CONDITIONS APPLICABLE TO ALL RENTED WATER RIGHTS

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. This rental does not grant any right-of-way or easement to use the diversion works or conveyance works of another party.
5. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
6. Use of water under this agreement shall not prejudice any pending permanent transfer applications that the renter has filed to modify other water rights for irrigation of the subject lands nor shall it prejudice any future rental agreement that may be made of the subject water right after this rental agreement expires.
7. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
8. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
9. Renter acknowledges and agrees that the Director may terminate diversion of water if the Director determines there is not a sufficient water supply for the priority of the right or portion thereof being rented.
10. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
11. This rental agreement does not authorize the construction of a well.
12. The renter must diligently pursue a permanent water right to provide for the uses authorized under this rental agreement.

13. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.
14. The water right(s) referenced above is accepted into the bank and rented in accordance with a private agreement formulated between the lessor and the renter. Administrative fees will be paid based on the current rental rate.
15. Use of water under this agreement will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 120.

An *Application to Rent Water from the Board's Water Supply Bank* must be completed in accordance with the minimum requirement checklist below to be acceptable for processing by the Idaho Department of Water Resources (IDWR). This checklist is part of the rental application and must be included with the rental application. **Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.**

Applications to rent water should be submitted well in advance of the desired start date for the use of water. Rental applications may be submitted as early as November 1 of the year prior to the intended use of rental water. Rental applications submitted more than one year in advance of the proposed start date for water use will not be accepted and will be returned to applicants. Rental applications will not be processed if they are received after the end of the rental season of use.

One rental application per beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources. For multiple beneficial uses of water, individual rental requests should be submitted for each unique beneficial use of water.

For additional instructions on completing a rental application, visit the Department's website at www.idwr.idaho.gov.

2. MAP

Create a map of the proposed point(s) of diversion, place(s) of use, and water diversion, delivery and distribution systems. Make sure the place of use is outlined with an obvious, bolded line. For irrigation purposes, note that the place of use outlined on your map cannot exceed the number of acres you are proposing to rent. Attach the map to this application and label it **Attachment 2**.

3. DESCRIPTION OF PROPOSED USE FOR RENTAL WATER

A. Describe the purpose of your rental request. Include any anticipated rates of water application, water use practices or number of stock (if any). If the proposed use is not for irrigation, please provide a detailed description of the proposed use and how you determined the amount of rental water required. Attach additional sheets if required and label it **Attachment 3A**:
The rental will provide 79.0 acres of irrigation water for the 2015 irrigation season. Existing well, pump, main line and sprinkler system is installed.

B. Enter the desired and/or minimum necessary rates of flow, volume, or irrigable acres requested for your rental purposes:

Desired Rate (Cubic Feet/Second)	Desired Volume (Acre-Foot)	Minimum Rate* (Cubic Feet/Second)	Minimum Volume* (Acre-Foot)	Acres (if applicable) (Acre)
1.48 CFS	316 AF	1.48 CFS	316 AF	79 AC

Sometimes water rights available for rent provide an exceptionally low rate per acre and/or low volume per acre. This section is meant to establish an acceptable range of water sufficient for your proposed water use. Please see question 4B and complete if necessary.

C. Enter the proposed start date and latest possible start date for using rental water. Also provide the number of years you would like to rent water:

Proposed Start Date (month/day/year)	Latest Possible Start (month/day/year)	* Proposed Rental Duration (Max 5 Years)	** For multi-year rentals, indicate whether you desire to rent water for remaining years if a rental request cannot be approved for the first year?
4/1/2015	10/1/2015	1	☐ Yes, approve rental for all remaining future years. ☒ No, return rental request if first year is unapprovable.

- * The number of years permissible for a rental is subject to the lease contract duration for the water right(s) being rented.
** Subject to the availability of rentable water. A multi-year rental that cannot begin during the first year requested may be approved for some or all remaining years, depending on availability. Rental requests will be returned if no water is available to rent in the first and/or subsequent years of the rental request.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights? Yes ☒ No ☐
If yes, specify below the water rights you are requesting to rent. Otherwise continue to Section 5 of this application form.

Please note: Diversion rates and volumes to be rented from a leased water right must be proportionate to the per acre diversion rates and per acre volume limits of the water right leased to the Bank. Applicants should query a water right's rental availability by reviewing active lease and rental documents, searchable via [IDWR's website](#), to ensure all elements of a water right remain available in sufficient quantity to satisfy a rental request.

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany the rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.**

For leased rights with combined limits, applicants should request to rent against the combined limit diversion rate, volume or acre limits.

Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:
No unconventional duty is expected.

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented, as well as the new consumptive use amount for your proposed beneficial use. Attach a separate page if space is insufficient and label it **Attachment 4C**:

5. ADDITIONAL INFORMATION

- A. Is this the first time that rental water is being requested for this purpose at the rental place of use? Yes ☐ No ☒

Transient State Analysis

[illegible]

Evaluation of overall mitigation requirements per reach Steady State and Transient State, and On-Setting Benefits (Sum of reach debits only where mitigation is required and credits)

Carry out one way analysis. If reach depletions go up, it is a debit, if they go down, it is a credit. Sum all debits, only where mitigation is required (dark yellow), and all credits (light yellow). Mitigation is required for the full amount of the summed values if greater than zero.

Steady state analysis represents permanent mitigation requirements at future steady state (or last timestep from the ESPAM Transfer Tool model run).

Transient state analysis represents mitigation requirements for the worst or maximum time step in the model run.

[illegible]

Evaluation of transit state mitigation requirement is not comprehensive across all time steps. Instead this evaluation finds the maximum stream depletion following the start of the transfer and looks at depletion amounts from that time step. In many instances this depletion is greater than the depletion associated with the steady state condition or final time step. This evaluation is merely an indicator of whether transient depletions must be considered, not an indicator of all transient impacts.

[illegible]

Evaluation of Permanent Mitigation Efforts (non-use, acreage consolidation) in Addition to Off-Setting Transfer Benefits - Steady State Evaluation Only

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Subject: 2 WSB rentals for the Funk family

James,

I have completed my review of two 2015 rental applications submitted by Greg Sullivan, consultant for Lance and Lisa Funk and Lisa Irigoyen-Funk. The applications involve a total of 4 groundwater rights. Three rights are held by Northern Ag and were of interest to the compliance personnel because the acreage was still obviously being irrigated. I conferred with Rob Whitney 4/28/2015. He is comfortable with the evidence provided by Mr. Sullivan. A new POD from the Aberdeen-Springfield system was provided to Lance and Lisa Funk in order to deliver shares to the Northern Ag property. (Aberdeen-Springfield probably should have filed a transfer.)

The fourth right is held by Lisa Funk. It is appurtenant to her father's farm.

As a result of these two rentals, the POU's for the rights are swapped. The 174-acre Northern Ag property is now covered by Lisa Irigoyen-Funk's water right and portions of Northern Ags ground water rights. Lisa Irigoyen-Funk's 79-acre farm is now covered by portions of Northern Ag water rights.

Greg Sullivan modeled impacts to the ESPA. I verified the model runs and confirmed that no additional mitigation is needed.

I have attached my review memos and two images showing the general locations of the rental PODs and the leased acres.

Please give me your feedback about this application.

Thank you.
Michele

MEMORANDUM

To: Water Right(s) 35-14056 & 35-14058
From: Michele Edl
Date: April 27, 2015
Re: Review & Analysis of Lisa Funk Application to Rent Water from the State Water Supply Bank (the Irigoyen farm).

PURPOSE/NARRATIVE: On March 23, 2015, Greg Sullivan submitted an application on behalf of Lisa Funk to rent water from the State Water Supply Bank. The application proposed to rent portions of water rights 35-14056 and 35-14058 to irrigate 79 acres in Twp 4S, Rge 31E, sec 26, for the 2015 season.

The proposed point-of-diversion is an existing well utilized by the applicant's current system. The native ground water right, 35-7618, was decreed in the SRBA to Lisa Irigoyen-Funk and was used on the property with surface water from Aberdeen-Springfield Canal Co. As part of a water swap arranged in 2013, 35-7618 has been leased to the WSB. It has been rented through 2015 for use on other farm property managed by the Funk family.

The proposed place-of-use for this rental is the 79-acre, authorized place-of-use for native water right, 35-7618.

AUTHORITY TO FILE: According to available Bingham County taxlot information (from 2014), Juan Irigoyen owns the property at the proposed place-of-use. Juan Irigoyen is deceased. He was Lisa Irigoyen-Funk's father. The Funk's are in the process of getting the land ownership updated.

Greg Sullivan has limited power of attorney for the Funk family's water rights issues. Mr. Sullivan signed the application on behalf of Lisa Funk.

WATER RIGHT VALIDITY:

Water rights 35-14056 and 35-14058 are leased to the State Water Supply Bank from 2013 until 2016. They are available to rent in the quantity requested.

INJURY TO OTHER WATER RIGHTS: The consultant provided ESPA modeling of this water rental package using the current modeling utility, (Modified_Etransfer_V3_1.xls). I reproduced the consultant's modeling. No additional mitigation is required.

ENLARGEMENT OF USE: No enlargement is evident through this rental package. A review of 2014 aerial photography shows that the authorized place-of-use for leased water rights 35-14056 and 35-14058 had been irrigated. I conferred with IDWR compliance bureau personnel and confirmed that the irrigation was consistent with use of surface water (Aberdeen-Springfield shares). The appurtenant ground water rights have been idled in compliance with the WSB lease.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The rented rights are subject to Water District 120.

Water rights 35-14056 & 35-14058 are held by Northern Agriculture II LLC. I understand that Mr. Lance Funk has an agreement with Northern Ag to manage this farm and the appurtenant water rights.

Eastern Region and the Watermaster has been consulted.

The POU and POD shapes are already archived in those two rental layers.

Re: Lance Funk Rentals

Dear Mrs. Palmer:

Two rental applications are being submitted at this time. The first rental application is for 79.0 acres and will be only for the 2015 irrigation season. It is proposed to rent water from water rights 35-14056 and 35-14058 that are currently leased into the Water Supply Bank.

The second application is for 174.0 acres and will be only for the 2015 irrigation season. It is proposed to rent water from water rights 35-14056, 35-14058, 35-2084 and 35-7699 that are currently leased into the Water Supply Bank.

Contract of agreements have been signed by Northern Agriculture, Myrna Windburg, Richard Windburg and Lance Funk that states that Northern Agriculture, Myrna Windburg and Richard Windburg have already been paid by Lance Funk for the use of their water for the 2015 irrigation season. It is expected that Lance Funk will pay the 10% processing fee imposed by the Department of Water Resources for rental processing.

ESPA Model analysis has been performed for both of the proposed rental applications and no mitigation will be required due to these rentals.

Sincerely,

Greg Sullivan, M.S.
