Re: Review & Evaluation of Sufficiency of Information

This transfer proposes to create a 57 acre permissible place of use for water rights 35-8195A and 35-13894. The applicant asked that the two water rights not be combined. Water right 35-8195A will continue to be limited to 32 acres within the permissible place of use. Water right 35-13894 will be limited to 11 acres within the permissible place of use.

Authority to File:

The applicant is the current owner of water rights per IDWR record and property per Bingham County taxlot data.

Water Right Validity:

35-8195A was licensed in 1995. 35-13894 was decreed in the SRBA in 2002. Aerial photography shows that at least 43 acres have been consistently irrigated. Forfeiture is not an issue.

Injury to Other Water Rights:

Inside the ESPA and within WD 120. The point of diversion will remain the same. No ESPA transfer tool analysis is required. Watermaster does not oppose transfer. No injury issues have been identified. This transfer will be processed with no advertisement.

No issues identified.

Local Public interest:

No issues identified.

Beneficial Use/Conservation of Water Resources:

No issues identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
