

MEMORANDUM

Date: June 9, 2015
To: Water Right File 74-16036
From: Pam Skaggs *PS*
Re: Application for Permit Review

Applicant

According to available Lemhi County taxlot information updated 1/20/2015, the POD and the POU are on property owned by Wallace S. Raymond. The applicant states he is the owner of the property on the application. I will request confirmation of ownership of the property or access agreement from Mr. Scoggins. *

Source & POD

The proposed source of the water is springs tributary to Geertson Creek, tributary to Lemhi River that is a tributary of the Salmon River Wild and Scenic area. The applicant will be sent IDWR's additional local public interest information request.

Water Use

The application proposes use of surface water for a single domestic home. Water is collected in a culvert and delivered to the home through 2 inch black pvc pipe.

POU

The place of use is a home visible on the aerial photo submitted with the application and in 2013 imagery in ArcMap and may include associated irrigation. The application comments did not exclude irrigation use around the home.

POU/POD overlap analysis

There does not appear to be an existing right associated with the home or irrigation for the surrounding area. No other water rights are diverted from the proposed POD.

Conditions

The proposed use is in Water District 74A, Geertson Creek. The permit will be conditioned with a lockable device and Watermaster comments will be requested. Standard fish screening condition to address IDF&G concerns will be applied.

* Letter received 6-23-2015 notes the applicant purchased the property associated with this application 1-29-2015 & is current owner. *PS 6-24-15*
