Attachments: SummerParcels.zip; Parcel Analysis.xlsx

Hi Kerrie,

Thanks for inquiring about the status of the lease for this water right. From a review of past documentation, it appears that all acres proposed to be transferred through #80098 are leased to the Bank. There is no need to hold approval of the transfer, however the approval notice should advise the applicant of their inability to put water to use until the lease contract concludes. The lease of water right 22-14155 can continue until 2018 at the new POU, or the new owners can contact the Bank to request the water right be released as it is not currently rented.

Subject: Water Right 22-14026 - Transfer #80098

Good Morning:

On May 22, 2015 I forwarded you a copy of a transfer application that the Eastern Region had received for water right 22-14026. This right is currently in the water supply bank. The transfer application proposes to split a portion of the right and move the split portion to a new place of use with a new point of diversion (New Water Right #22-14155).

It appears that this water right has not been rented from the water supply bank for the 2015 irrigation season. Would you please let me know if we need to hold the approval of this application for any reason?

Thank you,

Kerrie Mathews
