To appropriate the public waters of the State of Idaho

WATER RESOURCES
WESTERN REGION

1. Name of applicant(s) Kuna Cemetery Maintenance District Phone 208-559-4017
 Name connector (check one): ☐ and ☐ or ☐ and/or
 Mailing address 2390 N. Locust Grove Road City Kuna
 State ID Zip 83634 Email kunacemetery@gmail.com
2. Source of water supply ground water which is a tributary of _____
3. Location of point(s) of diversion:

TWP	RGE	SEC	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
2N	1W	23			NW	SW	Ada	Ground Water	

4. Water will be used for the following purposes:
 Amount .26 cfs for irrigation purposes from 3/1 to 11/15 (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
 Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
5. Total quantity to be appropriated is (a) .26 cfs cubic feet per second (cfs) and/or (b) _____ acre feet per year (af).
6. Proposed diverting works:
- a. Describe type and size of devices used to divert water from the source. pump to existing sprinkler system
- b. Height of storage dam n/a feet; active reservoir capacity n/a acre-feet; total reservoir capacity n/a acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11. For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No
- c. Proposed well diameter is 8-10 inches; proposed depth of well is 275 feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No
- e. If well is already drilled, when? n/a; drilling firm _____; well was drilled for (well owner) _____; Drilling Permit No. _____.
7. Description of proposed uses (if irrigation only, go to item 8):
- a. Hydropower; show total feet of head and proposed capacity in kW. _____
- b. Stockwatering; list number and kind of livestock. _____
- c. Municipal; complete and attach the Municipal Water Right Application Checklist.
- d. Domestic; show number of households _____
- e. Other; describe fully. _____

8. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below.
See instructions for standard symbols.

ATTACHEMENT TO WELL PERMIT
KUNA CEMETERY MAINTENANCE DISTRICT
DECEMBER 2, 2014

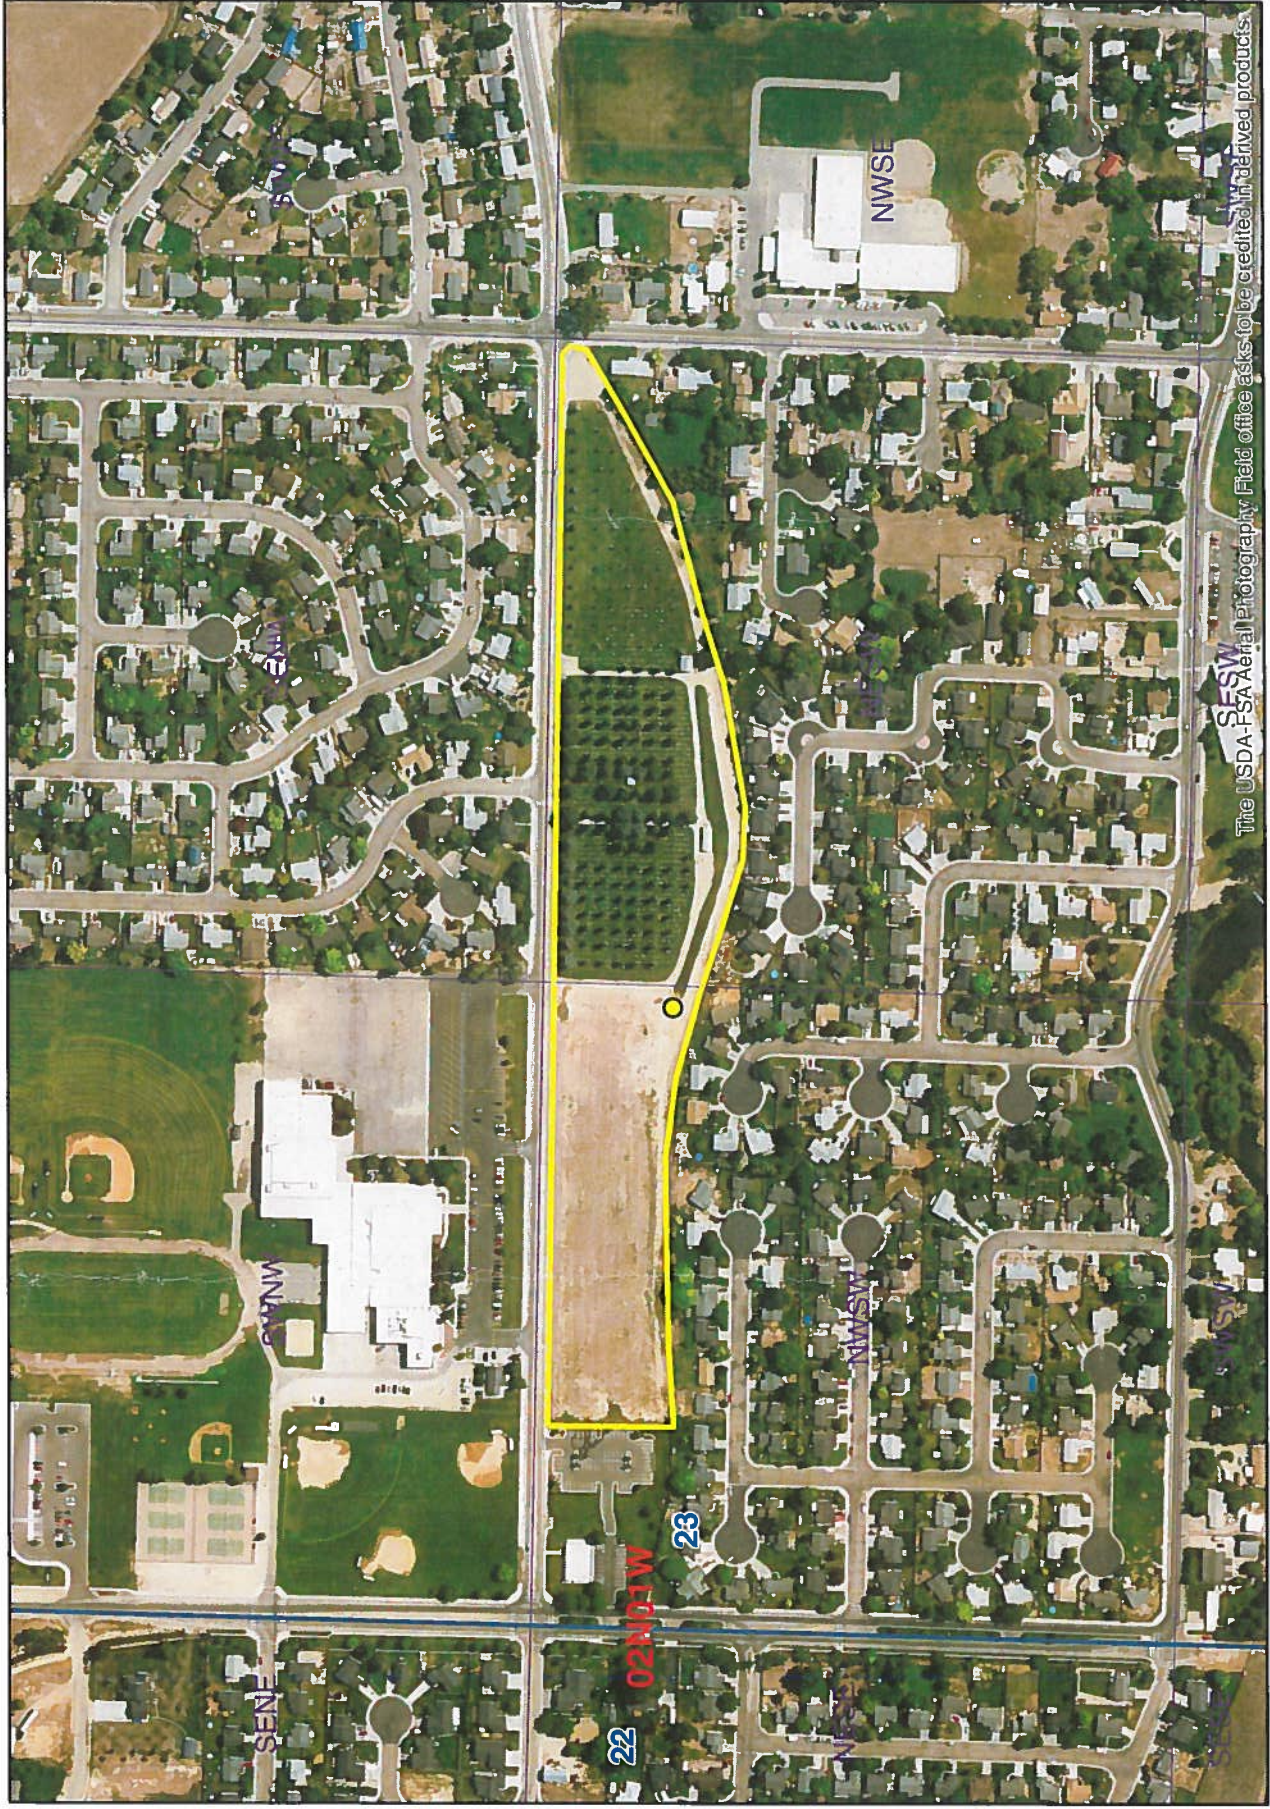

The Kuna Cemetery has 5.849 acres of undeveloped ground. At present we consume the majority of our allotted irrigation water for maintaining a beautiful cemetery. It our desire to drill a well and be able to develop the west end of our property, using drought resistant grasses, trees and other landscaping. An area for cremains, as well as parking and additional structures may be added in this phase of development, which would not require irrigation. The well would be used for irrigation only, and would allow the water to used during better hours and the consideration of wind. We have domestic water available to our restroom and outside water faucets as we are subscribed to the Kuna City water system.

Department of Water Resources
Application for Permit
Application Permit # 63-34021
Kuna Cemetery Maintenance District

9. Additional information

We are in the Boise-Kuna Irrigation District and we receive our current irrigation water from this entity only. The allotment amount varies from year to year depending on availability. We currently use this water to irrigate the developed 7.324 acres. The Cemetery owns a total of 13.173 acres. The well would be used in addition to the irrigation water received from Boise-Kuna Irrigation District. On low allotment years we are currently using our entire allotment to maintain the 7.324 developed acres. Currently the irrigation water is ordered in and must be used a full 24 hours. A well would allow the Cemetery to use water much more efficiently, during better watering temperatures, wind consideration and the amount of time used. It would be our intent to connect the well water to the existing sprinkler system to better manage and conserve water, using the reasons already stated. The well would be placed between the developed and undeveloped pieces of property for availability for equipment now and allow for maintenance in the future when the west end is developed.

Subject: water bearing zone

Hi Danie,

According to Gary Coonse, of Coonse Well Drilling and Pump Co., the water bearing zone will be approximately 240-260 feet. He said based on other wells in the area, he believes this is reasonable.

The revised permit was signed and is in the mail. Thank you again for your help. Marie Beatty

Sent: Monday, March 16, 2015 9:28 AM
To: kunacemetery@gmail.com
Subject: RE: well permit

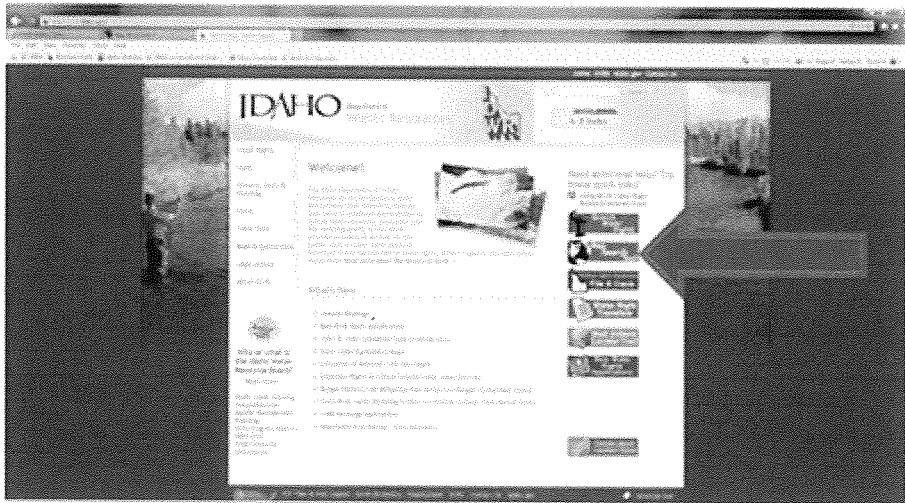

Good Morning Ms. Beatty,

I understand that you have a few questions about your application for permit for the Kuna Cemetery. I am sorry that the letter seems to have gotten lost in the mail, and we have another on its way to you.

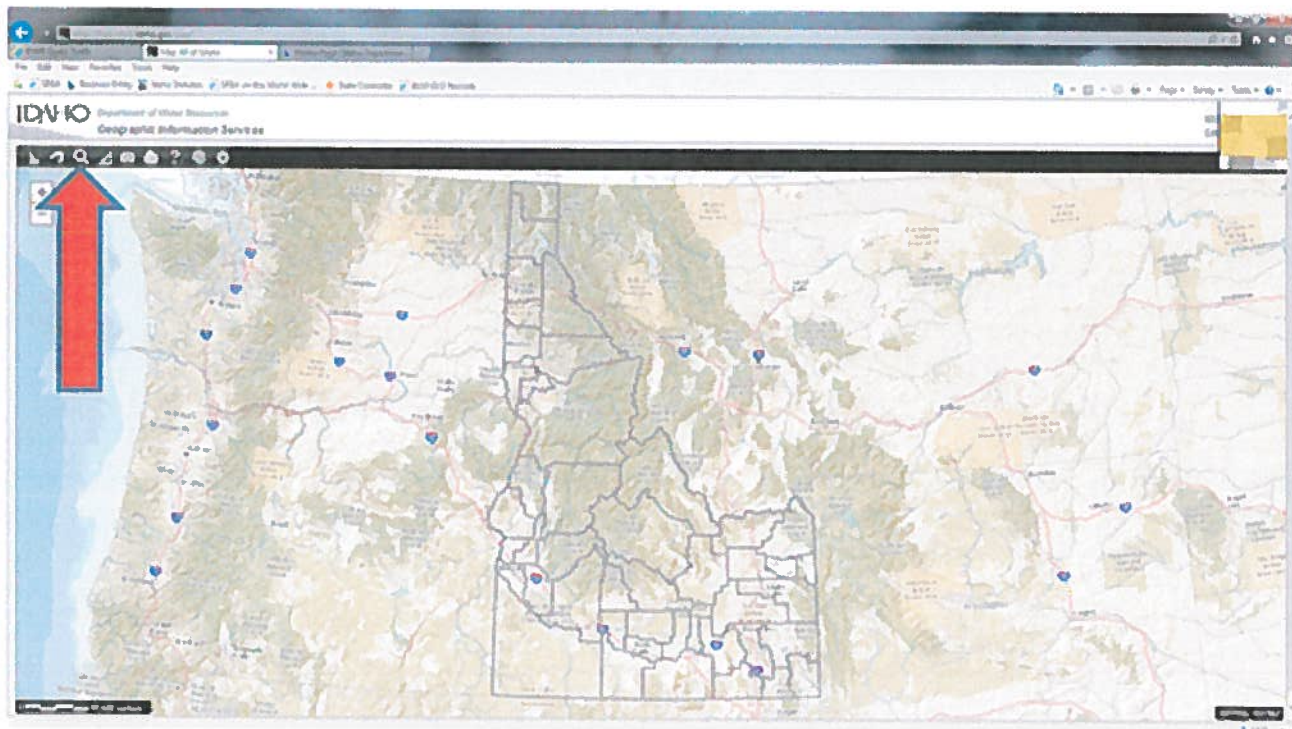

In Section 8 of the application, you describe 13 acres of proposed place of use. Section 13 of the application requires a map of the proposed project that clearly identifies the proposed point of diversion, place of use, section number, township, and range. The map you included only shows 2 acres, which is 11 acres short of the total you applied for. We need a map that includes all of the area you are planning on developing under this water permit. This map also needs to include the legal description (township, range, section) of the land so we can cross-check its location with your description.

I would suggest using the mapping tools on the Idaho Department of Water Resources website (<http://idwr.idaho.gov/>)

On the right side of the main screen, you will see a list of colored quick links. Click on the green one that says 'map search tool.'

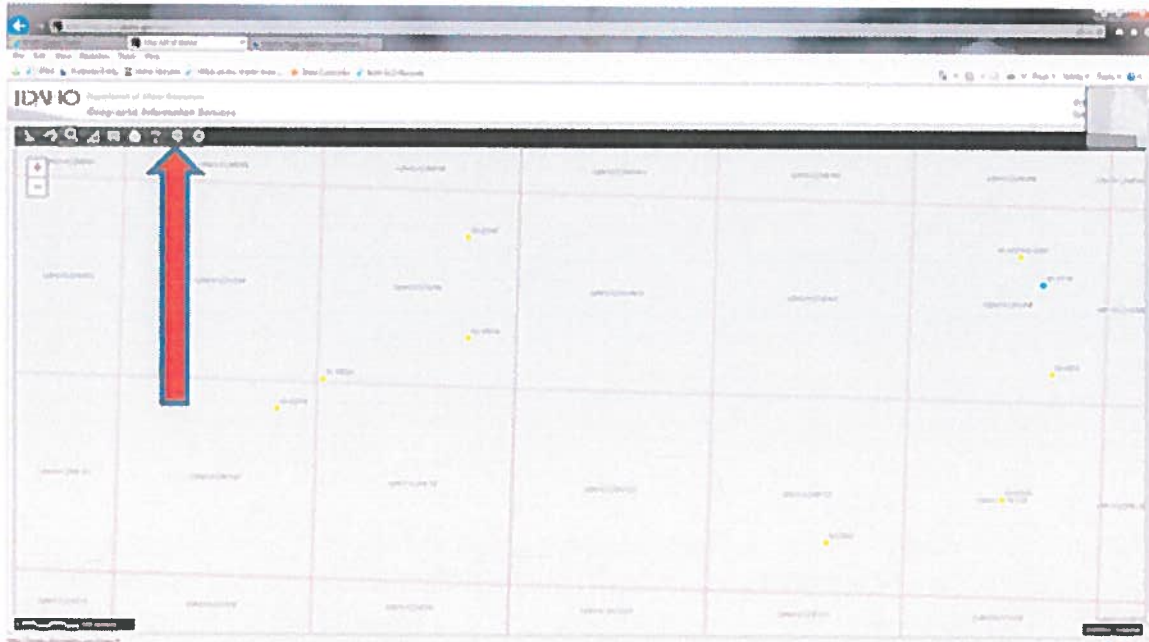

The next screen will be a map of the state of Idaho. In the top left of the screen, you will see a tool bar with different options. Click on the magnifying glass to search for your property.

The search box will pop up and you can search by your address.

Once you have searched for your address, the map will zoom to that area and a screen like this will pop up. At this point, you should go back to the top of the page with tool bars and click on the icon that is three papers stacked on top of one another.

A map contents screen will pop up. In the bottom half of the pop up is a drop down menu that says 'show background.' Change this to 2009 NAIP. An aerial photo should appear. You can now navigate around to find all 13 acres of your development and can zoom to these points. This view will also include the legal description of where the land is. When you print the map, be sure to draw an outline where all the acres are as well as draw a point where the diversion will take place.

I hope this is helpful to you. Please let me know if you have any questions about the mapping tool, or if there are any other clarifications on the letter that I sent you requesting additional information.

Sincerely,

Danie Merriman

Subject: RE: well permit

Danie,

Will you please respond to Marie's email if needed. I am not sure if you wanted to address the comment she made regarding sending in additional maps etc....

I will send another copy of the letter and attachments in Mondays mail ☺

Let me know if you want me to do anything else. * I did not respond to this email. RS

Subject: RE: well permit

As of yesterday, I still have not received anything via mail. If this was not resent, can it be? Yes, I would like to request 30 days per the email copy of the letter as that is all I have at this time. I am uncertain as to where to get additional maps, as we thought these were sufficient. Thanks for your help. Sincerely, Marie Beatty

Marie,

Would you like to request additional time to submit the information requested? If so how much additional time would you need?

Rachel

Subject: RE: well permit

Rachel, This information was not received. I am so glad I checked. Will you please have it re-sent or send me Danie Merriman's email. The letter only gives 30 days for a response or will be voided, and we are well into that. Thanks, Marie

If it was sent to the address on the letter, that is correct, maybe it will still show up, but I need to start working on the needed items.

Marie,

It seems the Department is waiting on additional info. I have attached a letter that was sent on February 20, 2015.

Please let me know if you have additional questions.

Sincerely,

Rachel Sommer

Subject: well permit

Hi Rachel, I was just curious about our permit. We will be having a meeting soon, and I know the Board will be asking. Is there any way to get an update? Thank you so much. Marie

Good Morning,

I did receive your email and am reviewing it as we speak. Have you heard back from your well driller regarding the water bearing zone? We need this to move to advertising.

Thanks!

-Danie

Re: Application for permit 63-34021

Dear Applicant,

This letter is in regards to changes made to application for permit 63-34021 per phone conversation with Marie Beatty on April 21, 2015. The following changes have been made to your application.

1. Section 3: The government lot was removed from the description of the point of diversion. Based on USGS quadrangle maps, your property is not located on a government lot.
2. Section 4: The beginning of the irrigation period was changed from March 15 to March 1. This is based on Department standards for the irrigation area where you are located.
3. Section 6: The description of the proposed diverting works was elaborated based on the additional information you described in your attachments.
4. Section 8: The description of the place of use was completed based on form standards. This includes rounding the acres to the nearest whole acre.
5. Section 13: A new map was attached based on more recent imagery from 2013.

Please review the following changes and verify that all of the information is correct. If you see a part of the form that needs changes, please make them and include your initials. When you are satisfied with the completed application, please sign the bottom of page two and return the entire form to the Western Region office.

The water bearing zone for your proposed well is required to advance your application to the advertisement stage of processing. This information may be submitted by emailing me at danie.merriman@idwr.idaho.gov or by calling the Western Office at 208-334-2190.

Please submit the amended application and requested information for the application to be processed. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. The application will be voided without a timely written reply within the next thirty (30) days. Refunds are not issued for voided applications.

Thank you for your attention to these matters.

Sincerely,

Danie Merriman
Water Resource Agent
IDWR, Western Region

Re: Application for Permit- Request for more information

Dear Applicant,

The purpose of this letter is to request additional information related to the application for permit 63-34021 submitted on December 17, 2014. Your current application is missing several key components that make it a valid request.

First, there needs to be a description of the diverting works as requested in part 6a of the application. This could include listing the pump, motor, ditch, pipeline, diversion, etc. It needs to describe how you are going to get the water where it needs to be.

Second, because the proposed irrigation area is in water basin 63, applicants are required to describe the water bearing zone for their wells. This is not on the original application, but is important to know for advertising the application later on.

Section nine (9) of your application states that you are in the boundaries of the Boise-Kuna Irrigation District. Do you receive any surface water from this entity for irrigation?

Finally, there needs to be some clarification and possibly amending of the number of acres you wish to irrigate. Section eight (8) of your application requests 13 (which we would round from 13.173) acres to be irrigated. In your attached personal narrative, you have described 5.9 (rounded from 5.849) acres of undeveloped ground. Where are the additional 7.1 acres you wish to irrigate? Please update section 8b and describe how many acres are in each quarter quarter. Section 13 of the application requires a map of the proposed project required. Your attached map includes a visual of 2.0 (rounded from 1.97) acres out of the total 13 acres requested. Please update your map to include the point of diversion as well as place of use for all 13 acres.

I am returning a copy of your original application with notes showing the areas that need to be addressed. Please submit the amended application and requested information for the application to be processed. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. The application will be voided without a timely written reply within the next thirty (30) days. Refunds are not issued for voided applications.

IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please contact me at 208-334-2190 if you need more information. Thank you for your attention to these matters.

Sincerely,

Danie Merriman
Water Resource Agent
