CONDITIONS APPLICABLE TO ALL RENTED WATER RIGHTS

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. This rental does not grant any right-of-way or easement to use the diversion works or conveyance works of another party.
5. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
6. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
7. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
8. Renter acknowledges and agrees that the Director may terminate diversion of water if the Director determines there is not a sufficient water supply for the priority of the right or portion thereof being rented.
9. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
10. This rental agreement does not authorize the construction of a well.
11. The renter must diligently pursue a permanent water right to provide for the uses authorized under this rental agreement.
12. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.

13. Use of water under this agreement will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.
14. A measuring device of a type approved by this Department shall be maintained as a part of the diverting works.
15. The period of use for the irrigation described in this approval may be extended to an ending date of 10/31 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water after 10/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the SRBA partial decree date.

An *Application to Rent Water from the Board's Water Supply Bank* must be completed in accordance with the minimum requirement checklist below to be acceptable for processing by the Idaho Department of Water Resources (IDWR). This checklist is part of the rental application and must be included with the rental application. Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.

Applications to rent water should be submitted well in advance of the desired start date for the use of water. Rental applications may be submitted as early as November 1 of the year prior to the intended use of rental water. Rental applications submitted more than one year in advance of the proposed start date for water use will not be accepted and will be returned to applicants. Rental applications will not be processed if they are received after the end of the rental season of use.

One rental application per beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources. For multiple beneficial uses of water, individual rental requests should be submitted for each unique beneficial use of water.

For additional instructions on completing a rental application, visit the Department's website at www.idwr.idaho.gov.

C. Enter the proposed start date and latest possible start date for using rental water. Also provide the number of years you would like to rent water:

Proposed Start Date (month/day/year)	Latest Possible Start (month/day/year)	* Proposed Rental Duration (Max 5 Years)	** For multi-year rentals, indicate whether you desire to rent water for remaining years if a rental request cannot be approved for the first year?

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany the rental request. Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.

For leased rights with combined limits, applicants should request to rent against the combined limit diversion rate, volume or acre limits.

MEMORANDUM

To: Water Right 37-8153

From: Clay Webster

Date: 6/10/15

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: The department received an application on 1 May, 2015 to rent 0.03 CFS and 6.0 AF to irrigate 2 acres from Jim Speck of Speck & Aanestad for J Kristoffer Popovich. This was after the department returned a previous rental application that identified the water right numbers for withdrawn lease applications. The map submitted with the previous application was also submitted for this application. I had to request a new map with the correct acres shown. Mr Popovich received an NOV in 2014.

Note that this rental will still leave Mr. Popovich's property short ½ acre short of the historical acreage irrigated.

AUTHORITY TO FILE: This application was signed by J Kristopher Popovich. He is the property owner according to our tax lot data.

WATER RIGHT VALIDITY: 37-8183 was decreed in 2010. 2 acres of that right was leased this year to fulfill this rental. Forfeiture is not an issue at this time

INJURY TO OTHER WATER RIGHTS: The lease and rental are both within the Ketchum Zone of the WSB Interim Ground Water Rental Policy. No injury is anticipated.

ENLARGEMENT OF USE: This rental with the ½ acre of domestic exemption will allow 2.5 acres of irrigation. No enlargement concerns are noted.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The rented right is subject to Water District # 37.

-I used the map submitted 6/12/15 by Jim Speck and calculated the acres being irrigated by Q9 and found that some of the rental POV will be in Sec. 6. The application doesn't indicate a rental POV in Sec 6 but, the map is clear that the application should've included that Section in the POV grid.
