Re: Review & Evaluation of Sufficiency of Information

This transfer proposes to establish a 160-acre permissible place of use for water right 35-14395, covering 80 acres owned by the applicant and 80 acres owned by Calvin Dyer. If the transfer is approved, the water right will be limited to 71 irrigated acres in a single irrigation season within the permissible place of use.

Authority to File:

Monty and Carolene Funk are the current owners of water right 35-14395. Calvin Dyer is the property owner of the western half of the proposed permissible place of use. The applicants are authorized to irrigate Calvin Dyer's property per water use agreement attached to the transfer application (Water Use Agreement dated March 3, 2015).

Water Right Validity:

Water right was decreed in the SRBA on 2/19/2002. Aerial photography shows ground to be irrigated. Forfeiture is not an issue.

Injury to Other Water Rights:

Inside the ESPA and within WD 120. Point of diversion is not being changed. No ESPA analysis required. Watermaster does not oppose transfer. No injury issues identified. This transfer will be processed with no advertisement.

Enlargement of Use:

No issues identified.

Local Public interest:

No issues identified.

Beneficial Use/Conservation of Water Resources:

No issues identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

Legal Notice Not Required
6/22/2015

Pursuant to Section 42-222, Idaho Code, the Department has discretion to provide public notice as deemed appropriate. The water right changes proposed through this transfer application do not appear to change the effect on the original or hydraulically connected water source or affect other water rights. Therefore, staff review of the transfer application found no cause to require public notice. This application will continue processing without advertisement and be forwarded for approval consideration.
