**RE: Statement of Completion Due
Permit No. 37-21465 – Municipal Water Rights
Sun Valley Water and Sewer District**

Dear Ms. Block:

I am in receipt of your letter dated April 30, 2015, to the Sun Valley Water and Sewer District ("District") concerning the need for a response regarding Permit No. 37-21465 in order to avoid cancellation. The subject permit is for a ground water diversion for municipal purposes, which purposes in this case include reasonable future needs within the service area established for the District. It is my understanding that, as such, the permit may remain in effect without proof of beneficial use. A well for this permit has indeed been completed, but due to budget constraints and marginal adequacy of supplies already available to the District, remaining improvements to permit production from this well and its integration into the District's existing system has not been completed, although I am informed that the District has retained CH2M Hill Engineering to complete the plans and specifications for doing so within the next year or two.

My client obviously wants to retain this permit, and has every intention of completing the well's development and application to beneficial municipal uses. If necessary, we would of course complete a new request for extension of time to provide proof of beneficial use, and request your guidance on the best way forward to preserve this important permit.

Sincerely,

J. EVAN ROBERTSON
