FROM THE BOARD'S WATER SUPPLY BANK

RECEIVED

APR 17 2015

DEPARTMENT OF
WATER RESOURCES

Applicant Name: Kirk S. Egbert

Is this application being submitted with a lease application as a lease/rental package? Yes ☐ No ☒

An *Application to Rent Water from the Board's Water Supply Bank* must be completed in accordance with the minimum requirement checklist below to be acceptable for processing by the Idaho Department of Water Resources (IDWR). This checklist is part of the rental application and must be included with the rental application. **Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.**

Applications to rent water should be submitted well in advance of the desired start date for the use of water. Rental applications may be submitted as early as November 1 of the year prior to the intended use of rental water. Rental applications submitted more than one year in advance of the proposed start date for water use will not be accepted and will be returned to applicants. Rental applications will not be processed if they are received after the end of the rental season of use.

One rental application per beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources. For multiple beneficial uses of water, individual rental requests should be submitted for each unique beneficial use of water.

For additional instructions on completing a rental application, visit the Department's website at www.idwr.idaho.gov.

2. MAP

Create a map of the proposed point(s) of diversion, place(s) of use, and water diversion, delivery and distribution systems. Make sure the place of use is outlined with an obvious, bolded line. For irrigation purposes, note that the place of use outlined on your map cannot exceed the number of acres you are proposing to rent. Attach the map to this application and label it **Attachment 2**.

3. DESCRIPTION OF PROPOSED USE FOR RENTAL WATER

A. Describe the purpose of your rental request. Include any anticipated rates of water application, water use practices or number of stock (if any). If the proposed use is not for irrigation, please provide a detailed description of the proposed use and how you determined the amount of rental water required. Attach additional sheets if required and label it **Attachment 3A**:
To allow irrigation with end-guns of two center pivot in response to a N.O.V.

B. Enter the desired and/or minimum necessary rates of flow, volume, or irrigable acres requested for your rental purposes:

Desired Rate (Cubic Feet/Second)	Desired Volume (Acre-Foot)	Minimum Rate* (Cubic Feet/Second)	Minimum Volume* (Acre-Foot)	Acres (if applicable) (Acre)
0.696 CFS	105.0 AF	0.695 CFS	105 AF	35.0 AC

Sometimes water rights available for rent provide an exceptionally low rate per acre and/or low volume per acre. This section is meant to establish an acceptable range of water sufficient for your proposed water use. Please see question 4B and complete if necessary.

C. Enter the proposed start date and latest possible start date for using rental water. Also provide the number of years you would like to rent water:

Proposed Start Date (month/day/year)	Latest Possible Start (month/day/year)	* Proposed Rental Duration (Max 5 Years)	** For multi-year rentals, indicate whether you desire to rent water for remaining years if a rental request cannot be approved for the first year?
April 1,2015	April 8,2015	1	☐ Yes, approve rental for all remaining future years. ☒ No, return rental request if first year is unapprovable.

* The number of years permissible for a rental is subject to the lease contract duration for the water right(s) being rented.

** Subject to the availability of rentable water. A multi-year rental that cannot begin during the first year requested may be approved for some or all remaining years, depending on availability. Rental requests will be returned if no water is available to rent in the first and/or subsequent years of the rental request.

M. List all other water rights and sources of water at the rental place of use for the same purpose and explain why additional water is required. Include privately owned water rights and water received from a municipal supplier, an irrigation district, a canal company, or any other water deliver entity:

Ground water rights: 31-11410, 31-11414, 31-11428, 31-11947 & 31-11947 in response to a N.O.V.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

See Attachment 4.A

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the water rights you are requesting to rent. Otherwise continue to Section 5 of this application form.

Please note: Diversion rates and volumes to be rented from a leased water right must be proportionate to the per acre diversion rates and per acre volume limits of the water right leased to the Bank. Applicants should query a water right's rental availability by reviewing active lease and rental documents, searchable via IDWR's website, to ensure all elements of a water right remain available in sufficient quantity to satisfy a rental request.

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany the rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.**

For leased rights with combined limits, applicants should request to rent against the combined limit diversion rate, volume or acre limits.

Elements of Water Rights Leased to the Bank (Contract Details)								Leased totals minus water actively engaged in rental agreement equals rental availability	Rental Request		
Water Right Number	Nature of Use	Water Source	Rate (CFS)	Volume (AF)	Acres (AC)	Start (year)	End (year)		Rate (CFS)	Vol. (AF)	Acres (AC)

Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre that have been leased to the Water Supply Bank								TOTAL	0.695 CFS	105.0 AF	35.0 AC

Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B: N/A**

STATE OF IDAHO

Application to Rent Water (Continued)

- C. Does your rental request propose to change the nature of use for any water right(s) being requested? Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented, as well as the new consumptive use amount for your proposed beneficial use. Attach a separate page if space is insufficient and label it **Attachment 4C**:

5. ADDITIONAL INFORMATION

5. ADDITIONAL INFORMATION

A. Is this the first time that rental water is being requested for this purpose at the rental place of use? **NO.**

If no, list previous rental requests/agreements and explain why you have not secured a permanent water right for your needs:

Water rights 31-11410, 31-11414, 31-114728, 31-11947, 31-11954, are appurtenant to the NW¼ Sec 1 and NE¼ Sec 2, T7N, R37E. These water rights are subject to an irrigation schedule that increases the diversion rate and the number of irrigable acres on an annual basis as seen below:

Mr. Egbert has secured a permanent water right for his needs but with the irrigation schedule increasing on an annual basis requires that Mr. Egbert change his irrigation practices annually. This has created several challenges in order for him to utilize the center pivots in an efficient manner.

Originally in 2008 Mr. Kirk Egbert leased approximately 95.5 acres of water rights 31-7267A & 31-10964A, 31-7084, 31-7569, 31-7103 & 31-11387, 31-7104, 31-7105 & 31-11388, 31-7106 & 31-11389 into the Water Supply Bank. The original ESPA Spreadsheet Analysis used at that time allowed irrigation of acres on all of Mr. Egbert's farm, and in particular within the NW¼ Sec 1 and the NE¼ Sec 2, T7N, R37E.

Mr. Egbert had assumed that he would be able to continue irrigating the acres in Sec 1 and Sec 2 using the water rights that he has leased into the bank using the original ESPA Model used in 2008. However, with recent changes in the procedures and the requirement that the current ESPA Model be used on an annual basis the model does not support using the rental water in Sec 1 and Sec 2, T7N, R37E, without additional mitigation.

Mr. Egbert is keenly aware that the Idaho Department of Water Resources monitors irrigated acres and wants to make sure that he irrigates every acre that he is allowed to insure that he does not forfeit any portions of his water rights.
