RE: Revised Amendment of Permit No. 37-8857

Dear Mr. Hill:

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

On March 27, 2015, a letter with an amendment of permit was sent to you regarding this subdivision. Due to subsequent correspondence with your attorney, Jim Speck, we have revised the amendment. The amendment allows water from your system to supply 20 homes within the borders of the subdivision as per Mr. Speck's correspondence with us. An amendment is still required to have the points of diversion for this permit described correctly.

It is our understanding that your manager is Rod Gonsales, 338 S 600 W, Corral, ID 83322. We will send a copy of this letter to Mr. Gonsales for his records. We will also send a copy to your attorney, Jim Speck, PO Box 987, Ketchum, ID 83340. An email will also be sent to Mr. Speck.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days.

If you have any questions in regard to this matter, please do not hesitate to contact me.

Sincerely,

Daniel A. Nelson

Staff Hydrologist
