights you can file a protest anytime between receipt of this letter and 5:00 p.m. Aug. 3rd, 2015. If you have no objection to the proposed transfer, no action is required on your part.

If you have any questions or concerns, or if I can be of any further assistance, feel free to contact me at your convenience.

Sincerely,

Bill Mills
Senior Water Resource Agent

MEMORANDUM

Date: June 30, 2015
To: Transfer 80170
From: William Mills
Re: Evaluation of Sufficiency of Information Submitted

Application proposes to add two points of diversion (POD) to three 2.6 acre water rights; two Big Wood River rights (37-577CA and 37-659A) and ground water right (37-7017). Application also proposes transferring the water rights to a new place of use (POU).

The three water rights were decreed in the applicant's name and were split off as appurtenant to 2.6 acres of ground not owned by the applicant in transfer #79235. This application now seeks to move those rights to a new POU on ground the owned by the applicant and add two shallow wells as points of diversion to the rights. Hydrologic analysis for this proposed addition of shallow wells to the Big Wood River Rights was provided with approved transfer #79235. The analysis indicated that the shallow wells needed to be located within 370' of the river to yield a stream depletion volume of 50% reduction in the original source (Big Wood River) in less than a 24 hour period. The previous application for transfer indicated the shallow wells will be located within 300' of the river. A copy of the hydrologic analysis from transfer #79235 has been added to the transfer application file.

The applicant's attorney, Jim Speck, contacted John Holman, Deputy Attorney General, requesting the Department review and advertise the application for transfer based on the rights having been decreed in the applicants name. Mr. Holman indicated the Department would do so provided the application was "otherwise complete" (See Attachment 9). Mr. Holman also indicated that he expected the Department would provide notice to the property owner of the lot that the rights are considered appurtenant to. A letter of notification was sent to the owner of the lot and is included in the transfer file.

Overlap review indicates that there are no other irrigation rights appurtenant to the proposed POU. The proposed POU and PODs are in Water District 37 and Watermaster comments will be solicited.

- **Authority to File:**
IDWR records indicate the water rights were decreed in the applicant's name. The owner of the property the rights are considered appurtenant to, has been notified of the transfer application's intent.
- **Water Right Validity:**
Water rights 37-577CA and 37-659A were decreed in the SRBA on 12/9/2010. Water right 37-7017 was decreed in the SRBA on 1/28/2010. Recent aerial photography indicates that the property associated with this transfer appears irrigated.
- **Injury to Other Water Rights:**

None anticipated. The application proposes a change in source from the Big Wood River to ground water (tributary to Big Wood River) for water rights 37-577CA and 37-659A and the original PODs will be retained on the water rights. Hydrologic analysis was provided in a previous transfer (#79235) and indicated that the wells will need to be located within 370' of the Big Wood River to yield a stream depletion volume of 50 % reduction in the original source (Big Wood River) in less than a 24 hour period. Approved transfer #79235 indicated the wells would be located within 300' of the river or closer.

- **Enlargement of Use:**
None anticipated.
- **Local Public Interest:**
No issues anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed uses are recognized as beneficial uses of water.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

Subject: Application for Transfer

Dear Allen,

Enclosed on behalf of Lynn Campion, is an *Application for Transfer* seeking authorization for changes proposed for water rights 37-577CA, 37-659A and 37-7017.

Check No. 6535 for \$200 is enclosed for the filing fee.

Thank you very much for your consideration and assistance in this matter. Please call me or Christian if you have any questions.

Sincerely,

Lori Graves
Water Rights Specialist

Narrative and Supplemental Information
Application for Transfer of Water Rights 37-577CA and 37-659A
Prepared by SPF Water Engineering, LLC
March 28, 2014

Overview

The purpose of this transfer is to accomplish the following:

1. Add a well to serve as an alternate point of diversion (POD) for water rights 37-577CA and 37-569A. The current POD is located near the point at which water is diverted from the Big Wood River into the Purdum Slough. The proposed POD (well) would be located on the Campion property in close proximity to the Big Wood River. The purpose of moving the POD is that factors outside of the water right holder's control have prevented Purdum Slough from being used to divert (and re-divert) water to the Campion property.

IDWR rules require that a 50% of the water volume pumped from the well serving as a surface-water POD comes directly from the surface-water source within a 24-hour period. A stream depletion analysis for the proposed POD is provided below.

Aggregate diversions from the existing POD (should Purdum Slough ever become serviceable again) and new POD cannot exceed the authorized maximum instantaneous diversion rate and volumes authorized under water rights 37-577CA and 37-569A.

2. Identify the portions of water rights 37-577CA and 37-659A that are appurtenant to Campion property (portions of these rights are appurtenant to a neighboring property).
3. Change the place of use (POU) listed under water rights 37-577CA and 37-569A that are appurtenant to the Campion property to include northern portion of Campion property and exclude portions of the Campion property east of Purdum Slough, i.e., the POU (once approved) will include the entire Campion property between Purdum Slough and the Big Wood River. This represents no change in the maximum number of acres that can be irrigated under these rights.
4. Changes the nature of use of 13 acres irrigated under water rights 37-577CA and 37-569A from irrigation to mitigation of junior-priority groundwater depletions under water rights 37-7017 and 37-8485. The underlying use – irrigation – does not change.

Stream Depletion Analysis

IDWR rules¹ provide that a surface-water POD can be transferred to a well near a hydraulically-connected surface-water source (i.e., Big Wood River) as long as 50% of the water volume pumped from the well in a 24-hour period comes directly from the river. A stream depletion analysis was performed to determine the maximum distance that a new well on the Campion property could be located from the Big Wood River and still meet this criterion. The stream-depletion analysis was conducted using a spreadsheet provided by IDWR² which uses the Glover and Ballmer (1954) method as described in Jenkins (1968).

Stream depletion is dependent on duration of pumping, aquifer transmissivity, specific yield, and distance between the Big Wood River and the proposed well. The pumping rate is 0.8 cfs³ (0.26 cfs under water right 37-577CA and 0.54 cfs under water right 37-659A), which is equivalent to 359 gpm. The assumed pumping duration is 24 hours (to calculate the amount of stream depletion within a 24-hour period).

A transmissivity value for this analysis was estimated based on aquifer-test values and aquifer materials. The 48-foot deep Sun Valley Well No. 6 located near the Big Wood River in Ketchum had a specific capacity of 500 gpm/foot at a pumping rate of 990 gpm (Scanlan, 1988), suggesting a transmissivity of 100,000 ft²/day. Further south in Bellevue, transmissivity of the water table aquifer is reported to range from 30,000 to 70,000 ft²/day (Brockway and Kahlown, 1994).

Two higher-production wells within or near the Campion property (the Waddell and Brennan wells the NWSE of Section 29 (see Attachment B) show 42 and 52 feet, respectively, of saturated boulders, gravel, sand, or gravel and clay layers. Alluvial gravel sediments could be expected to have hydraulic conductivity values ranging from approximately 143 ft/day to 1,431 ft/day (properties listed in the stream depletion worksheet), which, with an aquifer thickness of 50 feet, would yield transmissivity values of 7,150 ft²/day (53,000 gal/day/ft) to 71,500 ft²/day (535,000 gal/day/ft). Additional aquifer zones are likely present below those tapped by these wells.

Based on these data, a hydraulic conductivity value of 1,400 ft/day and an assumed aquifer thickness of 50 feet yield an aquifer transmissivity estimate of 70,000 ft²/day. This is less than the 100,000-ft²/day estimate for Sun Valley Well No. 6, at the high end of estimates in the general Bellevue area, and consistent with published values reported in the stream depletion worksheet.

Based on an assumed pumping rate of 0.8 cfs, hydraulic conductivity of 1,400 ft/day, and specific yield of 0.15, the minimum distance from the Big Wood River

¹ IDWR Transfer Memo No. 24, dated December 21, 2009.

² Mat Weaver (IDWR), created December 10, 2008, modified March 27, 2012.

³ Although included as a parameter in the stream-depletion analysis, pumping rate does not impact the stream-depletion percentages calculated for this analysis.

that a pumping well could be located on the Campion property resulting in a 50% stream-depletion volume in 24 hours is 370 feet. To account for method uncertainty, we recommend that the new point of diversion (i.e., well) under water rights 37-577CA and 37-569A must be located within 300 feet of the Big Wood River to meet the 24-hour stream-depletion criterion.

Calculation of Stream Depletion Rate & Volume		
User Defined Input Variables		
t =	1	duration of pumping (days)
K =	1,400.00	hydraulic conductivity (ft/day)
b =	50.00	saturated thickness (ft)
Sy =	0.15	specific yield in decimals (unitless)
a =	370.00	distance (ft)
Q =	0.80	pumping rate (ft ³ /s)
Calculated Input Variables		
T =	70,000	transmissivity (ft ² /day)
Sy/T =	0.00000214	component of sdf (unitless) for observation only
Q =	69120	pumping rate (ft ³ /day)
Qt =	69120	pumped volume (ft ³)
	1.59	pumped vol (ac-ft)
Table Values		
sdf =	0.2934	stream depletion factor (units of time)
t/sdf =	3.41	(unitless)
q/Q =	0.688	(unitless)
v/Qt =	0.502	(unitless)
Stream Depletion Rate		
q =	0.551	stream depletion rate (ft ³ /s)
% Total =	68.8	contribution of total flow rate from stream (%)
Stream Depletion Volume		
v =	34,702	vol. strm depletion (ft ³)
	0.7967	vol. strm depletion (ac-ft)
% Total =	50.2	contribution of total volume from stream (%)

Table 1. Stream depletion analysis.
