Dear Danie,

I am applying for a new permit for my 4 acres of pasture that have been planted in fall of 2014, under permit # 67-14530, although I have not had sufficient time to drill a well and complete development before proof of Beneficial use was due.

Please expedite the processing of my application.

Thank you
Mike Stanton

Re: Application for permit 67-15136

Dear Mike,

I have made the following changes to your application for permit per our phone conversation on May 12, 2015.

- I added two points of diversion to section 3 of the form. One well is already existing and provides the domestic water to your home and lawn. The second well is to be drilled and will provide the water to irrigate your land. They are both in the same quarter quarter section of your land.
- I changed the quantity of water requested for domestic water from 0.02 cfs to 0.04 cfs. This is a Department standard for applicants who use their domestic water for ½ acre of gardening and landscaping as well as indoor uses.
- I created maps of the Places of Use and Points of Diversion for your two uses and two wells. **Please review the map and draw where the wells are actually found on your land.**

Please review this amended application to make sure you agree with the requests. If you see something that you would like to change, please do so and initial next to it. I am returning a copy of your original application for permit as well as the new amended application. **Please make the changes to the map and sign page two of the new form** before sending the entire packet back to the Department for advertising. The application will be voided without a timely written reply within the next thirty (30) days, but I recommend returning the form before then in order to further the expediting of your request.

IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please contact me at 208-334-2190 if you need more information. Thank you for your attention to these matters.

Sincerely,

Danie Merriman
