Subject: RE: Application Amendment

Scott,

After reviewing the information and having some additional thought, I am not sure that it is within our best interest right now to add the 2nd water right (29-7450) to the application. It is a more junior water right and we would be limited to only the withdrawal rate of 2.2 cfs anyways, which I assume is not in addition to making it a total of 4.4 cfs that could be taken from that POD. This could change of course if we paid the additional fees and re-advertised. Maybe you could clarify.

Also, if it does not create a problem with this POD transfer or a condition thereof, I would prefer that we submit a separate application for 29-7450 and possible the other water rights listed on the existing POD once we abandon the old well. This seems to be the cleanest way to handle the other water rights that are attached to that existing POD.

Let me know.

Justin Armstrong

Subject: Application Amendment

Justin,

I've attached the forms that will need to be done to make the changes we talked about on the phone.

- Amendment for the Application for Transfer of Water rights.
 - I've filled out this page and we will use it to amend the previous version of the transfer application. The only thing I've changed is I've added the 2nd water right (29-7450) to the application. NO new advertisement nor fees will be incurred. I simply need a reply email stating you agree with the amendment.
- Removing the POD for water rights 29-2274, 29-2338, and 29-7450.
 - This simply requires a signed letter requesting the removal the POD's. I've attached a word doc with language that you could use if so desired. Please write this letter and sign it. You can mail it or scan and email it back to me.

If you have any other questions feel free to contact me.

Thanks,

Scott R. Bergendorf
